21 November 2018

MR./MS. Franklyn Gallardo
Resident
Barangay Lower Irasan
Municipality of Roxas, Province of Zamboanga Del Norte

Dear Sir/Ma'am:

We are pleased to invite you to attend the **Public Hearing** of the proposed **Cement Finishing Plant Expansion Project** of the **Petra Cement Inc.** The said hearing is scheduled on **13 December 2018 (Thursday)** at **9:00 AM** (*registration starts at 7:30 AM*) and will be held in the **Covered Court, Brgy. Lower Irasan, Municipality of Pres. Manuel A. Roxas, Province of Zamboanga del Norte.**

The Public Hearing will be conducted as part of the requirements of the proponent's application for an Environmental Compliance Certificate (ECC). Interested parties will be given the opportunity to express freely their concerns/support/opposition/questions about the project.

Kindly register in person or submit your opinion(s) in a concise position paper to this Office or email it at ciamd.emb.co@gmail.com on or before 10 December 2018. Those who will not be able to register or submit written positions may be given the opportunity to share their issues on the day of the hearing itself.

Herewith is the project's Executive Summary for the Public (ESP) for your reference. The project's Environmental Impact Statement (EIS) is downloadable at our website: www.cia.emb.gov.ph (*kindly access the Notice of Public Hearing/Consultation link found in our web page*). The copies of the ESP and EIS are available in this Office and in the following offices:

- **EMB Region IX**
Office Address: Sitio Lantawan, Barangay Pasonanca, Zamboanga City
Telephone No.: (062) 985-0428 | (062) 985-0429 | (062) 215-4137
- **Municipal Planning and Development Office (MPDO)**
Office Address: Municipal Hall of Manuel A. Roxas, Province of Zamboanga del Norte
Cellphone No.: 09305086832

For more details, please contact the Environmental Impact Assessment and Management Division of this Office at Tel. Nos. (02) 920-2240 to 41 and look for the project case handlers **Engr. Carlo Vic Arida** and **Mr. Xairus Rey Guzman**.

NOTICE OF PUBLIC HEARING

On the ENVIRONMENTAL PERFORMANCE REPORT AND MANAGEMENT PLAN (EPRMP) of the
proposed CEMENT FINISHING PLANT EXPANSION PROJECT of PETRA CEMENT INC.

Notice is hereby given to all parties who wish to give their opinion regarding the proposed CEMENT FINISHING
PLANT EXPANSION PROJECT to attend the Public Hearing on 13 DECEMBER 2018 (THURSDAY) at 9:00
AM (registration starts at 7:30 am) to be held in Covered Court, Brgy. Lower Irasan, Municipality of Pres.
Manuel A. Roxas, Province of Zamboanga del Norte.

The Public Hearing is being conducted in connection with the review of the EIS of the aforementioned project by
the Environmental Management Bureau (EMB) of the Department of Environment and Natural Resources (DENR).

Due to the increase in demand on cement and similar products the proponent, Petra Cement Inc., intends to increase
the capacity of the cement/non-metallic mineral processing plant from 50,000 to 1,200,000 Metric Tons per year.
The proposed project will help in the development and expansion of industries in the Philippines. This will help
minimize importation of similar product and promote local production. The project will therefore help to enhance
the economic growth within the locality and nationally through generation of employment and government revenues
i.e. individual taxes, real estate taxes and corporate taxes.

The key information about the project is as follows:

Project Name	CEMENT FINISHING PLANT EXPANSION PROJECT
Project Proponent	Petra Cement Inc.
Project location	Brgy. Lower Irasan, Municipality of Manuel A. Roxas, Province of Zamboanga del Norte
Nature of project	Non-metallic mineral processing plants (Cement Grinding Facility)
Annual Production Capacity	Existing : 50,000 MT/year Proposed: 1,200,000 MT/year
Total Land Area	Existing: 52, 727 Square Meters Proposed: Same as existing

All interested parties who wish to attend or participate in this Public Hearing should preferably confirm their
attendance/participation and may give their opinion(s) in a concise position paper to the ENVIRONMENTAL
IMPACT ASSESSMENT AND MANAGEMENT DIVISION (EIAMD) of this Office through mail or through
email at eiamd.emb.gov@gmail.com three (3) days before the Public Hearing schedule. Those who will not be
able to register or submit written positions may be given the opportunity to share their issues on the day of the
hearing itself.

The project's EPRMP and Executive Summary for the Public (ESP) are downloadable at our website:
www.emb.gov.ph (kindly access the Notice of Public Hearing/Consultation link found in our website) while the
hard copies will be available in this Office and in the following offices:

- 1) EMB Region IX
Sitio Lantawan,
Borongan Passaca
Zamboanga City
- 2) Municipal Planning and Development Office (MPDO)
Municipal Hall of Manuel A. Roxas,
Province of Zamboanga del Norte

For more details, please contact EIAMD Division of this Office at telephone number (02) 929-2240 to 41 and look
for the project case handlers: Engr. Carlo Arida and/or Mr. Xatros Guzman.

Duterte says he will 'wipe out' Parojinog clan of Ozamiz City

AFF, PNP move with caution on 'Duterte Death Squad'

Manila, Philippines — Military and police officials are cautious over President Duterte's proposal to form an armed civilian group to go after communist rebel assassins.

Manila, Philippines — President Rodrigo Duterte on Wednesday threatened to "wipe out from the earth" the Parojinog family, a political clan in Ozamiz allegedly linked to illegal drugs trade.

Duterte warned mayors he "would not hesitate to kill them if they are involved in illegal drugs." He then singled out the Parojinogs, whom he said had ordered the killing of police officers who had reported their illegal activities.

"If you are an evil mayor or councillor and

you think of disgusting things, or even ten times more disgusting than that, I can do it better 50 times than you can. Do not intimidate me. I will strangle you if I lose my patience, you son of a *****," the president said during the groundbreaking of an

Cops convicted in Kian delos Santos murder

Manila, Philippines — The Calabarzon Regional Trial Court Branch 125 has convicted three Calabarzon cops of murder for the killing of 17-year-old Kian Loyd delos Santos in August 2017.

Calabarzon RTC 125 Judge Rodolfo Arceza Jr. sentenced PO1 Arnel Oares, PO1 Jerwin Perez and PO1 Jerwin Cruz to reclusion perpetua or up to 40 years in prison with no possibility of parole.

The court also ordered the three cops to indemnify or compensate the heirs.

Website: <http://www.emb.gov.ph>

NOTICE OF PUBLIC HEARING

On the ENVIRONMENTAL PERFORMANCE REPORT AND MANAGEMENT PLAN (EPRMP) of the proposed CEMENT FINISHING PLANT EXPANSION PROJECT of PETRA CEMENT INC.

Notice is hereby given to all parties who wish to give their opinion regarding the proposed CEMENT FINISHING PLANT EXPANSION PROJECT to attend the Public Hearing on **13 DECEMBER 2018 (THURSDAY)** at 9:00 AM (registration starts at 7:30 am) to be held in Covered Court, Brgy. Lower Irasan, Municipality of Pres. Manuel A. Roxas, Province of Zamboanga del Norte.

The Public Hearing is being conducted in connection with the review of the EIS of the aforementioned project by the Environmental Management Bureau (EMB) of the Department of Environment and Natural Resources (DENR).

Due to the increase in demand on cement and similar products the proponent, Petra Cement Inc., intends to increase the capacity of the cement/non-metallic mineral processing plant from 50,000 to 1,200,000 Metric Tons per year. The proposed project will help in the development and expansion of industries in the Philippines. This will help minimize importation of similar product and promote local production. The project will therefore help to enhance the economic growth within the locality and nationally through generation of employment and government revenues i.e. individual taxes, real estate taxes and corporate taxes.

The key information about the project is as follows:

Project Name	CEMENT FINISHING PLANT EXPANSION PROJECT
Project Proponent	Petra Cement Inc.
Project location	Brgy. Lower Irasan, Municipality of Manuel A. Roxas, Province of Zamboanga del Norte
Nature of project	Non-metallic mineral processing plants (Cement Grinding Facility)
Annual Production Capacity	Existing : 50,000 MT/year Proposed: 1,200,000 MT/year
Total Land Area	Existing: 52, 727 Square Meters Proposed: Same as existing

All interested parties who wish to attend or participate in this Public Hearing should preferably confirm their attendance/participation and may give their opinion(s) in a concise position paper to the ENVIRONMENTAL IMPACT ASSESSMENT AND MANAGEMENT DIVISION (EIAMD) of this Office through mail or through email at eiamd.emb.co@gmail.com, three (3) days before the Public Hearing schedule. Those who will not be able to register or submit written positions may be given the opportunity to share their issues on the day of the hearing itself.

The project's EPRMP and Executive Summary for the Public (ESP) are downloadable at our website: www.emb.gov.ph (kindly access the Notice of Public Hearing/Consultation link posted in our website) while the hard copies will be available in this Office and in the following offices:

- 1) EMB Region IX
Sitio Lantawan,
Barangay Pasonanca
Zamboanga City
- 2) Municipal Planning and Development Office (MPDO)
Municipal Hall of Manuel A. Roxas,
Province of Zamboanga del Norte

For more details, please contact EIAMD Division of this Office at telephone number (02) 920-2240 to 41 and look for the project case handlers Engr. Carlo Arida and/or Mr. Xalrus Guzman.

December 2, 2018 Sunday

Army, BIFF clash in Maguindanao as campaign for Bangsamoro ratification nears

Maguindanao, Philippines — The Philippine Army's 2nd Mechanized Battalion and the Bangsamoro Islamic Freedom Fighters (BIFF) clashed in Maguindanao on Tuesday, three days before the start of the campaign for the ratification of the Organic Law for the Bangsamoro Autonomous Region in Muslim Mindanao (OLBARRMM).

The Philippine Army's 2nd Mechanized Battalion and the BIFF, a breakaway group of the Moro Islamic Liberation Front, from early morning until evening of Tuesday, clashed in Sitio Natta, Barangay Salanan as staging ground for attacks against police detachments in Sheriff Aguak, Datu Hoffer, and Ampatuan towns employed sniper fire that slowed down the military.

HRW: Duterte's marijuana joke a cruel insult to drug war victims

Manila, Philippines — Human Rights Watch (HRW) said President Rodrigo Duterte's joke about marijuana was a cruel insult to drug war victims.

"Duterte's supposed joke is not funny," HRW Asia director, said Wednesday. "Duterte's supposed joke is not funny," HRW Asia director, said Wednesday. "Duterte's supposed joke is not funny," HRW Asia director, said Wednesday.

Duterte's admission of using marijuana in jest, moreover, urged Duterte to decriminalize the medical use of cannabis.

"Duterte wasn't joking, but perhaps he will support the global trend to legalize cannabis use to help alleviate medical conditions," Adams said.

Panel on Tuesday said the chief executive is in favor of legalizing marijuana for medical purposes, "but not for use other than that."

AFP, PNP back on Elections (Contee), are supporting the move

He added that there is actually a clamor for such extension for at least one more year, considering the continuing threat "lurking" in Mindanao.

"We have recommendations already. We will be recommending... so that we can substantially make a significant dent on terrorism," Galvez told reporters in an interview in Camp Aguinaldo yesterday morning.

To prove that there is still a threat of terrorism in the entire island, Galvez cited the bombing incidents in the provinces of Basilan and Maguindanao, and in Isulan town in Sultan Kudarat and General Santos City.

"So there is really a need to construct and limit the maneuver space of the terrorists to the maximum. We have a very weak terrorism law. So with that, martial law is needed to completely defeat terrorism," Galvez said.

The AFP recommendation for another year of martial law in Mindanao, he added, could be submitted to defense Secretary Delfin Lorenzana and the new FP chief by Dec. 12 — the day he retires from military vice.

He stressed that the military's position would be to continue the implementation of martial law only in the Mindanao regions.

Philippine National Police (PNP) chief Director General Oscar Albayalde said the PNP is one with the AFP in seeking an extension, adding that this would greatly ensure peace and order in the coming plebiscite for the Bangsamoro Organic Law and the midterm elections in May next year.

Presidential spokesman Salvador Panelo said Duterte might be persuaded to seek another extension shown by various sectors, including the citizens of Mindanao, for the proposal.

"The President will always evaluate whatever recommendations the AFP and the PNP will give him. But given the support of martial law in Mindanao, even by a Catholic bishop and the citizens there, the President may be persuaded to grant, to approve their recommendation. But of course, again, that is the prerogative of the President," Panelo said at yesterday's press briefing.

The 1987 Constitution permits the president to impose martial law for up to 60 days, which can be

extended by Congress "if the invasion or rebellion shall persist and public safety requires it."

But for Anak Mindanao party-list Rep. Makmud Mending, the AFP should first organize a briefing for the Senate and the House of Representatives to apprise their members on the need to extend new martial law in Mindanao.

Senate President Vicente Sotto III said senators would most likely seek a full security briefing to make an intelligent decision on the recommendation.

He added that he is open to calling for a special session to decide on the matter should Duterte request for one. An extension requires the approval of Congress in joint session.

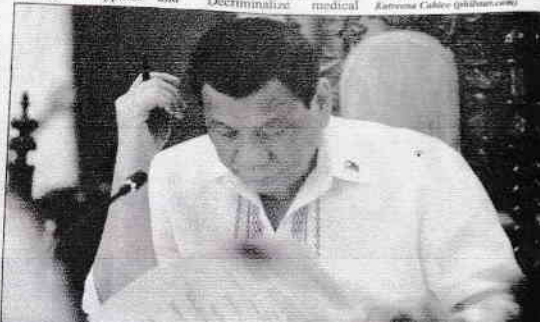

Duterte first placed the entire Mindanao under martial law on May 23, 2017 after Islamic State-linked terrorists laid siege to Marawi City. Close to 1,000 terrorists and more than 160 soldiers died in that incident, the longest urban war in the country since World War II.

Congress has already extended the military rule in Mindanao twice. The first extension lasted until Dec. 31, 2017 while the second will lapse at the end of the year.

Some religious leaders, including Ozamiz Archbishop Martin Jumoad, are supportive of martial law extension, saying the military rule had reduced crime and enforced discipline among the people of Mindanao.

Activists and left-leaning groups do not share that assessment though, as they worry that an extension will lead to more human rights violations and abuses.

NOTICE OF PUBLIC HEARING

On the ENVIRONMENTAL PERFORMANCE REPORT AND MANAGEMENT PLAN (EPRMP) of the proposed CEMENT FINISHING PLANT EXPANSION PROJECT of PETRA CEMENT INC.

Notice is hereby given to all parties who wish to give their inputs regarding the proposed CEMENT FINISHING PLANT EXPANSION PROJECT to attend the Public Hearing on 13 DECEMBER 2018 (THURSDAY) at 9:00 AM (preparation starts at 7:30 am) to be held in Covered Court, Regs. Lower Iruan, Municipality of Pres. Manuel A. Roxas, Province of Zamboanga del Norte.

The Public Hearing is being conducted in connection with the review of the EPR of the aforementioned project by the Environmental Management Bureau (ENMB) of the Department of Environment and Natural Resources (DENR).

Due to the increase in demand on cement and similar products the proposed, Petra Cement Inc., intends to increase the capacity of the cementation-metallurgical mineral processing plant from 50,000 to 1,200,000 Metric Tons per year. The proposed project will help in the development and expansion of industries in the Philippines. This will help minimize importation of similar product and promote local production. The project will therefore help to enhance the economic growth within the locality and nationally through generation of employment and government revenues i.e. individual taxes, real estate taxes and corporate taxes.

The key information about the project is as follows:

Project Name	CEMENT FINISHING PLANT EXPANSION PROJECT
Project Proponent	Petra Cement Inc.
Project location	Regs. Lower Iruan, Municipality of Manuel A. Roxas, Province of Zamboanga del Norte
Nature of project	New metallurgical mineral processing plant (Cement Grinding Facility)
Annual Production Capacity	Existing: 50,000 MT/Year Proposed: 1,200,000 MT/Year
Total Land Area	Existing: 52,747 Square Meters Proposed: Same as existing

All interested parties who wish to attend or participate in this Public Hearing should preferably confirm their attendance/participation and may give their opinion(s) in a response position paper to the ENVIRONMENTAL IMPACT ASSESSMENT AND MANAGEMENT DIVISION (EIAMD) of this Office through mail or through email at enmb.enmb@denr.gov.ph three (3) days before the Public Hearing schedule. Those who will not be hearing itself.

The project's EPRMP and Executive Summary for the Public (ESP) are downloadable at our website: www.enmb.gov.ph (study access the Master of Public Hearing/Consultation link found in our website) while the hard copies will be available in this Office and in the following offices:

- 1) ENMB Region IX
Sitio Lantawan,
Barangay Panoson,
Zamboanga City
- 2) Municipal Planning and Development Office (MPDO)

**C. SUMMARY OF ISSUES AND
CONCERNS DURING THE PUBLIC
HEARING**

PUBLIC HEARING
CEMENT FINISHING PLANT EXPANSION PROJECT
of PETRA CEMENT, INC.
DECEMBER 13, 2018, THURSDAY, 9:00 AM TO 2:30 PM
COVERED COURT OF BARANGAY LOWER IRASAN, MUNICIPALITY OF MANUEL A. ROXAS,
PROVINCE OF ZAMBOANGA DEL NORTE

MINUTES OF THE PUBLIC HEARING

Registration started at 7:30 AM at the Covered Court of Barangay Lower Irasan, Municipality of Manuel A. Roxas, Province of Zamboanga del Norte.

Weather- Sunny.

Invitation letters were sent to the LGU- Provincial Office, LGU-Municipality of Manuel A. Roxas, LGU- Barangay's Lower Irasan, Upper Irasan and Langatian, Municipal Planning and Development Office (MPDO) Roxas, Church – Roman Catholic Charismatic Multi-Purpose Cooperative, NGOs- Kasilingan Parents Association, Inc. (KPAI), Zamboanga del Norte Federal Parents Association, Roxas Motorcab Drivers Association (ROMODA), Musika Pabalikan Agrarian Reform Beneficiaries, Langatian CARP Beneficiaries Multi-Purpose Cooperative, DENR – Biodiversity Management Bureau (BMB), Regional Executive Director IX, Regional Director IX, PENRO, CENRO, and residents of Barangay Lower Irasan, Upper Irasan and Langatian.

Public Hearing was conducted on December 13, 2018, Thursday, 9:00 AM to 2:30 PM at the covered court of Barangay Lower Irasan. The activity was participated by identified stakeholders such as from LGU-Province, Municipality and Barangay, Community and Stakeholders, Church Organization, Peoples Organization, Petra Cement, Inc., Cense Technical Consultancy Services – EIS Preparers and EMB Central Office Representatives. All in all there were Three Hundred Thirty Three (333) attendees during the public hearing.

The Public Hearing was presided by EMB-Central Office and Petra Cement, Inc. representative, the Presentation of the Program is attached in Annex G.

The summary of issues and concerns in Table below:

ISSUES/CONCERNS RAISED DURING PUBLIC HEARING TO BE INCLUDED IN THE SCOPE OF THE EIS STUDY

EIA MODULE	Issues/Suggestions Raised by the Stakeholders	Sector or Representative Who Raised the Issue/Suggestion	Proponent's Response
1. Project Description	In terms of carrying capacity, can the plant carry the increase in capacity from 50,000 MT/year to 1,200,000 MT/year. Basis for increase	Serena Cabrera CENRO Manukan	The basis for increase in capacity was due to the projection of the government project. The DTI has a projection of 40 million metric tons, that is where we based our increase in capacity
2. Land	No issue was raised.	NA	NA
3. Water	Possible Effect of Calamities	Hon. Narzabal Brgy. Chairman Lower Irasan	The company shall not divert the existing condition of the creek, we shall observed buffer zone, improvement of drainage

	Possible Contamination of the Sea	Nestor Bastasa, Fisherfolk Chairman Lower Irasan	system in the area to allow the water to flow freely towards the sea. The company shall provide for a series of settling pond or wastewater treatment facility to allow the Total Suspended Solid to settle before it overflows towards the creek. There will be monitoring activity to be done by the proponent in order to check the quality of the sea water. In addition, PEMU-Manuel Berberio informed that even before Petra Cement came in, they are already monitoring the quality of water in the area.
4. Air	Dust Pollution during Habagat and Amihan	Diosdado Junnaog-Cooperative Chairman, Barangay Langatian	The project shall install air pollution control device in a form of dust collector, filter and bag house. Monthly replacement of filter shall be observed. DENR will do the strict monitoring on the possible pollution.
5. People	Integrity of the Perception survey because the proponent mentioned that they conducted a house to house interview. The lady was not interviewed.	Resident from Pasil, Lower Irasan	The proponent prioritized the houses near the plant site. We have interviewed 243 families and the perception need not to be 100 percent.
6. Others	Concreting of Road	Kagawad Lower Irasan	The proponent mentioned that this shall form part of the Corporate Social Responsibility (CSR) and will include in the Social Development Plan (SDP) in coordination with the LGU.

**D. TRANSCRIPTION OF THE PUBLIC
HEARING**

PUBLIC HEARING TRANSCRIPTION

Prayer Song

National Anthem

Joel Caballero (Petra Cement, Inc.): Okay mayo ugto sa inyong tanan. Sabihi lang ako ipa agi agi ang mga taga barangay Lower Irasan. Asa man ang mga taga Lower Irasan. Ah daghana uy uy. Ang mga taga Langatian? Oh naa man gihapon. Okay sabihin nato at introduce ang atong mga speaker sa buntagon. Ato itawag si Vice Mayor nalingkod sa akong atubangan naa diri ang taga PENRO, ma'am. (7:18) ah ug si Councilor Cabos. Barangay Captain of Lower Irasan, sa Barangay Langatian. And then I would like to invite also Engr. Gil Cruz for opening remarks. (audience clapping) Okay to start with our program, Public Hearing this morning I would like to introduce by Engr. Gilbert Cruz followed by the short message from the Municipal Vice Mayor Leonor Alberto and followed by the briefing and orientation of the purpose on the public hearing given to us by EMB Central Office. And then we discuss in the rules on the public hearing followed by the presentation of description of the project and alternatives and presentation of the EIA Study, process and results and followed by lunch and an open forum and then next is the recapitulation of the issues raised and the proponents response and atong gihimo na public hearing para sa PETRA CEMENT Expansion Project. I would like to give the mike to sir Gil.

Engr. Gilbert Cruz (Petra Cement, Inc.): First of all I would like to greet everyone a pleasant morning. Maayong buntag sa inyong tanan. Siguro kaganaha ninyo makahinumdom if you would remember 4 years and 3 months ago we have envision to put up a cement grinding in this place. So this is not the first time believe me. And una ko kayong nagtipok tipok pa (10:31) tungod kay ang among panginawon ang opinion ang inyong mga reaksyon kabahin sa pagpakatukod nato sa planta dinhi sa Irasan, Zamboanga del Norte. So allow me to thank you, daghang salamat sa inyo pag ani karon kay daghang kita mga objective na maabot kay daghan man kita bisita duna sa Manila gikan dito sa Environmental Management Bureau na lakip sa Department of Environmental Natural Resources adi ang mga opisyaes gikan sa Region, agi ang mga Government Officials from the Municipality, iban atong mg alibis. Wala man si Governor atong Mayor bat gahapon ang atong forever na gwapang Vice Mayor daghang salamat sa inyong pagtambong. Palakpak kamo diha. Agiha gyud bisan pagpakpak ang mga naggikan diri ug sa paghatag ng oras sa pagtambong. Daghang salamat ug maayong buntag sa inyong tanan.

Joel Caballero (Petra Cement, Inc.): Dahgang salamat Engr. Gil og ani man ang atong Vice Mayor Alberto

Vice Mayor Alberto: Daghang salamat sa atong taga munisipyo ang atong mga personality sa Environmental Management Bureau sa Regional ug sa Provincial dili na ko pagisa isahon si Mam sa CENRO dito pa sa Manila. Ug sa pagpili dito pa sa Manukan. Ang atong engineer, sa PETRA Cement ang mga officers at personnel sa PETRA Cement, mga katauhan sa Lower Irasan, ang atong mga opisyaes pamunuan ni Kapitan Narzabal ang atong mga konsehal sa Lower Irasan. Atong mga konsehaes at kapitan sa Barangay Langatian adi sila tanan noh. Ug kamong tanan. Sa tanang mga bisita ang mga taga Lower Irasan maayong buntag sa inyong tanan. (14:12) kadtong unang grupo sa una karon pangalawa sila sa kadtong hearing ug maghintay sila magsurvey sila. Sa lahat kaayo ang kahilingan ng PETRA Cement ang makadugay sila diri sa atong lungsod ug dapit sa Lower Irasan. Dugay na sila wa pa sila magsipi (audio inaudible) daghan na papeles na hindi naandar noh kami didto mutawag sa (audio inaudible) unsa ang among pangayuun namo. Kahit na gusto po namo makuha na kay naa man na procedure gaya nito. Karon nagtawag sila ng public hearing gumika na pila volume na ipagawa na semento dako dako na galing sa Pampanga nagoperate na ni sila. Operational na (audio inaudible) so kabalo na nato kay naa na personahe na dapat na sila ipagawa. Naa man ang EMB naa man sila mga ipahibalo na (audio inaudible) na mangyari na buntag na dili (audio inaudible) dako nga na maka avail ta na gani dili (audio inaudible) so operational na nato maghatag nato kanang income sa barangay kay magsulod man sa barangay then sa munisipyo po then mas lalaki ang kita diri so ano dughay na nato ipasa karon. Naa man si mayor mulakaw naa man kami dalawa na need matapos kami sa munisipyo so ako na lang ihatag. Salamat kaayo sa inyong tanan. So dahgang salamat kaayo sa inyong pagtambog ug maayong buntag (audience clapping) (17:30)

Joel Caballero (Petra Cement, Inc.): Daghang salamat Vice sa inyong mabulagang mensahe para sa amohang project ug sa akong panahon sa EMB 17 okay so I would like to give the mic to EMB

Engr Carlo Arida (EMB-Central): Maraming salamat Joel. So bago kami magsimula nagpapasalamat po kami in behalf of Central office sa pagbibigay po ng mensahe sa pagpapaunlak po sa invitation naming especially our officials si Vice Mayor, Councilors, sa iyong mga Barangay Captains po natin na umattend po sa public hearing po namin ano. Actually si Joel hindi kami na-introduce I'm Engr. Carlo Arida I'm one of the case handler po nila sa ECC application nila. Yung ECC (Environmental Compliance Certificate) idi-discuss po namin ulet mamaya kasama po iyong isa pa po namin case handler si Xyrus Guzman Geologist from Central Office and with us we have Atty. John Ang our Hearing Officer mamaya po sa ating open forum. And some of the members of the EIA sila po iyong nag-aaral nung EIA nung project or Environmental Impact Assessment po nila. Environmental report nila sila po iyong nag-aaral sila po iyong nagrereport po sa amin sa EMB sa EIA kung aaprobahan na natin iyong project o hindi. Bali sa ECC ididiscuss ni Xy noh this is a guide the proponent on how to well mamaya ididiscuss ni Xy. Tapos ano pa ba? Well siguro para tuloy-tuloy po

tayo. I will give the mic to Xyrus para i-brief lang po tayo, ano po ba ito? Kung bakit po ba natin ginagawa ito? All about the ECC so makinig lang po tayo. Tapos mamaya po sa open forum po ano huwag po kayong mahihiyang magtanong, itong activity po na ito (audio inaudible) tapos huwag po kayong mahihiya kung hindi po ako nakakapagsalita ng inyong dialect so huwag po kayong mahiya magsalit sa local dialect po ninyo. Kung iissue ba sila o hindi so ibibigay ko na ho ung mic kay Xyrus makinig po tayo. Maraming salamat po. (20:45)

Xyrus Guzman (EMB-Central): So good morning po papakilala ko lan po sarili ko. Ako po si Xyrus Guzman from EMB Central Office po. Ako po ang isa sa case handler sa PETRA Cement. So una po pasalamat ko po kayo sa panahon at oras at effort po ninyo sa pagpunta niyo po dito kasi mahalaga po ito para sa ECC application po ng PETRA Cement. Okay lang ban a tagalog nalang, dili man ako makabalo ug makausab kapag gamay gamay lang. Pero in fact hindi ko po talaga alam ang bisaya pinagpraktisan ko lang po iyon kagabi. Iyon lang ang alam kong bisaya so acknowledge ko lang po sa DENR dito si Sir Anton Regalos CENRO. Sir good morning. Si Ma'am Serena po sa CENRO din po noh. Sir Manuel Bantayon Berberyo, PEMU ng Zamboanga del Norte and si Sir Leo ng PENRO. So ngayon po ang idi-discuss ko ngayon ano po ba ang EIA saka ano po ba iyong ginagawa naten dito at para saan itong event na ito. Isa sa mga presentation o pag-involve ng ECC application ng PETRA. (22:09) So isa po sa policy background po iyan for the ECC application po is the Presidential 1586 na nilalaman po noon or sinasabi po noon na may proyekto po o project po na kinakailangan ng ECC kung private or government ay kinakailangan na magsecure or kinakailangan na kumuha ng ECC or Environmental Compliance Certificate. Ah paalala lang po sabi nga po ni General Arida na ECC hindi po siya (audio inaudible) or flying food. Tama ano. So siguro sa Presidential 1586 nagkaroon ng revise procedure manual o DENR District Order 2003-30 ang sinasabi po sa DAO 2003-30 ay ang implementation of rules and regulation po para sa Presidential Decree 1586 may mga guidelines po doon na binago ung format para po ma-guide ang mga proponent at the same time para sa mga preparers or consultant doon po sa proseso po ng ECC ano. Tapos po doon po nagkaroon ng Circular 2015-005 may mga na-amend po doon sa 2003-30 na nilalaman po doon na mayroon pong project categorization kung ang isang project po ay magfa-fall po sa isang ECC or Certificate of Non Coverage or kung ang ECC saan siya i-aapply siya EMB Central office man po siya o Regional office noh. Tapos dito po sa DENR (24:15) bago po DAO 2017-15 ang nilalaman po niyan ay iyong enhancement po ng participation o public involvement po para po sa ECC application o sa EIA process noh. So doon po inenhance po iyong involvement po ng tao noh at the same time po iyong halaga po ng 2003-30 noh. Tapos po iyon po explain ko lang po kung paano po iyong EIA process so doon po sa project description doon po natin malalaman kung ang isang proyekto ay kailangan magsecure ng ECC or CNC o Certificate of Non Coverage

at kung saan po siya ia-apply kung sa Central Office o sa Regional office at kung papaano ang application niya. Mayroon po kasi tayong ECC na ina-apply na online o manual katulad po nito na inaapply po siya manually so (25:20) hindi po tulad ng dating policy na MC 2014-005 na malalaman po natin kung ano ang application. Malalaman po natin doon base po sa project organization ang threshold po ng isang proyekto noh. Tapos ah doon po sa EIA scoping may color code po kasi iyan ano. So iyon pong color code po ang ibig pong sabihin po niyan ang facilitator po na gumawa iyong proponent po itself. Tapos ang isang proponent po kasi nag outsource po sila ng preparer o consultant para po gumawa noon ng EIA document na kung saan po iyong EIA document ang magiging basehan po ng DENR kung ang isang proyekto ay dapat bang bigyan ng ECC o hindi ano. So doon po sa EIA scoping napapaloob din po doon iyong IEC o Information Education Campaign na form din po ng involvement din po siya na kung saan po ininform po kayo ini-educate tungkol po doon sa magkakaroon ng proyekto at the same time po doon po nagcoconduct ng chansa o pagkakataon na ma-raise po ang inyong mga issues and concerns (26:34) o comments o mga agam-agam tungkol po doon sa itatayong proyekto ano. So pagkatapos po ng IEC nagkaron po ng Public Scoping form of public involvement po ninyo doon po ung chansa o pagkakataon na makuha po iyong mga komento o mga issues niyo po o agam-agam tungkol po doon sa proyekto tapos doon po sa EIA Study Report ay doon po nagkaron ng preparation o EIA document ng proponent at sunod po doon ang preparer sa paggawa ng document. So ang form po ng EIA documents it's either siya as EIS or EPRMP so kapag bago pong proyekto EIS po iyon at kung mayroon na pong na-issue na ECC before iyon po iyong ginagawa nilang document iyong EPRMP. So sa lagay po ng proyektong ito ng PETRA Cement since mayroon na po siyang existing na ECC nan a-issue sa EMB Regional so ito pong expansion nila so ang issue nilang document ay EPRMP na noh. (27:49)Tapos nagkaron po ng DENR consultation para po i-review o pag-aralan iyong EIA document natin na ginawa ng proponent at preparer. So sa amin po sa EMB o review commission para po i-review o pag-aralan ang document na ginawa ng proponent at preparer. So sa amin po sa EMB kumukuha po kami ng review committee para po pag-aralan iyong EIA document. So pag-aaralan po kung ano pong EIA document kung sa kalupaan po o sa land, sa ere o sa air, o katubigan o sa water. Importante po ay iyon pong pagdocument ng Socio Eco Impact Assessment po na maidocuments. So kailangan po o mahalaga po na madocument po ito para po makuha po ang issues tungkol po para po sa inyo dahil po para sa proyekto o para po sa project. Tapos po doon po sa process ang EMB syempre kailangan ma-issuehan ng ECC or madedeny ang ECC. May denial ng ECC o kaya ECC issuance may recommendation ng mayroon pong resource person po iyan kung ano pa iyong mga kabilang o mga concern po ng government so kunwari po mayroon po siyang minahan so pinaka may hawak po neto ang Mines and Geoscience Bureau, tapos po kasunod po neto kapag nakapagsecure na sila ng ECC hindi pa po doon magtatapos ito, mayroon po sa

compliances po ng ECC na certificates na compliance po ang isang project at iyong proponent na dapat nilang ginagawa. Depende po iyon sa provisions po ng ECC tapos kapag na-issuehan na ng ECC mayroon pong implementation. Na-implement na po iyong proyekto at doon po sa baba(29:41) sa evaluation iyon nga po kapag na implement na hindi pa po doon nagtatapos yung proyekto so mayroon pong compliance monitoring na dapat gawin ng proponent so mayroon silang sariling monitoring SMR at mayroon din sa EMB Region ung Compliance Monitoring Report na kailangan na isubmit ng isang project o proponent sa EMB Region noh. So doon po sa continuous monitoring nila nagkaroon po ng public involvement po ng mga tao so dito po papasok iyong public participation ng mga tao lalong lalo na stakeholders ng project. So kaya po mayroon tayong Multi-Partite Monitoring Team o MMT may representation po iyan mayroon po sa EMB Region at sa DENR doon pa rin makikita kung may issues and concerns pa din ang mga tao doon sa project sa nagkakaroon po tayo ng representation kada MMT. Tapos kunwari po magkakaran po ng project MMT o response unang una po mayroon na pong existing na ECC kung mayroon mang expansion uulit po sila sa EIA process tulad po ng doon sa PETRA so uulit po ng proseso sa project screening hanggang sa simula hanggang sa matapos po ulet hanggang sa matapos sabay na po ng ECC. (31:32) nasira na lang po representation kasi poi bang Microsoft ang gamit so ang sinasabi lang po doon sa mga may arrow na iyan public involvement o public participation kung saan po is kailangan po na makuha mga agam-agam niyo, issues and concerns regarding po doon sa project. So ito pong public hearing so later magkakaroon po tayo na pangagasiwaan ni Albert Ang na kabilang po namin sa DENR EMB so iyon po iyong chance natin kung mayroon po tayong issues and concerns. Chance na po natin ito na masabi ang mga issues and concerns po natin. So maraming salamat po. (32:19)

Atty. John Ang (EMB-Hearing Officer): Good morning po sa ating lahat. Good morning po ako po nga pala si Atty. Jed ako po iyong magiging hearing officer po para sa public hearing na ito. So papaliwanag ko lang po ang rules natin para po sa public hearing na ito mamaya po pagkatapos ko pong magsalita ipapaliwanag po sa atin ang project description ng proyeto na ilulunsad po ng PETRA Cement. Maaari alam niyo na po kung ano po iyong proyekto nadiscuss na din po ni Vice Mayor para saan po ang application nila ito. Ngayon po after po noon magpepresent po iyong kanilang preparer sa kasalukuyang kalagayan ng kalikasan dito po sa inyong lugar. Ah sana busisiin po ninyong maigi ano. Apat na aspeto po na ipapakita po nila ang kasalukuyang kalagayan ng tubig, ng hangin, ng lupa at ng sa community po. So sana po mascrutinize po ninyo o mausisa po ninyo iyon pong presentation po nila dahil po sa open forum bibigyan po namin kayo ng panahon na masuri ninyo ma-question po iyong presentation nila. Ah sana po sa buong panahon po ng presentation nila kung may mga tanong po kayo i-reserve po natin mamaya doon sa open forum. Bibigyan po namin kayo ng kalayaan doon sa open forum na magsalita iyong tungkol sa

proyekto at doon sa presentation po ng ating proponent at ng kanilang preparer. Ah lahat po sana ng questions po ninyo sana po tumulong din po kayo sa proceedings na ito dahil po kung hindi po kami naentertain ng paulit ulit so sana po iyong natanong na huwag na pong maulit iyong tanong. At alam ko po mayroon po iba sa inyo may emotional responses as much as possible hinay hinay lang po tayo. (34:17) ano ang kailangan po natin dito ay makuha iyon pong inputs na galing po sa inyo. So sana po malinaw po maipahayag ang inyong mga komento, concerns, issue po para sa proyekto po dahil makakatulong po ito sa aming ahensya we will decide kung mag-iissue kami ng ECC o hindi. Ganon pa man mamaya po sa open forum lilinawin lang po namin ano pa bang additional rules para po mapagusapan na po natin ang para po sa proyektong ito, maraming salamat po at sana po tumutok po kayo sa presentation nila (35:00) Iyon pong mga nandito ma'am pwede po para makita po ang gagawin nilang presentation. Sige po thank you po. So ibibigay ko na po ang floor para po sa ating presenter para sa project description, sino po? Ah sir, pasensiya na po hindi po ako marunong magbisaya. Nakakaintindi gamay lang. sir.

Joel Caballero (Petra Cement, Inc.): Maayong buntag sa inyong tanan. Ang ako para sa proponent side ako magkinsay kung unsay pinaka importanteng nibawhan before our operations sa PETRA Cement. So atoang explain ang summary sa mga findings na na-conduct ng public consultation ng house to house survey so mao na among iconsider dinhi. Okay. (36:16) so mao ni siyang project fact sheet sa PETRA Cement so from Barangay Lower Irasan and then ang PETRA Cement Inc. Ang atoang engineer didto po sa luyo, Vice President sa PETRA Cement then ako man ang function sa company ang PCO Public Commission Officer then atoang preparer sa amohang side si CEnSE Technical Consultancy Services so mao na ang contact members. So unsa pan diay ang project sa PETRA so dili man siya maingon, hello, so mineral processing project, non-metallic mineral processing plant like cement and other products like ceramic industries, manufacture of glass and glass product. So mao ni sa ah mao ni siyang project sa PETRA so sa una ang among karaang ECC is ah 50,000 metric tons per year lang gi-apply so na ball out na sa management na kinahanlan asa ang production mao ni karon na expand ang project so ang existing niya. Okay okay ang existing niya karon is nasa 1.2 metric tons per week so marami so nagconduct kami ng public hearing para maoperate ang PETRA Cement mao na ang kanyang capacity maximum production sa usa katuig. Okay so amoang ECC number doon sa Region issuance June 7, 2016. May additional sa kadahilanang ang aming kumpanya ay umaasa na malaki ang pangangailangan ng semento sa Mindanao. Kaya kami narito upang ipahayag muli ang aming layunin na magtaas ng kapasidad ng kada buwang 1.2 metric tons kada taon. Sa kasalukuyan ang proyekto ay nasa pagdevelop so development phase pa din dili pa kita makakita ug mga machine na may mahimo ug semento. (39:49) so karon ang tulad ng aming pagdagdag ng lupa or

raw materials ng paglagay ng barracks para sa construction workers so mao ni siya sa atong site paglagay sa ayos ng drainage system at paglagay ng proteksyon sa (audio inaudible) so paglagay ng riprapping at paglagay ng bato sa gilid upang (audio inaudible). Sa project site makita pud nila protection para sa gilid para dili siya madapit. So ngayon hindi pa nagsisimula ang operation sa paggawa ng semento. Mga pangunahing bilin ang mga bahagi ng proyekto na matatagpuan ang mga welding machines na may kapasidad na 400 metric tons per hour iyan po ang process sa pagimbak ng stones, ripton cement, styling machines, generator set at dust collector. Ang mga material kung saan ito ay gagawing semento ang paggiling at paghalo ng limestone ang ihalo para ito ay maging ganap na semento. (41:47) ang gamit po namin ay imported o galing pa sa ibang bansa doon sa mga genset na galing po sa source na may (audio inaudible). So sa project description para sa mga kasalukuyang pasilidad ng proyekto ay ang admin office, clinic, canteen and quarters. Drainage system para umayos ang daloy ng tubig papunta sa pinakamalapit na creek. Water piping systems para sa pangangailangan ng mga tao at manggagawa at magmumula sa local water supply from Water District of Roxas. Bahagi ng pasilidad ang pagpigil ng polusyon para sa pagpapanatili ng tamang integration machine sa pagmaintain ng facility MRF para sa tamang pagsasalin salin ng mga basura naayon sa Republic Act 900 of 2000 (43:14) basura mula sa domestic na gamit toxic and management facility para sa tamang paglagay ng basura gaya ng basag na bombilya mga gamit ng langis, mga sirang baterya, mga sirang gamit mula sa computer at mga electrical na bagay. So sap ag-iipon ng tubig galing sa ulan. Dust house para sa pagpigil ng paglabas ng alikabok habang naghahalo ng semento. Project alternatives side ang lokasyon ay naangkop sa land use ng munisipalidad ng Roxas lalo na ng lrasan bilang ito ay isang Industrial Zone at ito ay mapagkalooban ng kaukulang permiso mula sa DENR EMB para po sa 50,000 metric tons kada taon ang lupa ay pribado at pag mamay ari ng PETRA Cement Inc. malayo sa mga kabahayan at lupa at mga panananim sinasaka. Ang proseso ay pagtawag ng paggiling at paghalo ng limestone at gems lamang hindi ito kailangan lutuin para makagawa ng isang ganap na semento. Dahil dito maiiwasan ang matinding paglabas ng usok mula sa nakasanayang paggawa ng semento. Ang proseso ay sa pamamagitan ng paggamit ng compact machine na kasama ng paggiling at mga kaukulang gas collector sa pamamagitan ng bunk house. Okay so public consultation from EMB was given to us by our consultant. (44:57)

Engr. Venice Montemayor (CEnSE): Good morning. Maayong buntag sa inyong tanan. Bisaya pud mi noh taga Cebu pero tagalog bisaya istorya ha. Kung okay lang sa inyo. Makasabot man ta Cebuano ug Bisaya pero kanang law firm Bisaya bitaw. Kami ang commission bitaw sa PETRA Cement para sa pagconduct ng study. Kami ang CEnSE Technical Consultancy Services ako si Engr. Venice Montemayor ang kanilang Team Head sa ngalan ng akong kauban bitaw ang mga expert sa land

ug sa water na si Arnold Alvarez wala siya karon ug sa air namo si Engr. Olivares ug nag study bitaw sa terrestrial ang among Simmon Consult pagstudy sa flora at sa marine ug sa tawo sa people ang inyong lingkod para sa ma-address ang inyong mga issues and concerns bitaw na brought ninyo sa unang public consultation ug kahinumdum kamo na nagconduct kami ng perception survey sa inyo. Kanang walang naka attend bitaw sa public consultation maong magpresent kami sila naman pud directly maka kwan sa kanilang mga agam-agam bitaw sa project official bitaw. So sa una nagconduct bitaw ang PETRA Cement ng consultation naay issues raised bitaw na tungod bitaw sa project description. Una bitaw impact sa project ng cement process. Tungod bitaw sa proponent side kay dili man ni siya considered na hazardous kay siya ang semento magapalit lang sila pre-cooked bitaw kanang quarry bitaw sa kanang kabundukan. So mao sagot sa PETRA Cement ug ah tungod naman sa land ang kanang issues bitaw sa farming to industrial zone ang inyong lugar sa Lower Irasan particularly kanang ah area sa PETRA Cement classified na siya as Industrial Zone. Gikan bahagi didto bitaw kadto sa may PAIC kay industrial zone naman na siya. So among proyekto with accordance to land use giplano bitaw sa Roxas municipality of Roxas naay issue gi raised ang kamo sa una tungod sa water kung (48:05) basid naa hazardous chemical na mag-emit ang mugamit ang proponent sa pagprocess ng semento ah para basid maka-pollute kami sa tubig basid kanang creek bitaw sa gilid ang issue kana ang picapi ang tubag sa PETRA kay dry process man ni siya walay hazardous chemicals na gamiton sa pagprocess kung hindi ang blinker na daanan ng semento ug limestone ug gypsum na gikan sa atong local source diri kung wala man diri sa Roxas pwede man kita mangita sa source sa Cebu. Ang among nakit-an kay initially ang Cebu kay kinahanlan ang proponent ang ilang kuhaong source ay ang legal source na naay kumpleto na permits. Ug naa pud issue sa air so LGU man nagraised ana normal naman kanang maggiling kita ug semento bisan man ang atong gilingon naa gyud mag-emit na dust ug tawagon bitaw makamatay na particulates gikan bitaw sa pagprocess sa semento so expected na inyo na makunan na issue bitaw pero daan ang among proyekto dili kita magluto ug semento ato lang siya gilingon haluun makaform ta ug semento o Portland o poso land cement depende sa unsay klase. So naa ta ininstall, atong iraise ang mga issue ha ang atong EMP ang management plan buhat sa proponent kung inyo bang ila na address ang mga issues ug concerns. Una pa man ang among Information Education Campaign nagconduct mi para first hand palang malaman na namin unsa gyud ang mga posibleng issues sa mga tao ug na-inform ba ang mga tao sa proyekto? Unsa'y klaseng proyekto. Karon naman sa mga tao ang very common na siya ang local hiring kung ang PETRA Cement ba maghire sila ng local diri o magimport ba sila mga tao gikan asa so kinahanlan mauna ang issue (50:35) na atong tanwon na ila ba nila na-address sa ila pagka paghimo ug EMP. Mao na mga twice or thrice na sila nagconduct ng consultation sometime in 2016 kanang before nag-issue ang first ECC kanang naghatag ng ECC ug kanang bag-o

kanang 2017 na consultation sa expansion ng ilang capacity. So kami naman pud ang consultant sa perception survey amo na siya gi-summarize para sa issues and concerns bitaw na gikan sa Lower Irasan, Upper Irasan, Langatian so naay issue na okay kami na naay ensure na dili makaapekto sa health ng mga tao, ug ilang mga anak makatrabaho pagdating ng araw. Kung ang air pollution makaapekto ang dust cement sa mga tao. Ug naay issue sa occupation dili man issue ang mga source of income kay fishing man. Naa pud issue about sa health sa mga bata so kadalasan trabaho pud ang kinahanlan sa tao unsa sa proponent para inyong barangay. Ang PETRA Cement ang proyekto ay diri sa Lower Irasan kahit na siya ay nasa Lower Irasan among na-identify na ang Langatian at Upper bitaw may impact sila sa proyekto bisan bitaw sila ang host barangay kay Lower Irasan man kinahanlan na pud namo ang opinion ang mga boses bitaw ng mga concerned barangay Langatian among i-consider na impact areas. So mao ni siya ako na lang i-summarize bitaw basin sa among mga expertise ano. Among proyekto basid sa among information proponent na PETRA Cement unsay information about sa unsay machine ang ibutang, unsay mga components bitaw sa proyekto magbase kami sa among findings base lang sa unsay among ihatag na information. Dili man magimbento ng information gikan man na sa proponent unya kung naa man kamo information kung lahi man siya sa una pwede naman kamo magraise ano. So among nakit-an ang significant na impact bitaw asa sakto man siya sa proyekto sa panahon. Panahon sa pre-construction man ni siya or sa operation phase man ni siya. Amo ni siya nakit-an ang proyekto in accordance bitaw sa munisipyo bitaw sa Roxas unya kay importanteng importante ang land use ng Roxas. So amo ni siya nakit-an sa construction phase pa lang bag-o pa man kami magsul-ob ang proyekto kinahanlan ang area ay classified as Industrial base sa kung ano man o unsa man ang inyong ibutang didto sa ilang lugar ang kanilang area ay industrial zone mao na ang area sa PETRA na nag-agree, nagcoconform sa land use ng municipality ng Roxas. Kana siya during sa pre-construction palang daan. Unsa man ang among observation sa resulta lagi man kay expansion man siya'y kay ang zoning man niya ay industrial. Unsa may panukala bitaw sa proponent ang kanilang buhaton para dili sila magviolate unsa land use sa area. So naa sila zoning or business permit na issue sa ng municipality ng Roxas. Naa pud kami nakit-an sa yuta possible na masira ang yuta ug sa pagtapon ng basura naa na pud issue na among nakit-an sa perception survey na naay gi-raise ng proper disposal of waste bitaw. (56:25) so among nakit-an ah domestic waste man ni siya also among nakit-an unsay panahon man ni siya asa proyekto. During the construction at operation phase amo na siya na-identify naa possible na makadaot ta sa yuta kung dili ta mayo ayuhun bitaw sa disposal activity o management ng PETRA sa ilang lugar. Unsay ma avoid nila ang mga impact ma-mitigate nila before pa man maka affect ang impact so kami kinahanlan sila po ay tumupad sa RA 9003 solid waste management disposal of 2003. Unsa man ni siya syempre during the construction naa sila segregation of waste, garbage kung ano man

ang makit-an kay construction phase pa man naa sila malata so during construction nag-implement na sila ng RA 9003(57:46) para maayos. Ug unta ang proponent para sa disposal ila man nila i-segregate ang usapan sa disposal ang kinahanlan LGU para sa timing of proper disposal collection sa ila domestic waste. Naa pud nakit-an sa kasiraan sa lupa tungod sa pagtapon na nakakalason na waste o mapanganib bitaw sa environment kani siya akong gisulti dili sila ang PETRA mugamit ng hazardous waste para sa proseso but dili man maggenerate ng hazardous waste tulad ng used oil or kanilang used batteries kanang considered man sila hazardous dili man ni siya exempted basta dili man ni siya mugamit ug hazardous materials para sa pagproseso but sila po ay generator sila po ay mag generate ng hazardous waste amo ni siya na identify during sa construction sa operation hantong sa abandonment sa proyekto. (59:13) kani siya ang resulta ang among obserbasyon na mag generate sila ng mga nakapinsalang basura tulad ng pundidong bumbilya, gamit ng langis, mga kable, lumang baterya at iba pa. kani siya kinahanlan naa tamang proseso para siya ay madispose properly(59:36) unsay buhaton sa PETRA Cement ana so ila ipatupad ang RA 6969 or kanang toxic hazardous waste 1998. Kanang pag ayos bitaw ng mga basura unsa na kinahanlan kung toxic o hazardous man ni siya ug kinahanlan mangita sila ug accredited na holler bitaw para itreat ang kanilang waste hazardous bitaw sa environment. Unsa pa ang among nakita sa land ang area karon ang among nakit-an sa area diha in terms of the project even before pre-construction palang daan, construction at abandonment throughout the phase siya kay prone man ni siya sa daluyong sa pagbaha ug sa pagbagyo kay facing the sea man ni siya. So unsay gihaon sa PETRA daan lagi kanang prone man ni siya kay dagat bitaw makit-an man sa mapa na possible na dili man ta mangadgi kuwan na kay mudaan unsay buhaton man sa proponent kung abot na kay alam naman nila na standing nila kung unsay hazard prone sa area. Ang ila man bitaw ang madamage bitaw ang sa ila property. (1:01:24) sa environment sa water kay hapit man sa creek. Of course, property itself dako man ang investment ug madaot ang kanilang grinding machine kinahanlan maprotektahan nila. Base sa study na gibuhat bitaw sa flood study na kinahanlan ang iyong location kailangan nila na magbackfill sila ng 400 meters para sila ay in the event na magkaron ng tsunami dili maabot ang kanilang planta diri sa creek daan kinahanlan na kanilang proteksyunan para dili magscar o magerode or magguho bitaw adto po sa creek mukado unya magseal man ni siya wala ganon din hindi natin na solusyunan iyong problema naa proteksyon kay naa sila form. Unta sa water naman pud during construction (1:02:42) among nakit-an na possible magoverflow ang tubig ulan dili niya maayo ang pagconstruct posibleng magoverflow ang existing creek so unta PETRA maghingi ng water waste (1:03:13) o magobserve pud sila ng buffer zone among study bitaw amo na siyang gi-submit sa EMB initial review sa mga REVCOM ug sa EMB dili pa man sila satisfied gibuhat na study para ma-improve ang among study para pagandahan pa namo ang among study para sa PETRA nakisulti mi kay ila man ni-recommend

sa PETRA na kinahanlan kuno ang waste water nila or STP kinahanlan ay 25 meters away from the buffer ay from the creek so kinahanlan mag-adjust ang pud ang proponent ana para doon pa lang ma address na sa una para isuggest sa resource person pud sa EMB na kinahanlan it has supposed to be 25 meters away from the creek. Ang PETRA po kay mag-adjust kami sa aming first review (1:04:17) at ug isa pa ang tubig sa creek prior to that between March to June nagconduct kami ng air sampling wala la diri ang pictures ano. Nagconduct kami ug air, water sampling sa tanan though ang aming proyekto nagsugod naman sila sa daan among gi-monitor ang quality sa creek during the construction so nakakuha na kami sa quality. So mapapakita namin kadtong mag-operate na sila puhon next year naa na siya monitoring activity na mahimo kung malaman kung ito ba ay nakaapekto sa kalidad ng tubig ng Talanan Creek habang sila ay nag-ooperate. Naa kami tinatawag na baseline. Kami na baseline kinahanlan na kailangan nila i-monitor na dili sila mag-over sa resulta. Kung magmonitor man sila kapangita na TSR ay TSS sila gyud ang may sala ana sila man ang project na naa diha sa gilid noh. (1:04:48) Usay gawin nila lahat para ma-avoid ano so magbutang sila ug settling pond para i-divert nila ang run off or ang tubig diha sa settling pond. Dili man kita maka-expect na land development bisan na siya ay semento was wasan siya ng ulan kay naa mga suspended solid diha na gamay kaayo gikan sa mga alikabok na nabadong bitaw sa yuta kana siya kadtong mabadong bidaw sa settling pond i-allow siya masettle karon para siya maforce madischarge kami naman pud gamiton namo ang treated dili siya kaayo treated in terms of only physical like iyong suspended so magamit man na sa cleaning, maintenance sa area. So magbutang man sila ug magmonitor sila sa quality ng Talanan Creek. Ang among recommendation ay every quarter ang monitoring nila sa Talanan Creek. (1:05:55) para sa air kanang sa kalidad. Anang sa water quality kanang ang project property atubang man sa dagat so naa na pud kami nakuha ng water quality unsa pud ang quality ng dagat karon during the construction naghimo na kami ug baseline dili na siya monitoring sa una noong 2016 prior to the issuance of the first ECC so ah ang monitoring namo amo na siya monitor every quarter kung makit-an ba ang among proyekto mu-appear sa quality ng tubig ng dagat, though among nakit-an mga isda bitaw na naglabay labay diha wala siya isda nakit-an. Kanang water kanang sa local water source kay ang inyong water source naa christian well naa pud ang local water district naa kami pud sa PETRA ongoing nagrequest sa local water ng Roxas kana siya para sa domestic water na kinahanlan sa among mga empleyado. (1:07:32) Kani siya during the construction phase ug para sa hangin among na-identify ang kalidad bitaw during the construction and operational phase. During the construction ang una possible na magkaron ng alikabok during the back activity ug kanang mga equipments, sa trucks kanang pabalik balik sa site. Among na-identify possible na maka-increase ni siya sa total particulates sa alikabok ug kanang emit bitaw na nitrogen oxide, sulfur and carbon. Naa monoxide na gikan sa equipment. So karon after nila magbacking

ensure pud nila ang pag-ayos sa ilang site na dili pud ni siya makaapekto sa hangin. So ila usahay na kinahanlan jud sila sila ay magsprinkler na magdilig bitaw ng tubig sa yuta atong dili na mabuwal. Ug sa galing sa sasakyan naa na pud sila mga nakaposition na speedometer naa naka-assign bitaw sa parking area among iconsider. Unya kanang during the construction kay kinahanlan jud ug mga equipment. Ug sa operation atong na-identify na magemit sila ug particular matter pinaka-fine matter talaga na gikan sa paggiling bitaw sa semento. (1:09:28) pagoperation phase ilang machine dako na machine na built-in na bag house na mufilter sa abog. During paggiling sa semento sa paghalo nacapture man nila sa bag house para dili siya mag-emit bitaw sa air ere. Efficient na machine siya 95% efficient in fact excess diha magamit pa ng PETRA Cement (1:10:13) para sa kung ano pa man. Ug sa people ang migration o dami ng tao so ang among marecomend dito sa usahay ang proponent mangita ug workers in the area in time possible na silang diri na magpuyo pero basin sa perception survey kadamihan talaga kay nakapangasawa bitaw na taga diri mao kay wala pa siya sa construction kung may panahon mangita nag PETRA ng workers in nearby area possible pud na mudaghan among i-recommend bitaw buhaton sa PETRA kinahanlan gyud ang local hirees ang iprioritize kay first kanang malapit lang sila dito sa site kanang support bitaw sa mga tao. Kanang issues ang concerns during the public consultation and also the result of the perception survey. (1:11:32) kanang trabaho during the construction and operation phase pero mas maayo kung sa operation kay daghan murag mas mag-ask man siya ng panahon na mahire ng employment bitaw as compare sa construction kay may time frame man ang construction 2 years lang ang operation sige lang siya ng sige hanggang naa si PETRA ang employment naa. So among i-recommend na naay qualified na personnel sa local hirees. Una mas mura ang labor rate, malapit lang makasisiguro sila na makakapasok agad sa project site, ug mag-implement pud sila ng social development program atong social development program base sa kung ano resulta bitaw sa consultation ug sa perception survey na among gihatag sa inyo sa una. So base sa perception survey ug sa consultation ang health, alikabok, naa sa employment, naa sa baha, naa sa hazardous waste sa proper disposal of waste. Mao na siya ang mga significant issues sa environment ang nakit-an namo na kinahanlan pagprepare ng social development plan in accordance sa plano sa munisipyo plano sa barangay ug sa kinahanlan sa mga tao. Among nakit-an kay kanang sa livelihood kanang mga babae ug kinsa man ug sin-o man ang mga walang trabaho pwede pud kami mag-raise. kami pud na 100% na sponsor kay mutabang kami sa LGU's, barangay ug sa munisipyo. Mu-assist ang PETRA sa kinahanlan ng munisipyo tulong sa (1:13:40) livelihood kung naa sila sa livestock or sending magprovide na gamay na loan makapagstart sila ng business ana si PETRA na mutabang lang sa ila dili tanan. Ug ang about naman sa issue ng health at discipline naa pud mutabang ang PETRA sa medical mission and feeding program ang PETRA maimplement na siya sa tulong ng programa ng LGU. Kanang about sa social

development plan ana unta na siya sa LGU kay dili man ni mag una una pagconduct ana dili man na paalam man bitaw sa LGU ilang programs. Bisan unsay ilang priority kanang PETRA ada all phase throughout the project during the construction and operation para matabang in terms of conducting medical mission and feeding programs. (1:14:50) naa pud ang education si PETRA ay mutabang sa education materials na mga children dili na mga college mga pre-school lang kay dako man ang kailangan na kolehiyo. Ana lang sa pre-school lang ha ang atong tabangan. Oo naa sila magbutang bitaw ug footbridge bitaw para sa safety na maglabang labang bitaw so tingin ko kinahanlan na para sa safety ng kabataan, ug sa kinahanlan kung naa footbridge ila na pud dili na siya maglabang sa highway ila gyud i-utilize ang gihatag bitaw sa PETRA kanang footbridge ila man ang footbridge ha. (1:15:47) daghan man sila ug semento bakal na lang ato na lang kuhaon para matuloy na iyang footbridge na iyan. Ug isa pang naa naman ang environmental sanitation kaning anay sa perception pa lang may nag-raise bitaw about ang kanila bitaw na drainage kani siya mutabang pud si PETRA sa project in terms of development of proper drainage facility system pado bitaw sa tamang creek kay mudaan man diri bat ilang side naa sila'y proper drainage syempre ang ila concern kay naa kamo issue about drainage kinahanlang mutabang pud sila sa pag-implement ng drainage diha sa ila area. Karon another issue another social development program hinggil sa health and sanitation kani siya sa during the construction phase unsa man ang operation phase kani siguro magwalis walis bitaw basid magpalit sila walis bitaw ug dust pan unsa pa ang sa LGU ana mu-enter si PETRA sa assistance tulong lang unsa kinahanlan atong malinis bitaw ang atong environment diri. Ug sa peace and order magcommit sila ug maghatag sila ug uniporme bitaw (1:17:26) para sa mga tanod naa mga tanod na maglabay labay diha para masecure bitaw para sa peace and order ng area. Kani ang among STP kanang assistance lang mutabang lang ang ila kay ang footbridge bitaw kami lang magsponsor ug naa support si Vice kay naa si request. Ug sa tourism pud si PETRA na mutabang siya unsay kinahanlan sa fiesta, sa Miss Earth man ni siya, ah daghan man ta ug feast sa barangay kay daghan kaayo so naa si PETRA musuporta sa unsa inyong barangay kung sa Upper man ni siya o Lower o Langatian yan atong ensure mutabang man ni sila sa inyo. (1:18:30) ug sa spiritual naa kamo church bitaw before kami magenter inensure si PETRA na marelocate ang small church dito sa atubang na gamay lang noh ibig sabihin na makaDiyos din ang PETRA na sisiguruhin na kung unsa ang naa diha ato siya irelocate. So bago kami pumasok narelocate na ang church na existing pa din daan kadto church didto diha sa area. Ug naa pud kami gipreparer for STP about sa disaster awareness so unang una kinahanlan na disaster asa kita makabalo na asa ang earthquake, ang daluyob kinahanlan sila na may with coordination with LGU mutawag sila sa unsay disaster preparedness plan ng iprepare daw sa proponent in terms of property evacuation asa ang evacuation area. Unsay atong mga signs ug signals makabalo ta na naa disaster bitaw mutawag sa PETRA sa pagprepare

sa community in terms of disaster preparedness para kita gyud wala casualty unahin sa bagyo, mga lindol, baha so kinahanlan pud ang proper coordination sa community ug mao man to ang among giprepare base sa unsa gyud ang among na-identify na significant na pinakadelikado dili man ni delikado pinakamaayo unta sa environment tungkol sa yuta, sa bayan, sa tubig, sa hangin ug sa tao. Kung ata tanan na-address ang issue bitaw sa public consultation unsa man sa public consultation ang may issue kanang about hazardous waste so kami sa PETRA wala sila gamiton na hazardous waste pero possible silang mag generate sila ng hazardous waste (1:20:30) pero hindi sila makaapekto sa environment kung dili nila ayuson ang kanilang management plan. So ganiha unsa man ang kanila himuun na gisulti sila gyud ang magimplement ng RA 6969. Ug unsa man ang issue about sa farming sa industrial wala man farming diri asa man kay sa inyo man kani siya kay industrial zone so na-address man ni PETRA ang issues about sa farming so I mean na-address naman. So about chemicals like I said walang chemicals except dahil sila ay mupalit sila ug semento. Ug kanang quality bitaw sa air during the operation akong gisulti na naa sila bag house na magfilter ug hangin na magpoprotect mao ni siya na tawag namin na air pollution control device. Ug unsa pa about employment ug other livelihoods kanang ah ginahatag na-address man tanan ang issues na na-raise sa public consultation ug sa IEC unless naa nalimtan na wala sa address. So mao na naa ta diri to further consider your issues and concerns na pwede namo madagdag sa amo study kay naa pa man siya sa pagprocess ipa-revise pa man ni siya sa among gibuhay sa among mga expertise ang mga Revcom. So siguro tao lang so ang among pinaka na identify sa impact bitaw sa project sa pag-increase ng capacity parehas din naman siya doon sa unang ECC na-issue na machine lang ang napalitan so kana siya mao na to maraming salamat bisan na ininstik akong bisaya salamat kaayo maayong ugo na ba? Salamat. (1:22:47)

Joel Caballero (Petra Cement, Inc.): Okay so proceed na po tayo sa open forum po natin. Rules lang po para sa open forum ah lahat po ng questions ninyo based po doon sa presentation ng ating proponent at kanilang preparer at the same time ah ililimit lang po natin iyong questions natin doon sa pinakapresentation po nila. Ngayon ah pagkamagtatanong po kayo magtaas lang po kayo ng kamay tatawagin po namin kayo, magpakilala po kayo and then state po ninyo kung anong organization nan ire-represent ninyo. Ah tapos po sabihin niyo po kung kanino po ninyo ina-address ang inyong tanong. (1:23:36) ngayon I believe it's lunch time na po stay lang po kayo ng konti idi-distribute po ang inyong mga pagkain sa inyong mga upuan para working lunch po ang mangyayari sa open forum po natin. At the same time nagpaparticipate na din po kayo nakakain na din po kayo. So ah sige po start na po tayo sa open forum po natin magtaas lang po ng kamay and we will give you the mic po. (1:24:05) yes sir.

Nestor Bastasa: Maraming salamat, ako mga opisyaless diri. Sir, konsehal, ang atong Vice Mayor, ah kapitan ug sa mga opisyaless sa PETRA Cement. Ah

dako kaayo pasalamat sa ninyo, daghan ang (audio inaudible) pero duha ang kalipay di masabot nabunto ta, bitaw. Ang among mga anak, among mga igsoon, dayo may tungod gihatag ninyo ang tanan maimbitaha kita oh sorry mam. Mam basi ug pasali na mi uman katapusan na dalawa. Kanang ipadayag naa sila gas protector? Kabalo ka sa kong kahimtan na muagi nato habagat ug kanang bitaw (audio inaudible) dili pud kay duwa man ang atong ipausa kadtong bago pa diha. Pero ang tanaway sa dagat ila pud tanaway giaigiha sa dagat sa habagat. Mao na basi unya magmahay ta kay dako atong kalipay kay gwapo pa (audio inaudible) pero magtiklop ta kay I love you very much. Di lang sila in heart. Kami ako us sa chairman barangay Lower Irasan ato si Nestor Basbasa magpuyo sa Lower Irasan pasi. Ako dako kalipay na inistorya sa Lower Irasan na gitawag na Industrial zone na pwede magtuol ang among basin kay (audio inaudible) kay dako man ang area ma'am Vice. (ahaha) oo ito na lang ang atong bag sa iyo maka-kuwan ba kamo na makahatag na assurance na dili man kamo ang among panuwa kay tungod kay madaot sa mga chemical? (1:28:46)

Engr. Venice Montemayor (CEnSE): Salamat kaayo sir sa iyong issue no salamat ug na-appreciate namo ang issue kay na-understand ninyo tanan ang proyekto kasi importante sa amin na maintindihan talaga ninyo kung ano ba talaga ang ilalagay na proyekto ng PETRA Cement. Basi naman sa issue ni barangay hepe ng Lower Irasan ngaun ang kanyang issue so ibig sabihin sobrang naintindihan niya ang aming proyekto. So regarding doon sa issue niya about sa waste ng chemical doon sa dagat. Una, ang among project walang gamit na chemicals so kay dry process man ni siya ug possible ang mga suspended solids na alikabok bitaw na andun sa area kami naa kami ibutang na settling pond kung ano man whatever waste man na siya magrevise ang among plano na it has to be 25 meters away from the creek pala. Creek palang kung 25 meters palang siya amo na siya ipadungod sa dagat o naa monitoring activity na kuhaon ang kumpanya para sa kalidad sa tubig sa dagat kay naa na quality na makuha sa dagat to ensure na dili kami makaapekto sa proseso ng aming planta sa usa man karon ah quality bitaw sa dagat ug ako isasabot bitaw si Engr Cruz bitaw sa pagsagot sa imong concern tay ha. (1:30:41)

Engr. Gil Cruz:

Mga kaigsoon ana. Adunay usa ka planta na parehas sa PETRA now mas nauna ug dagat noh depende sa facebook ba o sa youtube. Aduna na planta na big boss cement na nasa Porac, Pampanga ang tinuod mas nauna patukod paspas gyud ang approval so nauna siya na kabulan sa dagat so karon muli akong magsabe sa inyo walay semento o planta na parehas sa Porac sa buong kalibutan. (1:31:36) okay kanina gireport naa ang issue ninyo bisan unsa nga bato mahimo ug semento pinaagi na ug prosesoha. Now, pero naa pa gihapon magorganize kamo usa katuig dungaw didto sa Porac, Pampanga naa bitaw ug Big Boss Cement noh. Ilugan sa Luzon kay wala man aso so wa gyud aso kung aso man siya ug kinahanlan ang dust collector. Nano man ang aso adto sa Cebu magluto man to sila

so kanang pagluto mao na ang abuga oo dinhi pagandar ana wala ang kuwan padagan sa planta, so kami man kay nangadto kay tungod kay walay sa kalibutan na parehas ana. So nauna man ang Pampanga dako man ang kanilang planta sa semento noh ug karon magkaron kita sa Irasan so duha na gayon. (1:33:18) katalo magkakaran sa Tarlac dahil nagsugod kami sa Bauan, Batangas noh ngayon naa pud kami sa Sydney, Australia naa pud sa America. Karon ang atong proseso sa buong kalibutan kay walang laing na planta ug sa buong kalibutan ug semento gikan sa baras o bato. Naa na kamo diha? So pasayluha na (audio inaudible) so una ang among imbensyon. Ang among imbensyon sa laboratory man na karon naggawas mayroon na talagang effect ay wala na mao na pasiluha namo kay among nakit-an kay mangita kita ug sa Indonesia, China gipangita namo kung sino ang paimbento ug semento na walay gamit na filter so ako ni gihatag sa atong probinsya na una sa buong Mindanao sa Pilipinas ikaduha ta sa buong kalibutan na dulay semento na wala mugamit na clinker o magsunog sunog sato minsing minsing lang noh. So daghan salamat sa Diyos kay naabot kita ug daghang salamat sa inyong suporta. (audience clapping) (1:34:58)

Nestor Bastasa: sorry kaayo wa man ta (audio inaudible) problema man na. Maayong (audio inaudible) ang atong nakanag diha sa among kay sa PETRA Cement sa unang panahon baha tanan sa giadto na sa January safe gyud sila diri karon dapita panahon na kami na napuhon diha sa tinugay na among istorya madami pang akong tanong (audio inaudible) naa namo na corporation ba diha ug naa kamo na sa ngani (audio inaudible) naa pud ang istorya ni ma'am ganiha mahimo ang planta cement how about ang among kinabuhi namo unsa ang amo pala istorya. (1:37:12)

Hon. Capt. Narzabal (Brgy. Lower Irasan): Daghang salamat sa iyo pangutana noh. So masabtan na aduna guy kalamidad na matabo na maligayan, muraog nakabuhi na sunod sunod noh usa pa dusa usa pa kanina gisulta namo sa issue ano. Naa na duna kami na dili nami gikuha ang konsultasyon na gikan sa Manila usa pa sa gipangayo sa una para makuha ug permiso unsa sa paghimo sa atong canal unsa ang ato pagcontrol sa ato kasubanan so usa ka to ang atong problema unsa pa wala usa sa kondisyon na dili lagdan ang iyang na natural na daloy sa suba. So, usa diha ang among giprotektahan ang suba karon ang among gisuba ang unsay tawag diri ang daloy sa suba. Giaana sa usa pa bisan wala pa magbaha man gyud sadto pa kanang pikasa sa daan sila ang papaasa diha silang asa man sila mudaan asa man sila didto (audio inaudible) ang atong mga suba na ayuun ang atong pagbantay. Usa pa naa programa ang DENR na adopt na estero usap usapan na among gipasuporta na atong unsa mahimo sa atong kasubaan. (1:39:40)

Engr. Gilbert Cruz (Petra Cement, Inc.): Unsa man ang pagkahuman sa PETRA tungod kay na agiha ng video ug app mao na sa site development diha pud na katuig na gibaha kusog kaayo na nakagasto man kami ug 14 million sa site development nibaha so wala gyud usap nahimo man

ang PAG-ASA, DENR lingod sila na walay baha ni 100 years naa ang DENR imagine wala mangutana so murag kuwan so nag-abot (audio inaudible) kay ingon sa DENR dili muabot ang suba. So tubag na original na fight gyud kami kay among gipa lipon ang among sa amuha matumba so okay. So ikaduha ni una usog so ikaduha na ang among site development ang inyong gibuhay gi-maintain namo ang original na suba noh dahil gidungana na mon a suba sa tunga mula hud sa dagat. So simula nagulan ulan kanang baha so ang among silbi ka ta so kung mubaha diha murag lisod na po siguro kung naay pangali ug kusinero usa sa diha sa manila namatay ang akong papa bata pa ko 16 anyos didto ko nagtrabaho muro man siya kesa mamroblema siya tabangan na ko bisan na mamroblema siya daghan salamat. (1:42:17)

Hon. Pat. Narzabal (Brgy. Lower Irasan): Isa pa kung pamilyar pud sa makita nimo kay putol kay damo na putol so ang mine amo ni siya gisumpay mail tanan mutipok kanan sa tanan. (audio inaudible) musuba diri sa likod so kadto siya nakita sa plano dayon muapaw ang tubig karon kanang dako ang suba sa pikas. So makit-an ninyo kung pamilyar ka sa lugar. Mura namo muhimo (1:43:03)

Joel Caballero (Petra Cement, Inc.): Okay po ang audio? Hello mic okay na mic natin. Paensiya na po ha may technical difficulty lang po. Anyway, next question po sino pa po gustong magtanong? (1:43:30)

Diosdado Junnaog: Maayong ugtu sa inyo tanan noh. Ako si Diosdado sa Langatian. Kami (audio inaudible) so kung pero dili pa layo. Salamat.

Engr. Gil Cruz: Kanang nakasabot ko musagot ko on behalf of the speaker na unsa kay naa siya abo noh. Muna kana pasalamat na ko sa atong local na DENR ng local naa sila sa inyong likuran na sila ang magbigay ng regulasyon na kung naan a abog na mahimo sa among planta ana sila sa inyong magsuporta na uy murag naa kamo abog so wala na sila masabot murag naa kanyang local.

Manuel Berberio (PEMU Zamboanga del Norte): Okay maayong ugtu sa inyo. Ako sa provincial environment ng Zamboanga na si Manuel ang atong problema karon sir nagkaron aso bitaw ang Vic Lao nitawag ang local ug among gi-adto atong tungod na gikan didto sa planta. Ini siyang planta kay cement man sila wala sila gihatad na chemicals pero naa silay settling pond or naa STP kay makagawas ang tubig didto sa dagat or sa creek naa sila facility. Naa na kay among trabaho na gikolekta ug tubig ulan. Bisin wala na siya gahimo naa pa din kwenta kay naa sila station sa coastal from Roxas Station number 1, station number 2 didto nila, station number 3 namo didto sa Manukan ang didto givalue didto sa pantalan, ang station number 5 didto sa bukan ang station number 6 namo didto sa iskayan. (audio inaudible) among ischedule every quarter amo na tulo sa katuig amo nang itest. So nagsugod na kami from January to December ang atong istorya kay kaayo. Ayaw namo mamroblema sa DENR (audio inaudible) 14% taxes diha sa inyong barangay 40% asa man dako planta kung naa na qualified na tao mga igsoon na makatrabaho sa PETRA Cement.

(1:48:37) dili natin siya icompare sa Holcim na naa raw materials kadtong mugamit sila na pyrex mugamit sila ug (audio inaudible) wala kaayo makita ninyo high tech na karon walay abo bisan mangayo sila ug raw materials bisan ug walang problema sa aso sa DENR monitor ug waste. Thank you and maayong ugto (1:49:33) (audio clapping)

Engr. Gilbert Cruz: Karon kay among na-experience na sa planta na sa PETRA Cement 6 days a week kami magtrabaho naa kabuhay sa adlaw. Pag adlaw kay pahuway unya ug 30,000 pesos ang gas collector bag kay paingon man ni siya na para Sabado mangita kita kay gamay kaayo pero dili kita makakita ug aso. Pero gastuhan nila na walay abo para walang reklamo. Okay sa ako na pong ibigay sa provincial kay (audio inaudible) sa planta so okay. Explain man na sa dust collector bag kay mahal man na siya. Kay mahal man ang dust collector ma assure na siya okay daghang salamat. (1:51:14)

Brgy. Kagawad Lower Irasan: Okay ako pangutana sa malipay ko sa development usa na barangay official sa Lower Irasan ila proteksyon na sa barangay roads semento man diri kay aksyunan man namo diri. (audio inaudible)

Joel Caballero (Petra Cement, Inc.): Okay thank you sir okay na po ba iyon? Wala na okay na?

Engr. Gilbert Cruz (Petra Cement, Inc.): ako po gisaan na semento sa gitawag na Corporate Social Responsibility ano. Gawa kamo request dalhin dun sa barangay captain munisipyo diba so sa lahat ng pagkaisturya na semento na kalsada sa Roxas. Maayong salamat.

Audience from Pasil: Ako lang pangutana sa sinabi na sir kanina nagsurvey daw sila sa house to house eh tanong ko lang po kasi hindi kami nasurvey pero okay sa amin na may proyekto na PETRA Cement. Ang itatanong ko lang sabi niya nasurvey hindi naman kami nasurvey sa bahay lang kami. Baka pineke naman ang survey lang.

Engr. Gilbert Cruz (Petra Cement, Inc.): oh sagutin mo iyan consultant.

Engr. Gilbert Cruz (Petra Cement, Inc.): daghang salamat ako po nagpagawa ng survey gi-ingon pud namo na makuha na kami opinion ukol sa planta usa sa pud sa concern na ginawa halos lahat among gipasiguro na sila pud ang mangayo sa planta so pasensya na kay dili kamo. Saan man kamo hapit?

Audience from Pasil: diri na sir sa Pasil

Joel Caballero (Petra Cement, Inc.): Daghan salamat ma'am naa na pud kay dili nadistribute (audio inaudible) dili dapit so palihug na lang ang inyong concern about sa planta

Audience from Pasil: Okay naman pud sir pero ika nimo na naghouse to house sa among area.

Joel Caballero (Petra Cement, Inc.): okay po

Engr. Venice Montemayor (CEnSE): Sige lang ma'am kay among idocument maigi kay nakadungog sila iyang about sa creek. Among gi-open na sa PETRA amo na siya officially ibutang sa social development program para official naa namo ibitaw icommit na kami sir na concreting ng road ug semento. 100%?

Engr. Gilbert Cruz (Petra Cement, Inc.): I don't need to commit sabi ko nga maghingi sila ug 101% sabi ko nga ang PETRA 1,000 bags na pwede icommit kada bulan through channel mga 2 million pesos din iyon so kailangan (audio audible) sa probinsya pero sa mayor mainvolve unsa mga vice mayor andiyan ang mga ahensya (audio inaudible) pangayo ug semento ana siya pero nakabudget man na siya for the corporate social responsibility noh naa nako tao na incharge diha. Daghang salamat (1:57:38)

Joel Caballero (Petra Cement, Inc.): Any other concerns po hindi pa po nababanggit?

Serena Cabrera (CENCRO Manukan): For me sandali lang po ha. Ah hello po ako sa CENRO Manukan pero kung rage coverage namo ah District 2 from Dipolog na siya. Naa na ko ipangutana kay Sir Cruz murag very drastic kaayo na increase sa atoang metric tons from 50 metric tons per year nahimo na siya ug 1.2 metric tons per year? Ako lang pangutana na kung ang ilan capacity sa planta na kayanin baa ng 1.2 metric tons per year na akong nakabalhan na paglisod na ko sa CENRO sa DENR na-assign na ko sa makihatag kami ug area clearance sa PETRA bitaw sa 17 kadto sa 50 palang na metric tons per year so ani karon naghimo na kamo ug public hearing because of the increase doon sa adugang production so naghimo na siya ug 1.2 million so very alarming pero I hope na mapasagot natin ung kaya ba sa carrying capacity ng planta kining 1.2 metric tons per year. (1:59:30)

Engr. Gilbert Cruz (Petra Cement, Inc.): Usa sa nangayo kami ug increase noh from small ECC tungod kay agi namo programa sa gobyerno na karon kaning 2017 ang requirement sa buong Pilipinas ay 25 million metric tons ngayon ang nakalisensya sa Pilipinas ay 18 ang 7 million ini-import karon sa isa sa 28 karon 30 naghatag ug projection ang DTI ug hapit na may 20-22 na 40 million metric tons ang requirement so diha namo gibase ang among plano, ang among una planta nakapalit na ang among plantaha daghan na metric tons among gipuli na 1.2 metric tons per year. So sato pa 4 million bags per year so among gisulti ang among requirements sa regional 2.6 million kung 1 million kami kulang pa gihapon. Kulang pa sa legal gikan sa Cebu kay sa Apo ug sa Holcim kanang 1 million бага kulang man na siya (2:01:29) diri asa atong lugar upon maayo man ni siya ug investment 1 million bags ug sa hinoog ah (audio inaudible) masukot ang DENR sa Porac nagsulod kami bitaw 1.2 million bags ngaun karon digaan kami na 40 tons so mahimo na 1.8 million bags so dugay na kami na tulo na planta na mahimo kami na 1.2 million bags per year nano man kay luuy na maghatag kami ug semento pwede na (audio inaudible) makita ninyo na naa kamo trucks kay wala kami semento kay dako man ang amo kay walang semento mahal gud ang semento kung

mag-import ang China, Vietnam dili man sila mubalig ug semento so kani ang among pagulingon kay naa man semento. Unsa may maayong balita samo sa Porac walang planta ang Pampanga ang ilang semento (2:02:11) 200-240 per bag pag agi diri sa PETRA Cement ang pinakamahal na semento sa Pampanga 180 pesos. Dili niyo ba ana? So Roxas naa na so kung naa ka kwarta so magipon taka basta magpalit ug cash hala sige palit ug semento para sa mga contractor para sa tanan. Maraming salamat.

Joel Caballero (Petra Cement, Inc.): Okay wala na bang magtatanong?

Riza J. Aljas (Womens Organization): Maayong ugto sa inyong tanan noh. Riza from Womens Organization dito sa Lower Irasan. Itatanong ko lang po kasi mukhang malapit na po matapos ang ating programa. Tatanon lahat po kasi dito ng mga ano ninyo ay iyong EIA ano po ba ang ibig sabihin noon? Kasi po hindi po namin nakita kung ano ang ibig sabihin ng EIA

Joel Caballero (Petra Cement, Inc.): Ako na lang po. Ang EIA po ang ibig pong sabihin niyan ay Environmental Impact Assessment okay na po. Okay malinaw na po? Okay. Any other concerns po? Kung wala na po summarize lang po natin ang mga issues and concerns dito po sa public hearing na ito. Ah una na po nabanggit kanina tungkol sa agam-agam tungkol sa polusyon sa hangin sa alikabok nariyan din po ang issue na nai-raise po sa walang magiging evaluation sa tubig dagat, at nariyan po iyong concern tungkol sa mga posibleng epekto sa pagdating ng mga kalamidad, nariyan din po iyong ukol sa integrity ng ukol sa perception survey, at iyong concerns sa magiging corporate responsibility ng proponent para sa proyektong ito, na-raise din po iyong about sa productin capacity na kumpanya sa carrying capacity ng area, so iyon po iyong mga issues na nai-raise po sa public hearing na ito ah hindi pa naman po dito natatapos iyong mga concerns po ninyo magkakaran pa po tayo na case handler na si Engr. Arida ngayon sa bahaging ito ah bilang officiating officer nagpapasalamat po ako sa inyong participation sa inyo pong pagpunta po sa public hearing na ito. Asahan niyo po na ang lahat ng information na nakuha namin sa inyo magagamit namin sa aming ahensya para makapagpasya ng mahusay sa paggawa sa pagkaron ng desisyon kung mag-iissue kami ng ECC o hindi at kung ano man ang kondisyon na aming i-attach sa ECC kung ma-issue man ito. Ibibigay ko na po iyong floor kay Engr. Arida forward po natin ang mga next steps po ng process na ito. Marami pong salamat po.

Engr. Carlo Arida (EMB-Central): maraming salamat tulad po ng sinabi po namin kanina idocument po namin ito once po na masubmit po sa amin ang documentation sa public hearing saka po iyong EIA report po nila ipopost po namin sa website namin. Paki-enlarge bali ito po iyong website namin www.eia.emb.gov.ph pwede niyo po siyang i-download sa Division Head po namin andoon po ang mga contact numbers. Kung mayroon po kayong gustong ipahabol sulatan na lang po ninyo kami. So paki-enlarge so dito po natatapos ang public hearing po natin. Maraming marami salamat po sa pagstay po hanggang sa

matapos ang public hearing po natin. So maraming maraming salamat po, magandang tanghali po. (2:07:00)

Joel Caballero (Petra Cement, Inc.): Maayong buntag sa atong istoryahon ang unsa man ang atong Administrator si Digal.

Marcel Digal (LGU-Administrator): Asa naman ang uban, gamay nalang ang nabilin... Si Vice Mayor sa DENR ang boses PETRA Gilbert sa atong Barangay Kapitan dili na lang kay naa naman baha diri. Baha kung naay baha dili kita muagi sa PETRA dili man siya sa PETRA kung naa man baha diri dili sa ila kay naa man magputol ng kahoy mao man dako sa suba responsible kay bisan maglabay ng (audio inaudible) basa kaayo ang muagi sa kalsada hinihingi gyud na semento (audio inaudible) kay dili man madaot ang atong environment kay masuko si mayor kay (audio inaudible) so magtapo kita sa duga duga so sanayan na mao gihapon na tulo katuig. So another pair na mapangayo kay konsehal naman ni. Ginagmay na mahinumdom sa atong mga officials diri na lang kamo sa Roxas diri magsilbi (audio inaudible) ang atong atmosphere diri sa Roxas karon mayor akong naway gisulta dako na ko kalipay kay musulod ang PETRA Cement rest assured na walay kadaot sa atong barangay ang atong barangay diri mapulahan kay niha diri ang PETRA Cement na akong gisulti. Daghang salamat. (audience clapping) (2:11:21)

Joel Caballero (Petra Cement, Inc.): Muli daghang salamat sa inyong pagtambong sa atong ginawa na public hearing ng PETRA Cement. Rest assured na makuha ang inyong mga concerns. Maraming salamat maayong ugo sa inyo tanan, (2:11:45)

Atty. John Ang – Hearing Officer, EMB Central

ISSUES RAISED BY THE AUDIENCE:

1. Air pollution by Diosdado Junnaog – Cooperative Chairman, Barangay Langatian
2. Concern about the sea by Nestor Bastasa- Fisherfolk Chairman Lower Irasan
3. Possible effect of calamities by Hon. Narzabal, Brgy. Chairman Lower Irasan
4. Integrity of the Perception Survey by Girl from Pasil
5. Corporate Social Responsibility of the proponent for this project by Kagawa Lower Irasan
6. Production capacity of the company and their carrying capacity by Serena Cabrera, CENRO Manukan.

Project Fact Sheet		
Aspect	Existing	Proposed Changes (if any)
Nature of Project	2.1.6C Mineral Processing Project: Non-metallic mineral processing plants like cement, other cement products, clinker, limestone, ceramic industries, manufacture of glass and glass products, manufacture and processing of calcium (Cement Grinding Plant)	Same as existing
Annual Production Capacity	Less than 50,000 MT/year	1,200,000 MT/yr
Total Land Area	52,727 square meters; TCT 127-2018000058	Same as existing

Background sa Proyekto at Lokasyon

- Ang Department of Environment and Natural Resources - Environmental Management Bureau Region 9 (DENR-EMB R9) ay naglabas ng Environmental Compliance Certificate (ECC) na may certificate number ECC-R09-1606-0008 sa proponent noong Hunyo 7, 2016 para sa mas mababa sa 50,000 Metric Tons kada taon.

Sa kadahilanang ang aming kumpanya, Petra Cement, Inc. ay umaasam na magiging Malaki ang pangangailang ng semento sa Mindanao area kaya kami ay naririto upang ipahayag muli ang aming layunin na mag taas ng kapasidad hanggang 1,200,000 Metric Tons kada taon.

- Sa kasalukuyan, ang proyekto ay nasa pagdedevelop palang ng lupa tulad ng pag angat or pag dagdag ng lupa or filling materials upang, paglagay ng barracks para pa mga construction workers, pag lagay or pagsasa-ayos ng drainage system at pag lagay ng proteksyon sa Tanalan Creek or ang canal sa tabi ng property tulad ng rip-rapping works or lalagay ng mga bato sa gilid upang ito ay hindi gumuho
- Sa ngayon hindi pa nagsisimula ang actual ng operasyon na pag giling ng semento.

Project Description

Pangunahing Bahagi

- Ang mga bahagi proyekto ay magkakaroon Clinker Grinding machines na may kapasidad na 240 Metric Tons per hour, Warehouses para sa maayos na imbakan ng mga clinker, limestone at gypsum, cement silos, bagging machines, generator set at dust collector.

***Clinker – ay isang uri ng materyak na kung saan ito ay lutong semento kung saan tanging ang pag giling at paghalo nalang ng limestone at gypsum ang idadagdag para ito ay maging ganap na semento.*

Ang source po naming nito ay imported or sa labas ng bansa, tanging ang limestone at gypsum lamang ang manggagaling sa legal source na may mga kauukulang permits.

Project Description

Bahagi ng Pasilidad at Kagamitan Pangangailangan

- Para sa mga kaukulang bahagi ng pasilidad ng proyekto, ay Admin Office, Clinid, Canteen at Quarters
- Drainage System para umayos ang pagdaloy ng tubig ulan papunta sa pinakamalapit na creek
- Water Supply System para sa pangangailangan ng mga tao at manggagawa na magmumula sa Lokal ng Water Supply or ang Roxas Water District

Bahagi ng Pasilidad Para sa Pagpigil ng Polusyon

- Cooling Tower na Close-Loop para sa pagpapanatili ng tamang temperature ng Grinding Machine
- Solid Waste Management Facility – MRF para sa tamang pagsasalin-salin ng basura na naayon sa RA 9003 or Ecological Solid Waste Management Act of 2000. Basura mula sa domestic na gamit.
- Toxic and Hazardous Waste Management Facility – Para sa tamang pag hiway ng mga basura tulad basag ng bumbilya, mga gamit ng langis, sirang bateriya, mga sirang gamit mula sa computer at electrical na bagay
- Settling pond – Para sa pag iipon ng tubig galing sa ulan
- Baghouse – Para sa pagpigil ng paglabas ng alikabok habang naghahalo at naggiling ng semento

Project Description

Alternatives:

Sitail ngar : Ang lokasyon ay naangkop sa land use ng Munisipalidad ng Roxas lalo na nag lrasan bilang ito ay isang Industrial Zone at ito ay napagkalooban na ng kaukulang permiso mula sa DENR-EMB para san 50,000 Metric Tons kada taon at Municipyo. Ang lupa ay isang pribado at pag aari ng Petra Cement, Inc. Malayo sa mga kabahayan at walang lupang o mga pananim na sinasaka.

Teknolohiya : Ang proseso ay ang tinatawag na pag giling at paghalo ng limestone at gypsum lamang, hindi ito kailang lutuin para makagawa ng isang ganap ng semento. Dahil dito maliwasan ang matinding paglabas ng usok mula sa nakasanayang pag gawa ng semento.

Ang proseso ay sa pamamagitan ng paggamit ng Compact machine na kasama na ang paggiling at mga kaukulang dust collector sa pamamagitan ng bag house.

Public Consultation at Perception Survey

Result naganap nuong September 14, 2016 at March 9, 2017
At Perception Survey noong March 12-16, 2018 at April 25-25, 2018
Total of 243 Naginterview (188 sa Brgy. Lower Irasan, 5 sa Upper Irasan at 50 sa Langatian)

CONCERN	RESPONSE	REMARKS
Environmental impact from a perceived 1st Cement Process	LGU/Municipality of Roxas	Full manufacturing process requires mining of raw materials, that is why cement manufacturers set their plants close to the mountains where the raw materials are available. Raw Materials are then proceeded to the kiln to produce clinker on which the temperature goes up to 1800 degrees which releases CO2 to the environment. Large quantity of fuel is required to achieve such temperature. This environmentally Hazardous process will not be included in Petra Cement process scope since we will be importing clinker from southeast Asian suppliers.
Farming to industrial Zone	ZfifePa	Petra Cement is strategically located the agro-industrial Corridor of Zamboanga del Norte. The Municipality of Roxas is the of the provincial Agro-Industrial Center (PAIC), in Barangay Roxas, will become the Industrial Center of the whole province of Zamboanga del Norte in the coming years. The PAIC, which is the initial site of the development for the Agro-industrial growth, has an existing open area of 44 hectares suitable for light to medium industries. At present, the major industry operating in the municipality is the Private Oil Mills-POMS Ventures Corporation formerly Southern Islands Oil Mill (SIOM), Suanit, DICOMI (Dipping Coconut Oil Mill).
Will Petra use Hazardous Chemicals that will Pollute the local waters	PHCAP	The current cement mill plant does not approach the creek/river and nor utilizes the creek/river water. It does not also discharge wastewater into the creek/river directly, instead, a multi-chamber septic tank is being utilized. Therefore, the plant did not significantly induce any change in drainage morphology, stream volumetric flow nor contribute to situation that will possibly change the depth of the river. The proposed expansion project therefore will not give significant negative effect to the creek/river base from the effect of the current cement mill plant to the creek/river. The Cement mill process technology used in Petra Cement is considered dry process, therefore no water is being used in the grinding mill that will affect the waterway systems.
Quality of Air	LGU/ZfifePa	Raw Materials are ground to a fine powder in horizontal and vertical mills. The fine material pass straight through the mill and coarser material may be separated from the ground product and returned to the mill for further grinding (closed-circuit grinding). Sometimes a small amount of a grinding aid is added to the feed material. Finished cement is pumped pneumatically to storage silos from which it is drawn for packing in paper bags or for dispatch in bulk containers. A compulsory sophisticated bag-filter system is in place to prevent dust emissions.
Local Hiring of Residents	LGU/Barangay Lower Irasan	During the construction of the Petra Cement Plant, there will be at least 100 construction workers that will be visiting the site for 12 months until the project is completed. After construction, additional personnel will be hired and will be mostly coming from the host barangay and/or nearby barangays. During the operation of the current plant, Petra Cement along with LGU will provide training to enhance the skills and empower the residents. On the other hand, due to increased revenue of the barangay from the tax payment from the cement mill plant, more projects may be implemented that will improve the lifestyle of the people.

PERCEPTION SURVEY RESULTS - ISSUES **ISSUES FROM LOWER IRASAN/UPPER IRASAN AND LANGATIAN**

- Employment (Gusto namong makatrabaho sa planta sa semento)
- I am hoping to apply (Hope makaapply mi)
- Ensure project will not affect the health of the people (Maayo naman piro dili ba makadaut hantod sa tawo)
- They want the project for the children to continue to increase their economic value (Ipadayon jud ang proyekto para mga kabataan mo asenso ang among barangay)
- I hope that people will not be affected by the project (Nga unta nga dili rata ma apiktuhan sa ilahang proyekto)
- I hope that it will not give big impact due to cement dust (Hinaot unta nga dili maghatag ug dakong kadaot ilabi na ang abog)
- It is not okay since our occupation is at stake since the only main source of living is fishing (Dili maayo kay makadaot sa panginabuh: makasamol sa kalisod, kay walay laing gisalingan dagat.
- It is okay for me just make sure that the health of the people will not be affected during the operation of the plant. (Maayo unta nga dili makadaot sa katawhan kung magoperate na ang planta)
- I hope that it will not affect the health especially the children. (Dili unta makaapekto sa katawhan ilabi na sa mga bata)
- Thankful because I have a project. (Nagpasalamat mig dako. Natagaan mi ng proyekto)
- Thankful for the project (Pasalamat sa proyekto)
- I'm afraid once the project operates it will affect our living in Pasil. (Manghinaot ko nga inig operate sa planta dili sa maapektuhan ang among pamuyo din sa Pasil)
- Ensure permanent jobs (ayudan ug nay permanenteng trabaho)
- Please proper disposal of the project (ayuha ang pagdispose sa proyekto)
- It will increase and help the revenue of the barangay (makatabang gyud sa among barangay)
- It is a good idea for the benefit of the people within the barangay. (makinabang gyud ang tawo dili sa among barangay)
- Concrete barangay roads (sementuha ang among dalan sa among barangay)
- Just make sure that it will be good and beneficial to each and every resident of the barangay (Unta ang maong proyekto makatabang ng dunay maayong efekto sa namuyo sa palibot)
- Properly constructed (ayuha ang pagconstruct)
- We are hoping for bigger and better project for our people in the barangay.
- Improve the drainage system (ayuha gyud ang among drainage)

Buod ng mga Resulta, Epekto at Mga panukala			
Impacts (Epekto)	Project Phases (Panahon ng Proyekto)	Results at Obserbasyon	Mga Panukala sa Kaayusan
LAND			
Land Use and Classification (Epekto sa kasalukuyang Uri at Gamit ng Lupa)	Pre-Construction	Ang proyekto ay naayon sa Zoning Ordinance ng Munisipalidad ng Roxas bilang cya ay isang Industrial Zone	Nakakuha na ng Zoning at Business Permit at kumpanya
Kasiraan kapaligiran or lupa dulot ng maling pagtapon ng basura	Buong Antas ng Proyekto Constraskyon, Operasyon at Pag abandona	Epekto gawa ng pag generate o pagdagdag ng mga basura mula sa mga empleyado	Ipatupad ang RA 9003 o Ecological Solid Waste Management Act of 2000 sa pamamagitan ng tamang pagsasaayos ng basura at pag tupad ng Material Recovery Facility at ang tamang koordinasyon sa local na pamahalan para sa paghahakot
Kasiraan kapaligiran or lupa dulot ng maling pagtapon ng nakalalason at mga panganib na mga basura	Buong Antas ng Proyekto Constraskyon, Operasyon at Pag abandona	Ang pag generate or pag tapon ng mga mapinsalang basura gaya ng pundidong bumbilya, gamit ng langis, mga kable, lumang baterya at iba pa.	Ipatupad ang RA 6969 o Toxic and Hazardous Nuclear Control Act No. 6969 of 1990 sa pamamagitan ng tamang pagsasaayos ayin sa angkop ng basura at ang pag hanap ng Accredited ng mag hahakot at mag treat or maglilinis ng mga basura.

Buod ng mga Resulta, Epekto at Mga panukala			
Impacts (Epekto)	Project Phases (Panahon ng Proyekto)	Results at Obserbasyon	Mga Panukala sa Kaayusan
LAND			
Geohazard Assessment Kasiraan ng Proyekto at Kapigiran	Buong Antas ng Proyekto Constraskyon, Operasyon at Pag abandona	Ang lugar ay deanan ng daluyong, bagyo at pagbaha	Itaas or ang pag tambak ng lupa na 4 na metro upang maprotektahan ang mga makinarya at gamit. Mag lagay or ipatupad ang buffer zone sa paligid ng creek para sa natural na proteksyon. Siguraduhing 25 meters palayo sa creek ang itatayong STP.
WATER			
Hydrology	Constraskyon	Maling pagconstruck, posibleng pagbaha (overflow) dahil ito ay tabi ng Tanatan Creek kung mag karon ng diversion ng creek gawa ng maling pag tambak	Siguraduhin walang diversion ng daluyan creek na gagawin at mag patupad ng proteksyon sa creek way tulad ng riprap para maiwasan ang pag guho ng lupa sa gilid. Maglagay nga drainage pipe.
Water Quality (Kalidad ng tubig ng Tanatan Creek)	Constraskyon, Operasyon	Posibleng magkaroon ng silt or putik gawa ng earthmoving at mga alikabok ng semento na nahalo sa lupa	Maglagay ng settling pond at siguraduhing ang tubig ulan at nakalinya papunta sa settling pond. Magsagawa ng monitoring kada quarter para masiguro na hindi nakaapekto ang Proyekto sa kalidad ng tubig

Buod ng mga Resulta, Epekto at Mga panukala			
Impacts (Epekto)	Project Phases (Panahon ng Proyekto)	Results at Obserbasyon	Mga Panukala sa Kaayusan
WATER			
Water Quality (Kalidad ng tubig ng Dagat)	Constraskyon, Operasyon	Posibleng magkaroon ng silt or putik gawa ng earthmoving at mga alikabok ng semento na nahalo sa lupa	Ipatupad ang buffer at salvage zone. Magsagawa ng monitoring kada quarter para masiguro na hindi nakaapekto ang Proyekto sa kalidad ng tubig
WATER Kumpetisyon ng paggamit ng tubig sa mga komunidad	Constraskyon, Operasyon	Kakulangan ng tubig ng mga komunidad	Ang pangangailangan domestic lamang na tubig ang kailangan ng kumpanya na ipinagkaloob ng Roxas Water District. Posibleng mag gawa ng deep well kung kinakailangan
AIR			
Air Quality (Kalidad ng Hangin)	Constraskyon, Operasyon	Posibleng akikabok gawa ng earthmoving at mga pinong alikabok habang nag gigiling ng semento. Pag emit ng NO2 SO2 and CO gawa ng mga equipment, truck at sasakyan. Posibleng pag emit ng PM10	Sa panahon ng konstruksyon ipatupad ang maagarang pag kompak ng lupa pag tambak at pag dilig ng lupa para maiwasan ang alikabok. Sa panahon ng operasyon, siguraduhing maayos at gumagawa nag dust collector at bag house ng makina ng panggiling. Mag conduct ng air sampling kada anim (6) na buwan

Buod ng mga Resulta, Epekto at Mga panukala			
Impacts (Epekto)	Project Phases (Panahon ng Proyekto)	Results at Obserbasyon	Mga Panukala sa Kaayusan
PEOPLE			
In-Migration (Pagdami ng tao)	Constraskyon, Operasyon	Posibleng pagdami ng tao mula sa ibang lugar gawa ng trabaho	Siguraduhing sa mga lokal na barangay dapat kumuha ng mga empleyado
Employment Positibong Epekto ang pagangkat ng trabaho sa lugar	Constraskyon, Operasyon	Makadagdag ng trabaho para sa mga kwalipikadong lokal ng mamayan ng itasan. Dagdag kita ng gobyerno para sa mga bayad taxes	Siguraduhing sa mga lokal na barangay dapat kumuha ng mga empleyado. Regular na pakikipag usap sa Barangay para sa pangangailangan ng qualifications.
Social Development Plan (Kaakibat na Proyekto at Tulong para sa Komunidad)	Operasyon	Posibleng dagdag kita at pangkabuhayan sa barangay. Dagdag kita ng individual	Ipapatupad ang Social Development plan ayon sa programa ng inyong munisipyo at barangay tulad ng pagtulong ng kumpanya sa mga sumusunod: a. Livelihood -vegetable raising or livestock, fish or dried fish production, providing seed money in the form of loans on easy terms b. Health and Safety - Pagtulong sa Medical Mission and Feeding Program c. Education -Supply of educational/learning materials to pre-school children. Provide Footbridge for the Elementary Students

Buod ng mga Resulta, Epekto at Mga panukala			
Impacts (Epekto)	Project Phases (Panahon ng Proyekto)	Results at Obserbasyon	Mga Panukala sa Kaayusan
PEOPLE			
Social Development Plan (Kaakibat na Proyekto at Tulong para sa Komunidad)	Construsyon and Operasyon	Posibleng dagdag kita at pangkabunayan sa barangay. Dagdag kita ng individual	d. Environment and Sanitation -Pagtulong sa Maintenance of barangay roads and drainage system e. Health and Sanitation - Pagtulong sa Operation Linis f. Peace and Order -Pagtulong sa pagpapagawa ng uniporme ng mga tabod g. Tourism - Pagsuporta sa mga aktibidad ng munisipyo at barangay gawa mga mga fiesta at ipa. Pa h. Spiritual - Pagtulong sa mga simbahan i. Disaster Preparedness - Magsagawa ng seminar on disaster preparedness and emergency response such as flooding, tsunami, earthquake, etc.
