

PUBLIC HEARING REPORT

**FOREST RESOURCE UTILIZATION
AND PLANTATION DEVELOPMENT PROJECT
OF M&S COMPANY INC.
(under IFMA 18-2007)**

Summary of Public Hearing
Environmental Impact Statement
Forest Resource Utilization and Plantation Development Project
M&S Company Inc.
under IFMA 18-2007

The public hearing on Environmental Impact Statement (EIS) for Forest Resource Utilization and Plantation Development Project of M&S Company was spearheaded by the Environmental Management Bureau (EMB) of Central Office together with the EMB Regional Office. It was conducted in a two – day period dated January 15 and 16 of 2020. The venue of said public hearings were located at Plamango Integrated School Multipurpose Hall in Esperanza and Barangay Covered Court, Limulan, Kalamansig both in the Province of Sultan Kudarat.

Below are the total attendees farmed out per Municipalities as enumerated below:

Phase	Municipality	Total No of Invitees	Total Actual Attendees
Day 1	Esperanza	24	142
	Sen. Ninoy Aquino	24	29
	Bagumbayan	24	18
Day 2	Kalamansig	24	93
	Lebak	21	16
	Total	117	298

Below are the summary of issues and concern raised during public hearing:

EIA Module	Name of Stakeholder	Issues/Concern	Proponent's response
Day 1			
Land, People	Datu Andy Pipayan Tribal Leader, Sitio Legodon Brgy Marguez, Esperanza	*no plans of opposing to harvesting / operations of M&S on their plantations in Esperanza. Our only concern is that, inside the plantation here in Legodon, there are many people who reside inside the area. So what we wanted is that, before the conduct of any operations, the people inside the IFMA Area will first be identified, specifically where the harvesting operation will take place. But we also know well, that the company has given us so much. We will continue to support and there are no issues, except that we wanted the people to be secured first inside the area.	Joselito R. Invento, Operations In-Charge replied: We just want to share with you that the harvesting operations of the company is a 5-year program. The 5-year program is already scheduled accordingly for year 1, year 2, 3, 4 and 5. This project already has a program and will be announced to the affected barangays or constituents. Here for example in Omega, everybody here is already identified.
Land,	Insular Pipayan,	*We are not against the IFMA, if they	Joselito Invento, Operations In-

People	Tribal Leader, Sitio Legodon, Marguez, Esperanza	will continue or renew. We know, there is a comprehensive process either in DENR or NCIP. we just want to clarify the areas for IP within IFMA area. How we can use the IP areas that is inside IFMA. As the IFMA operates for 25 years, the IP population increases inside IFMA area.	Charge said that "the management waited for survey. We understand that IP population has multiplied. Thus, resettlement site for IPs shown in the vegetative cover intended for relocation site is about 700 hectares which was released. We just waited for the survey, rather a census. Census of the IPs is needed to get the actual original settlers. We will verify the list with our existing list to determine that these are not the outsiders who just want to live inside the IFMA. We wanted to ensure they are the IPs who were originally given relocation site.
People	Sultan Rey Dakyas, Municipal IPMR Esperanza, Sultan Kudarat	*What is the primary benefit the Manobo Dulangan who are inside the IFMA area will get when the company start to harvest their planted trees?	EnP. Realyn Gonzales, Forester said "that harvesting operations will open an employment opportunities to the IP's since they are the priority for hiring, and the management has in store a suited work for them to fill in." Rolando Baloria, Admin / Comrel added, "that the M&S could guarantee the employment opportunities for IPs. Aside from that, I know what you are pointing out, it is about the ROYALTY of your tribe. The demand for royalty must be proposed and come from the tribe, thru census. You didn't submit the percentage to the company."
People	Sultan Rey Dakyas, Municipal IPMR Esperanza, Sultan Kudarat	*IP's of Apo Dululangan are happy of the answer gotten from Rolando Baloria. It's not yet, too late. The M&S help meets the second generation of the IP's. *The IP's did not demand to the company, only on what M&S can do and guarantee esp. those IPs within its IFMA area since, their economic will be affected. Not all Manobos outside the IFMA, the M&S could be able to help. Thank you RDB for mentioning it. We know the help of M&S are not secret in Senator Aquino.	Joselito Invento, Forester added, that "the company will be using limited equipment in harvesting operations as they will focus on manual labor, thus requires huge manpower. We use equipment only for loading activities but on pulling out the trees, it's thru manual labor. Those who have carabaos will pull out the trees. Equipment will be of minimal usage. It generates employment and economic activity inside the IFMA area particularly to the IP's.

Land	Arnold Sitjar, Punong Barangay, Kuden, Sen. Ninoy Aquino	*With regards to identified resettlement area, how big is the resettlement area that is covered under our barangay? And when it comes to existing planted coffee as well as planted trees, does the company will replace the trees once it is harvested? Does the farmer can still plant coffee after the harvesting of trees? Also, we have 5-year medium term development plan in the barangay wherein we were able to identify farm to market road where we have community within the IFMA area. Can we use the spur roads after harvesting operations as farm to market roads?	Julius Aborido, Forester answered that "Sitio Tamangan is inside the IFMA area. And the company will replant trees as this is the mandate of DENR. The company will cut and plant the trees. And it's 25 years. While, you, are lucky, because your coffee will still be there. There is three years more before we can harvest. Regarding the spur lines, we need to get clearance from the management."
			Joselito Invento, Operations In-Charge added clarification pertaining to coffee issue. "Tree Plantation comes first before the coffee, am I right? Robusta coffee favors good growth while under shade the tree plantation, while arabica coffee, is different to robusta. Most IPs even Christian planted coffee under shade by the planted trees. Now, the problems arise where the NPA's use it against the company as they say we damage the coffee trees and pulled it down. With this circumstances, we seek legal process and come to community meetings with IPs involved, with the Mayor and even with the Military presence. Various agreements were signed and even the IPs have uttered apology to M&S in planting coffee. They committed to us that they will not charge us nor ask for compensation for damages. As proof, we have various memorandum of agreements signed with in the LGU, and other government agencies. The company will cut and replant. But we will try our best not to damage the coffee during harvesting operation.

People	Arnold Sitjar, Punong Barangay, Kuden, Sen. Ninoy Aquino	Increase in population cannot be avoided due to inter-marriage. Thus, requested that we can sit down on this how we can determine properly the concerned original settlers inside IFMA area.	Joselito Invento, Operations In-Charge said that "there is no problem. We just wanted to take it up not one by one, but in one time approach together with involved parties so, we can take this up to the management in one time only also with our recommendation.
Land	Sultan Rey Dakyas, Municipal IPMR Esperanza, Sultan Kudarat	*It is not just that I am the brightest of the IPs. I just want to bring out my thoughts. If it is not through the protection done by the M&S, the ancestral domain of the IPs has long been denuded, lease or sold by the IP's. If we have good mouth, good in talking, we must also good in tilling our lands.	Joselito Invento gratefully said: thank you because you recognize the company. Would like to inform the same issue with TAMASCO. TAMASCO has 1,611 hectares wherein the 310 hectares of Block 5 of the M&S IFMA area was covered under their CADT claims. 80% of that block 5 was inside TAMASCO and it is the only remaining area that has not been sold by the IPs. All other areas covered by TAMASCO were already sold. We can give you proof, if you wanted to see it.
Land	Agustino Fajardo, Teacher In-charge of Tulale Elementary School, Bagumbayan	My concern is, we implement every year a tree planting. The SPG officials together with the graduating pupils are required to plant trees. Our school site is almost 10 hectares and is really bald and need to be reforested. Our problem is, we don't have enough seedlings. But if you will give us for FREE, we will really appreciate it.	Julius Aborido, Forester, said, we can give you seedlings for planting. But because the area is very far, we will raise seedlings thereat intended for your project.
Land	Agustino Fajardo Teacher In-Charge DepEd, Bagumbayan	My additional concern sir, is, we have about four (4) trees, pine trees, mangium. Based on the hazard mapping, it is very big and is hazardous and poses risk to pupils. My question is, does this trees will be included in cutting of trees?	Julius, Aborido, Forester said, even though it is inside the IFMA, and your concern is to cut the hazardous trees. We are not authorized to give permit. Still it is with DENR. Even if, that trees is yours, and it is inside the IFMA area, still we cannot give clearance and even give permit.
Land			Enp. Realyn Gonzales, Forester, said, in addition to what my colleague says, it is true that it is not covered by us, but we can assist you. You may prepare a letter request regarding tree cutting. The documentation is yours, but we can help guiding you

			on how to apply a tree cutting permit. The request must come from Deped, not from us.
Land	Alexander Espinosa, TIC Elementary School of Monteverde, Bagumbayan.	My concern is regarding the school site. Who is the legitimate concern who can give us the Deed of Donation so we can develop our area? Also, we can get clearances from our Division and also, if, we develop the area, can we go partnership with M&S and ask for planting materials of forest trees, if possible.	Julius Aborido, Forester said, we don't have clear guidelines, as we are not the owner.
			Dir. Omar Saikol, EMB Regional Director, Region 12 There is what we called special patent. You apply in the Regional office of DENR not EMB. Since it is a government institution, you can apply for special patent at PENRO. Immediately the PENRO will facilitate.
Land	Sheilla Rollorata Teacher In-Charge Plamango Integrated School	My concern, is the same issue, school site. March is fast approaching again. We will be asked for school site documentation. We went to DENR but we are told to go to the NCIP. Made several meetings but the result still vague. I forgot since it has been so long, I only have this certificate issued by the NCIP.	Julius Aborido, Forester replied: On our side as IFMA Holder, we can assist the school by relinquishing the school site covered within the IFMA area.
People	Arnold Sitjar, Punong Barangay, Kuden, Sen. Ninoy Aquino	This pertains to the housing project of NHA which are being implemented in our Barangay, particularly in Sitio Tamangan, Brgy Kuden which is inside IFMA area. We have difficulty in the implementation since there is existing planted trees. We have problems in the implementation since there is no good roads for transportation by the proponent and the IFMA, what is the best thing to do esp now that we are on-going in the project implementation? The proponent is the LGU, and the recipient is the Manobo Dulangan Tribe in Sitio Tamangan.	Joselito Invento, Operations In-charge replied: We would like to clear that the IFMA is supporting the project and we are not against. We support because that is for the benefit of the IPs. But the area is under forest land. And there are requirements for conversion of forestland into resettlement or residential. All we ask is, we need to comply with the requirements for the conversion of forest land into residential or resettlement. And we have submitted all the requirements to the LGU which you have to comply. We have to be compliant, because, as IFMA, we will be questioned since the

			project is within the IFMA area. So again, we are supporting the project but there are those requirements that we need to comply first.
			Director Omar Saikol added: What he said is correct on the management side of M&S. Before we can proceed the project in forestland, we need to convert it into alienable and disposable. In conversion, the basic requirement is for the congress to enact a law converting forestland into alienable or disposable or agricultural land. So I advise you, this is a concern of DENR. This is under jurisdiction of Region 12. Just go to Aurora and you will know what should be done. A little bit complicated because this is IFMA. I just want you to be informed that the basic requirement is for the congress to enact a law converting forestland into Alienable and Disposable.
Land	Julito Inion Brgy. Captain Sto. Nino, Bagumbayan	Related to IFMA integration, part of Bagumbayan, there are about 310 hectares, very little. But because on the current issue on TAMASCO claim covered inside the IFMA, is there any possibility that it can be awarded or released by M&S about their claim inside the area of IFMA 18-2007?	Joselito Invento replied, it is possible. It is stated in the terms and conditions, if public demands, it is possible. But also stated in the terms and conditions, that the IFMA can ask for due compensation. Whatever development, whatever is existing, it has to be compensated before they can release the area to the people.
Land	Felomino Ngag, Lebak	Does the natural forest will be cut or only planted trees?	Julius Aborido replied, the company scheduled to harvest for planted species. We will not harvest the natural species. Only the planted species such as acacia mangium, gmelina. Only those planted by the company.
Day 2			
Land	MPDC Kalamansig	We have been asked by the NCIP regarding the proposal. We are here and this is good. I can see this is beneficial. We can ask now. This is an income generating. We need jobs, and	Our harvesting operations, once, we will be granted with ECC, we will cut only the planted trees. Previously, we have one-year operation in 2014-2015 and the

		<p>to have an investor in the Municipality of Kalamansig. Our question is, there was a lot of complain previously because of damage agricultural crops, what is our policy that the Sanguniang Bayan needs to know, to get a clear interpretation. Sometimes, it is very good in written but doesn't interpreted well or doesn't apply in the implementation. We wanted, for documentation, we need to identify and state within the map. We need to have a map and interpret properly in the map, the limitation and coverage of the new system. It is very important to spell out. Sometimes this is the boundary but they operate on the other side. Clear this with DENR and municipal government.</p>	<p>area were in Lebak and Kalamansig. Now, we program for Four (4) year harvesting in Senator Ninoy Aquino and Esperanza only. The system is, mostly we are on labor force. Man Labor or Carabao labor. It requires a lot of people.</p>
Land, People		<p>To get a clear mechanic on harvesting, since there were agricultural crops planted underneath, and slightly disadvantageous. Let's clear what are the conditions we can give to the people who are covered underneath. What could you offer to them or is it already owned by the IP's or lead by the? This must be discussed properly and clear what should be done. So they will know their position. The LGU, in the monitoring and evaluation. It is important to check their harvest. Whether they harvest the natural or plantations.</p>	<p>For the information of the Visayan, those harvested before were already replanted because the company policy is to CUT and PLANT. The company reached the quota attending several meetings. The company before they harvest the trees, what the natives did, they planted coffee underneath the tree plantations. When the trees aged 4 years, underneath the plant is already clean and very suitable for planting of coffee trees. We have to admit, that the tree plantation comes first before the coffee trees. Let's look back your IPRA Law, section 56 of IPRA Law states that IFMA holder, included there, has prior rights that must be recognized and the same be respected. If you respected the IFMA rights, the IFMA holder, the IP's must not enter. If being respected, they must not enter in the IFMA area to plant the coffee trees. But let us disregard that. Previously, our Manager, as the trees grow, we keep our eyes closed. We know they are planting coffee</p>

		<p>underneath. We didn't expect that during harvesting of trees, the coffee trees will be damage. There, started the issue on compensation. How many times, but the company's stand is, the tree plantation comes first. You inter-planted coffee. If we keep going back on the issue, it will be a never ending story. Now, the DENR program is to cut and plant. The company will start the cutting of trees and will avoid as much as possible damaging the coffee trees. We commit to the barangay, that we will finish the season of coffee before we will harvest the trees to avoid great damage to coffees. But if needed, better off that you will prune at the same time while we do cutting activity so you can recover again. The company will not compensate, since you did not asked permission to interplant coffee before. Please do understand also the management side, that the company must also recover from its expenses in plantation development. Before, the DENR did not tell that MR Consunji stop planting because it is not sure if you can harvest because of banning. surely, the company will not plant trees.</p>
Land, People		<p>EnP. Realyn Gonzales: In additional with regards to the monitoring of LGU, part of the ECC is to create a multipartite monitoring team. We can have it inserted. We will just wait in the coming...after it will be done. We will implement it.</p>
Land, People	Kagawad Boy Ansep	<p>Limulan and Hinalaan has 3,000 plus of CADT. Then the IFMA there has more than 20 hectares. Does it covers in the operation in case you comply the requirements?</p> <p>The area covered by CADT are the boundary of the IFMA. So, it's not. Hope we can start operate, so we can be all benefited on this. The harvesting now covers only the Esperanza and Senator Ninoy Aquino.</p>

Land, People	Henilo Dungog, Brgy Captain , Datu Wasay, Kalamansig	<p>I understand what ma'am has said a while ago, esp. with the IP's. How many years that the company has no operations in Kalamansig and Senator Ninoy Aquino? Your IFMA now was inter-planted with coffee underneath. If you cut the trees under IFMA, will you compensate the people with their crops?</p>	<p>There were several public hearings conducted, symposium being done because of that same problem. The company strongly stands, that the mandate of the IFMA contract is to plant trees inside the lease area issued by the DENR. It is very clear that the company will plant trees. If ever, there is Christian or native who will interplant coffee trees underneath the plantation trees, we can just say, "buhay-buhay na lang". Because if we barred him from planting coffee, it will cause bad effect in the surrounding. Before, while the trees are growing, we know you were interplanting coffee trees. But we closed our eyes. We know that. The problem arises during harvesting of trees. We, instead, has an obligation for compensation. Our reply to that, the company, we don't owe for any compensation because the company didn't give permission before, permission to plant coffee, didn't even ask for profit share of said coffee. That is why, just go with the flow. If we harvest, you do your pruning in case your coffee trees get damage. When the company will plant trees, your coffee still there.</p>
Land, People	Henilo Dungog, Brgy Captain , Datu Wasay, Kalamansig	<p>You mentioned ma'am, that inside IFMA area you will cut the 29,000. Based on what sir Baloria answered, that it is not clear that the Christian or IPs will be compensated by the concession of the company. When cutting of trees in the 29,000 hectares, what should be done? Will it be replaced?</p>	<p>As you said, all trees in the 29,000 will be cut. The original IFMA area is 29,000. It has 5 blocks. Block 1, block 2, block 3, block 4 and block 5. The schedule for harvesting is about 2,318 hectares within the 10,442 hectares of established plantation of the company. That is plantation only, not natural species. It is clearly stated a while ago, since you are in Kalamansig side, there is no operation in your area. So, it is not the entire 29,000 that will be cut otherwise, there will be no forest left in Sultan</p>

			Kudarat. The only protected forest in Sultan Kudarat is under the IFMA area.
People	Liezah Seguano Brgy Captain, Limulan, Kalamansig	As you said a while ago, you will cut trees only in the upper area. Not here in kalamansig since it is done already. From upper area going down here in Kalamansig, you will pass here, and there are existing houses along the road, and since you will be passing here, and it cannot be avoided because the trees are very long, there will be some houses that will be affected. They cannot immediately transfer as they do not have money. What can you help sir? If you will pass, here, there is possibility that the road will be rehabilitated.	We will have it surveyed esp. those along the road, lower or going up. Another one, it is timely to use again the road on that side, and be rehabilitated. We will conduct survey to determine the real problem and if there are houses that will be affected.
People	Liezah Seguano Brgy Captain, Limulan, Kalamansig	Those houses that will be affected, they should have financial assistance so they could transfer. The newly paved roads here, for example, it will proceed, will it be damage once your truck passes through?	It cannot be, because of the thickness of your cement. Then, it is plantation trees and is very light.
People	Liezah Seguano Brgy Captain, Limulan, Kalamansig	For example, in the future, as mentioned that there will be benefits for the community in Limulan, we will think of, the barangay officials, of what we can ask from you.	Realy Gonzales, Forester replied: It is best that it comes from your end, what is most applicable to meet your needs. What is really needed here, we will check and discuss this. We will think of how we can implement. In addition, a while ago, the IFMA operation, will cover only Esperanza and Senator Ninoy Aquino. We have a five-year plan. We focus there. But in the future, the planted trees, those we have planted about 15 years, 20 years ago, when becomes matured, we get back on it. We will only cut, to be clear, only in Senator Ninoy Aquino and Esperanza. Now, no operation yet for Lebak, Kalamansig and Bagumbayan. We are a by phase operation.

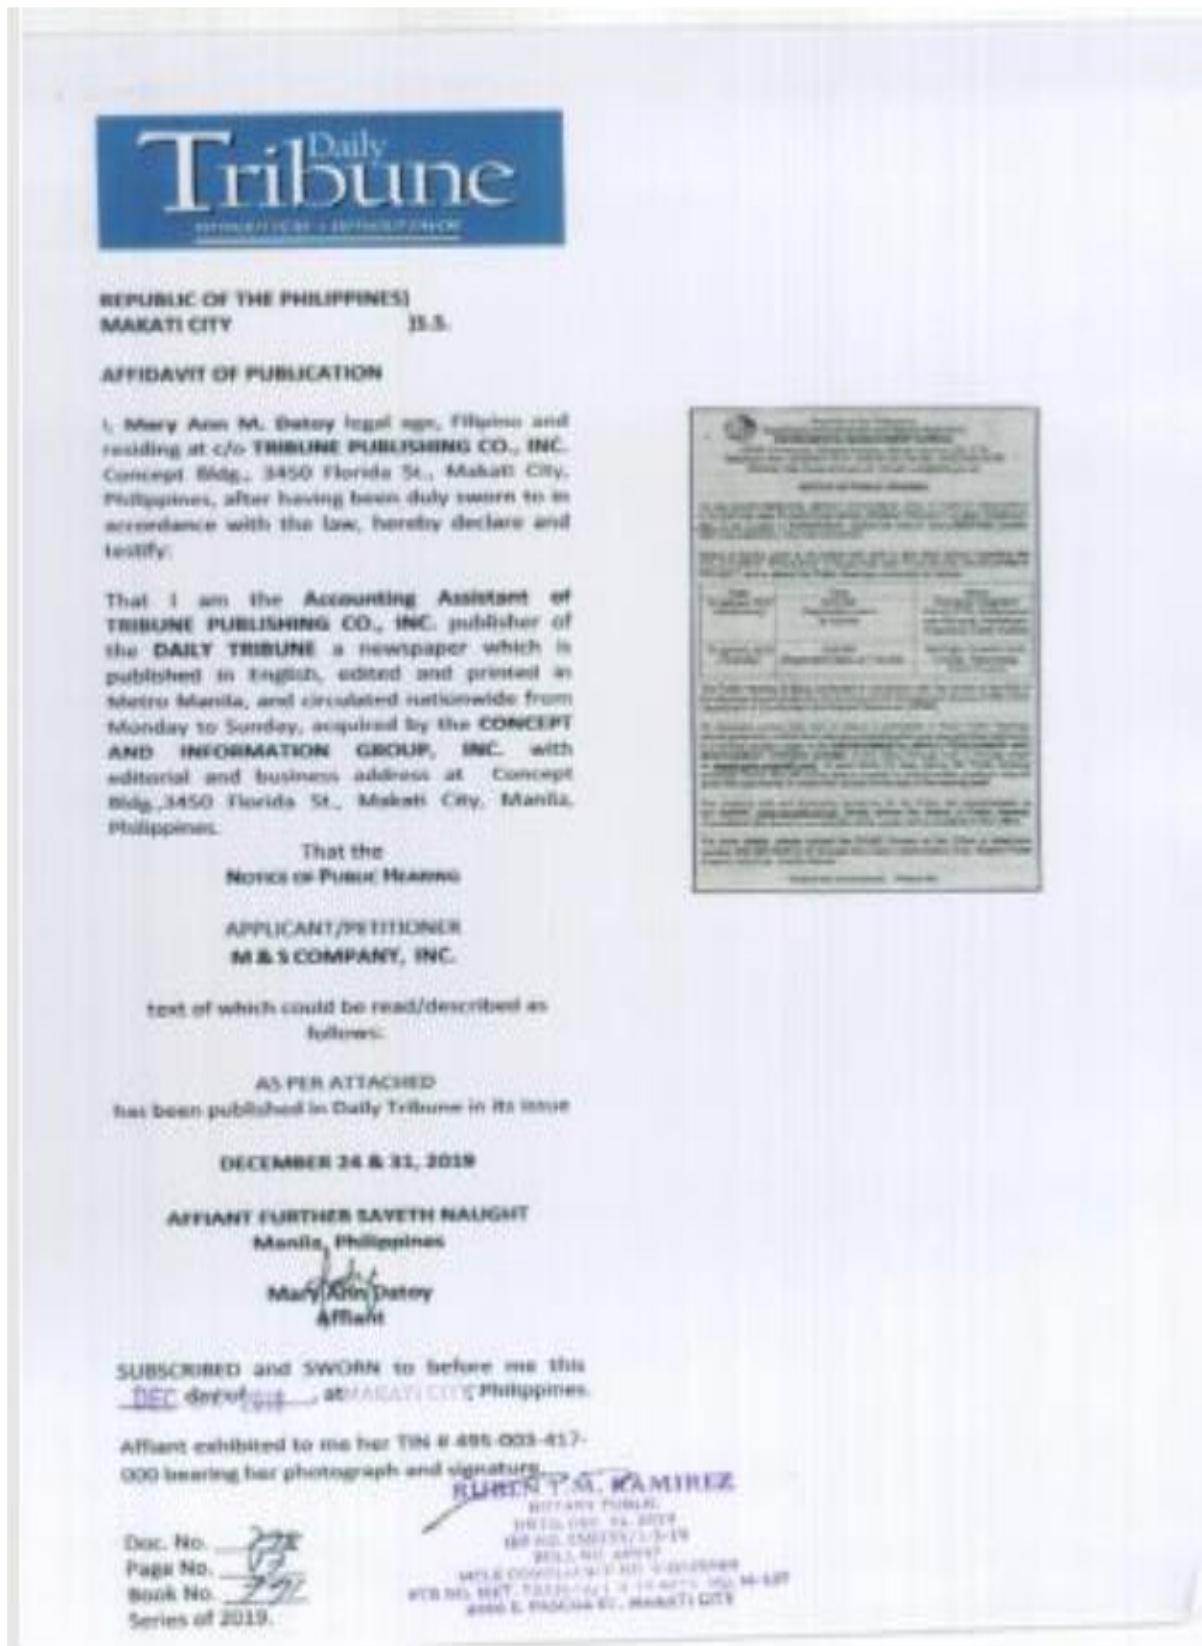

The Public Hearing Officer, Atty. John Edward Ang, of EMB Central has summarized the issues and concerns that has been properly discussed and agreed such as identification of boundaries of harvesting operation affecting the resettlement area, benefits of the IP's

and other stakeholders, employment opportunities, land classification, census to determine actual settlers based on the settlers originally given relocation site inside IFMA area, partnership with M&S, compensation on agricultural crops once damage and possible prevention / mitigating measures to avoid the likelihood of damage, survey of existing houses on hauling route that will be affected during harvesting operation, creation of Multi Partite Monitoring Team.

Engr. Regina Paula Eugenio of EMB Central ended the public hearing in explaining the procedures and processes underwent by the proponent including the next steps forward in securing the requirements for the issuance of ECC on the aforementioned M&S project.

MR. CHARLES FREDERIC R. PLOTEÑA

Municipal Mayor
Municipality of Esperanza
Sultan Kudarat

JAN 8 2 2020

Dear Mayor Plotena:

We are pleased to invite you and your constituents to attend the Public Hearing of the Forest Resource Utilization and Plantation Development Project of M&S Company Inc. The said hearing is scheduled as follows:

Date	Time	Venue
15 January 2020 (Wednesday)	8:00 AM (Registration starts at 7:00 AM)	Plamango Integrated School (PIS), Multipurpose Hall, Plamango, Pamantigan, Esperanza, Sultan Kudarat
16 January 2020 (Thursday)	8:00 AM (Registration starts at 7:00 AM)	Barangay Covered Court, Limulan, Kalamansig, Sultan Kudarat

The Public Hearing will be conducted as part of the requirements of the proponent's application for an amendment of the Environmental Compliance Certificate. Interested parties will be given the opportunity to express freely their concerns/support/opposition/questions about the project.

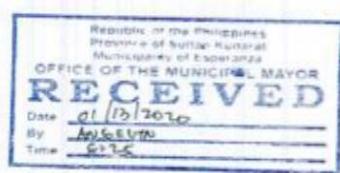

Kindly register in person or submit your opinion(s) in a concise position paper to this Office or email it at eiand.emb.co@gmail.com/eia@emb.gov.ph three (3) days before the said hearing. Those who will not be able to register or submit written positions may be given the opportunity to share their issues on the day of the hearing itself.

The project's Environmental Impact Statement is downloadable at our website: www.eia.emb.gov.ph (kindly access the Notice of Public Hearing/Consultation link found on our web page).

For more details, please contact the Environmental Impact Assessment and Management Division (EIAMD) of this Office at Tel. Nos. (02) 920-2240 to 41 and look for the project case handlers Engr. Regina Paula Eugenio and Engr. Dexter Tabada.

Very truly yours,

JAN 8 2 2020

Dear Mr. Narceña:

We are pleased to invite you to attend the Public Hearing of the Forest Resource Utilization and Plantation Development Project of M&S Company Inc. The said hearing is scheduled as follows:

Date	Time	Venue
15 January 2020 (Wednesday)	8:00 AM (Registration starts at 7:00 AM)	Plamango Integrated School (PIS), Multipurpose Hall, Plamango, Pamantingan, Esperanza, Sultan Kudarat
16 January 2020 (Thursday)	8:00 AM (Registration starts at 7:00 AM)	Barangay Covered Court, Limulan, Kalamansig, Sultan Kudarat

The Public Hearing will be conducted as part of the requirements of the proponent's application for an amendment of the Environmental Compliance Certificate. Interested parties will be given the opportunity to express freely their concerns/support/opposition/questions about the project.

Kindly register in person or submit your opinion(s) in a concise position paper to this Office or email it at eiamd.emb.co@gmail.com/eria@emb.gov.ph three (3) days before the said hearing. Those who will not be able to register or submit written positions may be given the opportunity to share their issues on the day of the hearing itself.

The project's Environmental Impact Statement is downloadable at our website: www.eia.emb.gov.ph (kindly access the Notice of Public Hearing/ Consultation link found on our web page).

For more details, please contact the Environmental Impact Assessment and Management Division (EIAMD) of this Office at Tel. Nos. (02) 920-2240 to 41 and look for the project case handlers Engr. Regina Paula Eugenio and Engr. Dexter Tabada.

Very truly yours,

16 January 2020 (Thursday)	8:00 AM (Registration starts at 7:00 AM)	Barangay Covered Court, Limulan, Kalamansig, Sultan Kudarat

The Public Hearing will be conducted as part of the requirements of the proponent's application for an amendment of the Environmental Compliance Certificate. Interested parties will be given the opportunity to express freely their concerns/support/opposition/questions about the project.

Kindly register in person or submit your opinion(s) in a concise position paper to this Office or email it at eiadm.emb.co@gmail.com/eia@emb.gov.ph three (3) days before the said hearing. Those who will not be able to register or submit written positions may be given the opportunity to share their issues on the day of the hearing itself.

The project's Environmental Impact Statement is downloadable at our website: www.eia.emb.gov.ph (kindly access the Notice of Public Hearing/ Consultation link found on our web page).

For more details, please contact the Environmental Impact Assessment and Management Division (EIAMD) of this Office at Tel. Nos. (02) 920-2240 to 41 and look for the project case handlers Engr. Regina Paula Eugenio and Engr. Dexter Tabada.

Transcription of Public Hearing for Day 1 – Plamango, Esperanza, Sultan Kudarat

TRANSCRIPTION OF PUBLIC HEARING
PROPOSED FOREST RESOURCE UTILIZATION AND PLANTATION DEVELOPMENT PROJECT
IFMA 18-2007

January 15, 2020

Plamango Integrated School, Multipurpose Hall Esperanza Sultan Kudarat
(Municipalities of Bagumbayan, Esperanza, and Sen. Ninoy Aquino,
Province of Sultan Kudarat)

Opening Prayer: Mr. Razel Narcena (Kaabag Candelaria Chapel)

Philippine National Anthem: Ms. Greatle R. Invento (Teacher, Plamango Integrated School)

Engr. Omar Saikol: (EMB R-12 Regional Director) “Maayong buntag kaninyong tanan! Ako po ay bagong talaga lamang na Regional Director, nakaupo nagsimula po nung December 16. So lingid sa inyong kaalaman, before kami nagpunta dito, nagresearch ako with regards to the—itong public hearing na ito. So medyo blind ako dito sa project na to but I tried my best na malaman ko dahil nasa area of responsibility ko to. But since ang programa natin is Notice of Public Hearing, isa ito sya sa pamamaraan ng pag-apply ng ECC o yung Environmental Compliance Certificate ng M&S. So ang, nadyan yung, ito rin ay isang protocol na ginagawa bago maka-, mabigyan ng ECC ang isang kompanya. So since na malaki ang area at tsaka malaki ang kompanya scope nya, that's why nandito ang taga Central Office dahil sila ang mag-i-issue ng ECC. Gusto ko lang ipaalam sa inyo, hindi ang Region 12 ang pipirma sa ECC ng kompanyang ito kundi ang Central Office kaya nandito ang Central Office. So ang presence namin dito because ah under ito sa ating jurisdiction we are supporting our counterpart sa Central Office para mapa- kung saka-sakali meron mga problema kasi ah responsibility namin ito kung ano man ang mga katanungan later on masasagot natin. Ah I would like to acknowledge siguro mga participants na galing ng Bagumbayan, may taga Bagumbayan, meron? Esperanza? Meron. Sen. Ninoy Aquino? Meron. Ah, Lebak? Meron, dalawa. Kalamansig, meron din. But anyway, Lebak at Kalamansig magkakaroon ng the same program bukas, ah it will be announced later on. But ang masasabi ko lang since na ang pagusapan natin dito is with regards to environmental protection and conservation, along the way sabi ko napakakapal pala ng kwan, ng mga kahoy natin dito sa taas. Ah sad to say na nakita ko dyan sa medyo baba medyo wala na pero ah ganun pa man ang responsibility ng opisina namin ay ma-secure natin ang conservation at tsaka protection ng kung ano pa man ang naiwan dito sa ating ah pamayanan. So hindi ko na masyado patataasin ang ating sasabihin kasi marami tayong pag-uusapan sa ngayong araw na ito, ah ang masasabi ko na sana maging kalma tayo dahil mag-uusap naman tayo. Ito'y isang dayalogo na sana walang mainit ang ulo para magkasinabtanay ta diba. Mao man na atong tuyos. Kung dili kita magkasinabtanay wala tay padulngan. So guinahangyo nako nang tanan, please lang, gui ingon pa sa English

"Keep calm and) unsa hahaha. Hinaut unta akong hangyo, bilang bagong talaga na DENR regional director sa Region 12, hinaot unta nindot atong pagdayologo karong buntanga. Hangtud diri na lang. maayong buntag sa inyong tanan.

Engr. Mary Therese Gonzales:
(DENR-EMB Central)

"Maraming salamat po RD! So ngayon po ipapakilala ko po yung mga participants pati po yung ating galing sa Central Office. So Ako po si Engr. Mary Therese Gonzales galing po sa EMB Central Office, so kasama ko po si Engr. Regina Paula Eugenio (raised hand), kami po yung case handlers ng Project. At ang aming Legal Officer po, ang Hearing Officer po sa Proyektong ito ay si Atty. Jan Edward Ang. So sya po yung mamumuno nun gating Open Forum mamaya. So from EMB Region 12 po nakilala nap o natin si Engr. Omar Saikol po, yung EMB Regional Director. So kasama nya rin po si Atty. Erwin Bernales, ang kanyang Legal Officer po. At sir Engr. Bulawan Sagbaraniko, OIC Chief po ng Clearance and Permitting Division, pati po yung sina Engr. Rudy Tuya at si Mr. Datu Malawa Saikol. So from the company naman po, ang ating proponent po sa M&S Company, so nandito po si (Mr.) Joselito Invento po, Operations Manager, si Mr. Rolando Baloria, Admin and ComRel po; Si Mr. Julius Aborido, Company Forester, at si Ms. Realyn Gonzales po Project In-charge at Forester, at si Rae Nald Lucena, Forester and si Raffy Narcena po HR Officer at si Ms. Cora Baylon po ang kanilang consultant, yung gumawa po ng study ng sa proyektong ito.

So sa mga ating inimbitahang mga taga-Bagumbayan po so tinatawagan ko po ang representative ng Datu Elementary School kung nadito po sila, from LGU po, ah Local Government Unit po may representative po bang pinadala, andito po sya. Representatives po from Brgy Sto. Ninio Bagumbayan, so andito rin po sila. From DepEd po may mga taga DepEd Bagumbayan so andito rin po sila. At si mga kapitan po sa Bagumbayan, mga kapitan, ng andoon po si sir. At sa IPMR....

So for Munisipyo po ng Esperanza so tinatawagan ko po yung mga Local Government Units or officials from Esperanza po. Mga barangay Captains po – so nandito po si sir. So yung mga barangay Kagawads nandito rin po. Tribal Leaders, so andun po sila. Yung mga sa DepEd po or mga from elementary schools, at yung ibang, taga Esperanza po.

(Sen. Ninoy Aquino) Barangay Kagawad, and mga Tribal Leaders po, so andun po sila. And other participants from Sen. Ninoy Aquino. So maraming salamat po sa pagpunta .

So bukas po meron po ulit na Public Hearing po for Lebak and Kalamansig naman po.

So para po sa susunod na parte ng ating programa, tinatawagan ko po si Engr. Regina Paula Eugenio para po i-explain o ipaliwanag po ang prosesong pinagdaanan ng M&S Company bago ma-secure ang kanilang ECC.”

Engr. Regina Paula Eugenio:
(DENR-EMB Central)

“Magandang umaga po, maaung buntag! Pasensya na hindi po kami marunong mag-Bisaya so magta-Tagalog po tayo. Pero later on po pag nag-open forum na po tayo, pwede po kayong mag-Bisaya. Meron na dito po ang aming Regional Office para po i-translate sa’min kung ano man po yung questions ninyo. So sa EMB Central Office po kami at ito pong activity natin ngayon is parte po ito ng paga-apply ng M&S ng kanilang Environmental Compliance Certificate. So ito po ay ayon sa batas sa Presidential Decree 1586. Ang sinasabi po ng batas na to walang kompanya o kahit na sinong tao ang pwedeng mag-operate ng isang proyekto na nakabase sa isang, ah makapag-operate ng isang Environmentally-critical project at nakalocate sa environmentally-critical area na walang Environmental Compliance Certificate. So sa ngayon po ang M&S kumukuha po sila ng kanilang ECC para po sa kanilang IFMA 18-2007. So meron napo silang tenurial instrument na binigay po ng DENR, so ang nagbigay po dyan DENR through FMB po- Forest Management Bureau naman po. So kami po sa ECC kami po ay Environmental Management Bureau. So ang titignan po naming ditto ano po baa ng mga impact ng proyekto, ng kanilang plantation at ang kanilang pag-harvest sa kanilang itinanim at kung meron man itong masamang epekto paano po nila ito babawasan or iiwasan kung hindi man kayang alisin totally yung posibleng epekto. So ito pong Public Hearing na to kami po yung nag-invite po sainyo thru M&S Company, so nagpadala po kami ng sulat galing po yan sa Central Office, kaya nga po sa pagtingin ko sa iyo, unang-una nagpapasalamat kami sa pagtugon ninyo at sa pagpunta. So ito po ay isang katulad po ng nabanggit ni RD, ito po ay isang dayalogo. So maaari nyo po i-raise lahat po ng issues and concerns po ninyo regarding po dun sa magiging operations ng M&S. So mamaya ipapakita po nila kung saan po yung mga io-operate nila, saan yung mga iha-harvest nila na area and paano po nila mababawasan yung mga posibleng impact. Syempre sinabi po nating impact, impact po sa tao, kasama po dyan yung impact sa lupa, hangin, tubig at syempre sa tao. So yun po yung idi-discuss po ng M&S Company mamaya, then magkakaroon po tayo ng open form. So inaasahan po namingna magiging maayos po ang ating pag-uusap ngayon at katulad po ng nabanggit ko kanina, pwede po kayong magsalita sa kahit na anong dayalekto na kayo po ay komportable.”

Enp. Realyn C. Gonzales

“Thank you. Ang akong dakong pagtahod sa among halandong EMB Director si Engr. Omar Saikol ug iyang mga kauban, hilabi na sa among taga EMB Central ug katong mga ni tambong dinihi sa nagkanda-iyang sector, mga IPs, ah religious sector, farmers, ug sa

mga LGUs. So, kaning among projekto ah mauning ano "Forest Resource Utilization and Plantation Development Project" under Integrated Forest Management Agreement or IFMA 18-2007 meaning ah, kini sya is ang pagputol sa mga kahoy na dia sa kagubatan na among tinanom. So even magputol mi og kahoy, ang among put'lon is katong mga amo lang tinanom. Then naga-develop pod mi. So kaning ah, programa ah gui tagaan mi ug katungod ani guikan sa DENR base aning IFMA 18-2007. So ang company nagdumala ani mao ang M&S Company Inc.

So ang lokasyon ah.....(loss /damage footage)dun sa mga development and management scheme namo, ang entire IFMA na 29,085 hectares ang coverage nya mauto sya, pero ang amuang pamaagi is, ang halimbawa, so portion of, portion sa Production Residual Forest nga duna mi,... and then ang portion sa Established Plantation, sa, in totality, naa mi 10,000. More than 10,000 hectares nga established ug kana naka-schedule na putlon namo this year. So portion of that Established Plantation na more than 10,000 nasa 2,318 hectares lang po yun kasi yun yung matatanda na. So take note na ang within the 10,000 hectares na a-establish namo, only 2,318 hectares ang amoang putlon kay kani sya niabot na sa iyang gulang, mga 15 to 20 years old na sya. So meron ibang portion dyan na open brushland ide-develop din naming yun kasi yun yung commitment namin sa DENR na, whatever na open or degraded, amo na syang i-develop into mixed forest plantation. na may portion din dun sa within the 29,085 hectares, portion of that is the resettlement area na 733 hectares. So, katong 733 hectares ma uto syang mga nahisulod dire na mga IPs, so may portion on that binigyan kayo ng area. And then ang programa sa company is to assist you in everything, like for example may social development na ihatag sainyo, like for example planting materials binibigyan kayo, and then farm implements, tapos kung sa pang projekto sa umaabot na panahon. So diba naremember na tong last na nag ano mi, nagconduct kami IEC FGD para matan-aw namo kung unsa pang mga issues and concerns na pwede namong i-resolve ug para magkasinabtanay ta, kasi dili na man lang man kmi maka-benefit ani, ang IFMA, ang among commitment sa DEN , mag-develop mag-protect, and at the same time gamiton to among tinanom but then kasama doon is "kayo". So this is a partnership. Kung naa mi makuhad dinihi naa pod mo mga benepisyo ani, so both of us are benefited on this Project.

Ang component natin, aside sa component nun nabanggit ko na..., so dun tayo sa parang ah, Kasaysayan. Hindi sya nailabas muna kasi kailangan pa muna ng FPIC Process and then meron tayong na-issue na compliance certificate nung 2009, then right after that na na issue, ni-release yung approval on 2009, ni-relase ni FMB. And then after that, nag-integrate po tayo ng 2015 so total of 29,085 sya.

Pag magputol, magka-conduct kami ng plantation development, yung pagpatanim ulit dun sa area na pinutol namin. So yung mga gagamitin namin, bago kami magputol kasi, actually kahapon pinuntahan na yan ng taga-EMB na galing Central from the airport dumiretso po kami sa Nursery so nakita po nila na punong-puno po yung nursery naming ng mga planting materials, ready na po yun, yung mga gagamitin naming na mga seedlings, yung choice of species are Bagras, Mangium, Gmelina, Mahogany, Falcata, at kung ano ano pang mga pwede or suited na dito sa area na itatanim po.

So, wala na akong masasabi.... kung baga para may self-sustaining ang ginagawa namin yung kape yung Durian, yun lang po but then di pa rin po talaga kaya yun kulang pa rin po di pa talaga maka-sustain dun sa operations. Kasi ang pag-protekta namin sa buong IFMA na to sa 29,000 hectares malaki po ang requirement, malaki pong gastusin po talaga at hindi po basta-basta. May naga-slash-and burn, kaingin-making, tapos yung timber poaching na mga illegal, yun po yung nangyari. So as much as possible, kino-cover po naming yung area, pino-protect na hindi mapasok.

Ang pag-sustain din sa mga scholarship, and then pagpapatayo ng mga schools, rehabilitation the road itself, meron parin po. Even though ganun, but then committed po ang company. So what more-wala ngang operation pero may ginagawa, what more pag nagkaroon ng operation. So all of us will be benefited on this Project. Ah, social acceptability kailangan namin yan. So magka-intindihan sana tayo and para masaya yung in the future.

So ito nung 2018 nung nag-apply kami para mag-proceed na find out nila or nakita nila dito base dun sa pag-survey nila sa pag-conduct nung mga studies. So base naman doon, nag-conduct sila ng sa air, water, ah land. So nakita naman nila is dito makikita ang impacts na-note nila, so first, unahin natin yung sa land, so ayan po may pagkakagulo at pagguho ng lupa, pagkasira ng mga daan, pero minimal lang sya kung sakaling mangyari dahil ang ika-cut lang naman natin is planted. Mga posible lang yun but then hindi po yan ang ano dito - minimal so madali natin ma-treat.

And then sa hangin, wala naman masyado ano dito, so whatever na ano man yan is nagagawan namin ng paraan minimal o ano, o yung mga pino-project palang na mangyayari meron na pong mga scheduled na kung sakaling mangyari yan, meron kaming mga mitigating measures, paano namin e suppress o mapano hindi sya mangyayari. Kung mangyayari man, ma-lessen natin yung impact dun sa tao, sa environment.

So dito, nung 2018, and at the same time nung 2019 nagkaroon din kami ng IEC at FGD, nag-interview po sila- Focus Group Discussion, Key-informant Interviews, Information Education campaign regarding dun sa Project yung impacts nun so yung issues and

concerns na na-tackle mostly ang medyo ano lang dun is sa yung sa coffee na pag once na mag-harvest kami may matatamaan kasi nagbigay kami ng ano sa mga tao na nakapaloob dito sa IFMA, na bigyan ng chance na while waiting na i-harvest yung planted trees, pwede silang magtanim dun sa gitna nun. Kaya lang ang nangyari medyo may nakikita o nahuling ang sabi nga nila pwede bang pagka mag-harvest kayo ah yung coffee kung pwedeng mag-harvest muna sila bago i-harvest yung trees eh depende nga ngayon sa usapan. Sakto, buti nalang pwede tayong mag-cut na basta di lang maano na yung harvested coffee nila, naghihingi sila ng permiso na kung pwedeng January lang daw sir, para hindi, para maka-harvest pa sila sa coffee nila. So yun po, yun lang naman po yung issue na nakikita dun, nag-request lang sila kasi actually yung planting materials galing din po sa amin, nagbigay sa kanila ng assistance for that. Ganun lang naman po. Pero mas maganda kung magkaintindihan tayo lahat kung ano mang issue ay pwedeng mapag-usapan lahat yun sa maayos na pamamaraan. So yun lang po. So ito ipapakita ko na yung area. During the IEC kasi, gusto lang naming ma i-protect yung area, pag dumala na yung area i-develop nya. Kasi ang ginagawa ni M&S cut-and-plant, sustainable po sya, hindi po sya yung harvest lang hahayaan- hindi po. Ah malaking requirement po dyan, kaya yung maraming IFMA Holders na wala na it's because they only cut without developing the area. So ito na po, pakita mo yung next na mga pictures. Yan - kung wala po ang IFMA... (loss / damage video footage)

Engr. Mary Therese Gonzales
(DENR-EMB Central)

“So ngayon dadako naman po tayo sa briefing and orientation ng public hearing pati po ground rules sa public hearing and open forum na rin po. So tinatawagan kop o an gating Hearing Officer, si Atty. Jan Edward Ang (palakpakan).”

Atty. John Edward Ang:
(Hearing Officer)

“Magandang umaga po sa lahat. Good morning po. Maaung buntag! So in three languages po mga kaibigan ano po, nagpasalamat po kami sa inyo sa pagdating po ninyo. Latag lang po muna natin, ano po yung panuntunan po natin sa pagsasagawa po ng open forum na ito, ano po. So napapansin po ninyo may mga nagkukuha po ng videos po sa atin, nagre-record po ng ating ginagawa rito, yung talakayan po natin kailangan po kasi namin yung information na manggagaling po sainyo dito po sa conduct ng public hearing. Ano po ba ang layunin namin nito na kinukuha po namin yung inyo pong pang. Kung natatandaan po ninyo, nagkaroon na po tayo ng public scoping po dito po sa inyong lugar. Tama po ba? Ayun po. So nakausap po kayo, may mga nailahad na po kayong mga issues and concerns. Ayun po, base dun sa kanilang unang presentation , naglatag na rin naman po sila ng ano yun mga measures na i-implement po nila base dun sa mga issues and concerns na na-raise po ninyo during the public scoping. Ngayon ah, kung kayo po, nakita nyo po, o dahil nga po hindi makita pwede nyo naman po sigurong lapitan po yung ating pong operator para po mabasa po ninyo yung kanila naman pong nagging pag-aarial doon sa

apat na module. Yung pag-aaral nila sa tubig, sa lupa, sa hangin at sa tao. Dito po i-tackle sa social natin. Ngayon ah, may mga proposals na po sila dito, ah yun po yung sinusubukang i-present po kanina ng atin pong proponent. Ngayon hihiingi po naming ilit yung inyo pong issues and concerns, yung mga komento po ninyo o yung mga suggestions po ninyo na maaring makatulong sa kanila. Sa ganitong paraan, ang amin pong ahensya, ang EMB Central Office po matutulungan po ninyo na makapag-pasya kung mag i-issue kami ng ECC o hindi. Ayun po, sana po dun sa conduct po ng ating pagpupulong sa umagang ito, maging maayos po yung daloy po ng atin pong open forum, ano po. Paano magiging maayos mga kaibigan? Una po, taas po kayo ng kamay pag magtatanong po tayo. Ia-acknowledge po naming kayo, magpapakilala po tayo. Halimbawa, ako po Atty. Jan Edward Ang, galing po ako sa EMB Central Office. Ako po si ganito, taga-ganitong lugar po ako. Ayan, para nalalaman po namin sa record saan location po kayo. Malinaw po? Ayan. Itong public hearing po natin na ito dalawang bahagi po. Nabanggit na po kanina. Isa po para dunsa concerned municipalities-Sen. Ninoy Aquino, Bagumbayan tsaka Esperanza. At bukas po magkakaroon din po tayo para sa Lebak at Kalamansig. Ayun po. Kung meron po na taga-Lebak dito o tsaka taga-Kalamansig pwede naman pong sabihin na rin yung inyong concern po ninyo para sa Lebak at Kalamansig. At kung kayo po ay taga-Esperanza, Sen. Ninoy Aquino at Bagumbayan, pwede nyo rin naman pong ihabol sa public hearing doon bukas yung mga issues and concerns po ninyo. Malinaw po mga kaibigan? Okay po. So simulant na po natin. Isa pa po pala mga kaibigan pag nabanggit na po yung issues and concerns na niri-raise ng ating mga kasama dito, wag na po natin sana ulitin, ano po? Mina-maximize po naming kasi yung panahon na nandito po kami para naman po ma-take down po naming lahat yung issues and concerns. Okay po? Sige po simula na po tayo? Wag po kayo mahihiya magtaas ng kamay para ma-address po naming kaagad yung queries po ninyo. Sige po.”

Datu Andy Pipayan:
Tribal Leader, Legodon
Esperanza, SK

“Wala kaming planong kung halimbawa o-oppose kami sap pag-harvest o operations ng M&S Company sa kanilang pananim dito sa Esperanza. Yung amin lang, kasi dito sa plantation kasi ng kwan ng kompanya dito sa amin sa Brgy. Legodon, marami yung mga tao na napapaloob doon sa area, so ang gusto lang naming doon bago man mag-operate siguro ah, i-identify muna natin yun lugar, yung mga tao doon sa loob ng IFMA, na kung saan yung harvest-an natin ngayon, ah kasi yan din mga nari-reseach sa Sitio, syempre marami din ang mga development ng barangay governments. Tulad ng mga Sitio doon kailangan din naming na makwan, ma-survey halimbawa yung Sitio, pero sa barangay development na ito, Sitio site, tapos yung cutting area. Para sa ganun wala wala na kayong mga ano pa, ano pang mga problema doon, tuloy-tuloy yung pagkwan natin, pagsuporta sa M&S Company at saka sa mataas na office natin na nakahawak ng IFMA. Para wala na tayong problema kung ano yung gusto ng iba, ang gusto naman ng apektado ah sana maibigay ng

gobyerno para sa ganun tuloy-tuloy yung development sa aming, alam naman sa aming mga IP kasi nakwan kami kung baga naiwan kami sa mga development, maghihingi nalang ng tulong sa gobyerno na mabigyan kami ng kwan, para ma-develop din kami. Pero alam naming ang kompanya marami na kaming mga kwan, mga kabutihan na ibinigay sa amin. Kaya kami (palakpakan) ah magsuporta at walang problema, ang amin lang, i-kwan lang, i-plaster lang yung mga tao doon sa loob. Magandang umaga maraming salamat boss."

Proponent's Response:
(Joselito R. Invento)

"So maaung buntag sa tanan! Gusto lang nimo ipahabalo na kining harvesting operations nimo sa kompanya is a 5-year program. Ah, 5-year program ni so naka na ni na ni programa, naa na ni mapanaa sa Year 1, naa sa year 2, year 3, year 4 and year 5. So kining ah, kining na proyekto is naka programa na so siguro sa pag-ano na ni, amo lang ni ipahibalo sa mga affected na mga barangays o constituents. So lima ni ka ano, 5 years program. So, mag-una ta sa Omega paingon dire, so identified pod nato ang affected sitio o barangay. So, daghang salamat.

Atty. John Edward Ang:

"Sir may follow-up question po ba kayo? Wala naman po? Dun sa concern po, dun sa response po sir? Wala naman po? Thank you po"

"Okay po, other concerns po , marami po natin i-raise lang po."

Sultan Rey Dakyas:
(Municipal IPMR, Sen. Ninoy Aquino)

"Ako si Rey Dakyas, Municipal IPMR ng Sen. Ninoy Aquino. Ah para direstuhan tayo sa tanong, ah para masagot kaagad. Una ano ang kabutihan ng mga IPs ng Manobo-Dulangan Napaloob ng IFMA kung harvest-in ang kahoy ng M&S Company. Yun lang po."

Proponent's Response:
(EnP. Realyn Gonzales)

"Actually kung magkakaroon kasi ng harvesting , putulin yung mga kahoy, ah ang mga affected kasi kahit papaano may mga tao doon, mabibigyan kasi ng mga trabaho. Pag may activities kasi ang company, first priority po ang bibigyan ng trabaho is mga IPs. So kayo ilalagay kayo sa mga, kung saan kayo pwede. May mga, alam naman ng HR namin, ng management on-ground kung ano ang gagawin sa inyo kasi, kaya kung may activities kami para sa, once may operations ang company, ang no. 1 na benefited on this is yung mga nakapaloob sa IFMA Area, mabibigyan kasi kayo ng trabaho.

Meron naman po (guidelines). Lahat naka-ready na po yan sya. It's just a matter of implementation. Yun po. Ang mas makakasagot nito is ang on-ground at yung COMREL. Andito po si RDB. Lahat po yun naka-programa. Si Rolando Baloria sya po yung COMREL and at the same time Admin Officer namin dito on-ground.

Rolando D. Baloria:

Magandang umaga po sa ating lahat. Magandang umaga rin IPMR Dakyas. Ah ang tanong kasi, di rin masyado kung ano ang maitulong. Ang isang guarantee ng kompanya employment opportunities para sa mga IPs, walang pili yan. Pero yung alam ko kasi ang tinutumbok, yung pinag-usapan sa tribu yung Royalty. Kaya lang ang demand na

yan na Royalty na sinasabi ninyo dapat manggagaling sa tribu, sa census. Wala man kasi kayong percentage na ipasa o ano man, hinihintay yon ng kompanya. Salamat po.”

Sultan Rey Dakyas:

“Ah, ang follow-up po nito ay masaya po ang buong buong boses ng IP ni Omar Abubulangan dahil sa sagot ni RDB kanina. Hindi po huli ang lahat ay, alam naman po namin na nagtagapang tulong ng M&S para sa kinabukasan ng mga second-generation ng mga IPs. Ganito po ang follow-up ko. Ang una, ah may hindi nag-demand ang IP ng Manobo-Dulangan kung ano lang ang kaya, garantiya ng M&S na dagdag tulong nila sa mga IP napaloob ng plantasyon maliban yung mga IP na hindi napaloob, ah dapat doon nay an sila sa kabilan. Yung napaloob lang. Hindi naman lahat ng Manobo ay tutulungan ng M&S na labas doon sa IFMA. Ang tutulungan lang ng M&S yung napaloob doon sa IFMA, apektado yung kanilang kabuhayan doon sa loob ng IFMA. Kaya maraming salamat po RDB dahil nabanggit mo kanina ah, hindi po ah, hindi natago dun sa Ninoy Aquino ang tulong ng M&S sa mga Manobo-Dulangan napaloob ng IFMA ng M&S Company. Maraming salamat po. (palakpakan).”

Proponent:
(Joselito R. Invento)

“Unsa akong mahibal'an, kining harvesting operation karon sa kompanya limited ang paggamit sa among equipments so limited ang paggamit nato sa equipments so meaning, guikinahanglan ta ug dako na manpower. So ang katong gui ingon nato na ang employment is mahimong benefited ang mga IPs diri sa loob mau naming dakong tsansa because dili ang plano karon dili paggamit ug daghang ekwipo. Ang ekwipo siguro pila lang kabook para lang gamit sa pagloading, pero ang pag-pull out namo sa among tinanom nga kahoy sa area that is manual. Boot ipasabot nagkinahanglan ni ug daghan na tao which mag-generate na ug employment and economy diri sa atong lugar. So mauni among guipasalig sainyo na kung madayon o maaprubahan ning clearance namo, environmental clearance, dako ang matabang namo na employment ni ining lugar kay daghang tao ng kinahanglan.

Katong nay mga karabaw, birahon ning mga kahoy. So limited ang paggamit nato ani ug equipments. So ang employment generation na mag-generate ani na program is dako kaayo ug pabor sa mga tao naa sa sulod sa IFMA so particularly the IPs. So daghan kaayong salamat.

Mr. Arnold Sitjar:
(Punong Barangay, Kuden,
Sen. Ninoy Aquino)

“Ako po si Arnold Sitjar, Punong Barangay ng Brgy. Kuden, Municipality of Sen. Ninoy Aquino, Sultan Kudarat. In connection po sa topic kanina pertaining doon sa identified resettlement area. So gusto lang po naming malaman saan banda or gaano kalawak ang resettlement area na nasakupan ng aming barangay and pertaining sa operation, ah since ah meron mga present planted coffee sa mga areas na mga meron tayong naitanim na kahoy ang M&S, after po sa harvest, yung area tataniman ba ultil ng kahoy or maipagpatuloy ng farmer yung kanilang mga pananim na kape? And in connection pa

rin po sa operation, gusto ko rin po ma-relate dun sa ginawa naming 5-year medium term development plan ng barangay wherein naka-identify kami ng mga farm-to-market roads within the IFMA na meron tayong mga community. So if possible, after ba ng operation, pwede naming ma-develop yung mga spur roads na nagamit during sa operation. Kasi po sa barangay ina-address din po naming yung concern ng aming mga constituents na kailangan po talaga naming ng farm-to-market road within the IFMA Area. Yung lang po.”

Proponent's Response:
Julius A. Aborido

“Ah, Good morning kap noh, babin ni to sa imong pangutana ug sa kung asa dapit me magtanom ug unsa na mga barangay , so ang Tamagan is na identified na sa amo sulod na IFMA resettlement area na sya. So babin pud natong pangutana nimo tamnan pag man ug harvest tanuman pa man na, so mao na ang mandato , mandato sa DENR, cut Cut and PLANT CUT AND PLANT. although naa inyong tanon diha, pero magtanom lang gihapon me pero dili man siguro ra man gud na sya. Siguro, ang amo lang hangyo magtanom me og dili lang patyon. Total di na man makaapas sa inyong kape, so pila pa ka-three years na sya bago pa ma, pila pa, three years bago ma-harvest kung among kahoy yan siguro 25 years. So mas bulahan mo. Mas bulahan mo kay ang inyong kape naa ra giyapon sya. So babin pod atong, atong mga spur lines, so directly, dili me maka-ingon na pwede, so i-clear nato na sa management kung pwede no. Kay sa imong ingon naay community sa sulod. So baka pwede. Pero i-clear pa subject namo i-clear sa taas. Para subject namo direkta sa taas dili me pede mag tubag. Igo lang me nanarbahlo.

Atty. John Edward Ang:

So ang dadag na tanong regarding don sa pagconduct ng operation, kung magharvest ba, tanim agad no?

Joselito R Invento:

Naa lang pod ko ipdasbot parte aning coffee. Kay dako dako jud ning problema sa kompanya bah. Guikan salumping paingon sa tanan.ang plantasyon sa IFMA is nauna, Di ba nauna no? nauna, tinood ba, bago ang kape? So nagtanom man gud ta ug kape, ako lang ipasabot sa tanan, tungod ang robusta kc favor motobo ug nindot while naa sya sa under shade sa plantation. Tama ba? While ang root sa robusta coffee is different sya sa arabica is favor iyang tubo kon naa sya sa ilalom sa shade, shade trees. So, maano na kadaghanan sa tao dili lang ips pati na kristyano, nagtanom sa ilalom sa plantasyon. unya karon ang problema, ako guilakbit ug saysay sa inyo, mao gani pinaka perte na issues na guisakan sa NPAs, tungod kay guina ingon, nga guina damage sa kompanya ang tanom sa IPs. Guinapatumbahan.dili nlng ta na dak-on ang istorya. So ang guinahimo sa company is, nagdangop me ug legal process, pulong-pulong sa mga barangays, naa pay time niabot me sa mga mayors diin, sa presence sa military, diin na agreehan, nga nag ingon ang

mga netibo nga nangayo gani sila pasaylo nga kmi nakatanom me diha. , ug dili dili me manukot ug dili me mangyo ug demorahe, sa kompanya sa ma damage namo na tanaom. Kon gusto nyo katunayan, naa me mga daghan na memorandum of agreement sa LGU, sa nagka lain lain ahensya sa atong gobyerno. So, nasabatan na nato tanan. So ang kompanya human pagputol namo og kahoy karo, mandato namo na motanom after moharvest. Paningujaon pod namo na wala moy madamage na tanom. Kay nagkaintindihay man ta ana. Nauna ang kahoy nagtanom mo ug kape.

Ah, syempre, siguro, sa guina ingon pod nako, amo pod na ipa abot sa management, kon pede ba, ah tan- awon, ipasabot pod namo.

Insular Pipayan:
(Kagawad, Brgy. Legodon)

“May clarification lang po kaunti dun sa, parang suporta kanina dun sa kwan ni Kapitan ng Brgy. Kuden. Kasi sabihin man sa hindi ito talaga yung talagang gina-muni-muni ng mga community na sa loob ng ating IFMA. May kaunting clarification lang po doon sa area kasi dito sa kwan, dito sa loob ng IFMA, mayroon tayong tatlong kwan dyan, kahit yung meeting ng mga tao natin dyan, matagal na yan umabot na sa ating mga management na, isa na yung sabi ni kwan kanina yung resettlement area. Then meron pa tayong re-visited dyan na area tulad yung mga potten area yung alienable and disposable area, pero napaabot narin namin sa kanilang manager. Meron tayong 57 hectares dyan nasa loob din yan ng IFMA. Then, mayroon tayong bagong visited dyan na under sa KTD Project series of 1983. Yun po ay sa pagtingin natin sa kwadra ng ating IFMA Holder na ito nasa loob parin po sya ng IFMA. So yun sana ang gusto din namin tatanungan na, kasi about sa halimbawa sa mga pagpatuloy ng development natin IFMA tsaka yung renewal, alam natin yan may mga comprehensive process talaga dyan tulad ng DENR at NCIP may mga kwan dyan sila may mga JAO. So ang amin lang dyan, wala na kaming kwan dyan kung ano man ipagpatuloy ng IFMA, gusto lang namin malaman, aanuhin talaga yung yan, yung yan na mga area na napaloob ng IFMA, kasi meron kaming kaunting pinapa-abot doon. Sa loob ng 25 years na nag-operate ang IFMA sa community ng IP, medyo nagkami-kamirantra ang mga population namin. So kaya yan ang gusto sana namin ipaabot na kung paano magamit na po ng IP, ah yung mga community na nasa loob ng IFMA yung mga ganyan na lupa. So ganun lang po.”

Joselito Invento, M&S:

“The management is naghulat ug survey. Nasabtan namo na nagkadaghan ang IP. Syempre ang resettlement site para sa paglipat, makit-an sa vegetative cover sa IFMA naay 700 hectares intended para sa relocation site, na na release. Tapos, for how many years, nasabtan nato, nagkadaghan, additional na bata, additional na tao. So kmai nman para m makadecide for additional resettlement, we are waiting for survey. Survey. Census pala.. census.census hindi survey . census sa mga tao. Kinsay nadagdag. Because kay kami naa me listahan atong dati., so kinsay nadagdag. Kay kana pong mga census na inyong ihatag sa amo, amo pod mh

tan awon kon kining tawhana is mao ang original na naa diha sa area. dili ba ni tong imported nato na mga tao nga gusto lang nila mopoyo dihi.. Gusto namo tong pmilya ninyo nga diha dati. So we are waiting for census. Para maka mka decide ta ug additional resettlement area. Nasabtan anmo na, nagkadaghan ang tao. Ako kaniadto, isa lang man ko, pero karon daghan nman me. So nagkinahanglan ko ug dagdag na area. Nasabtan namo na but we are waiting for the cesus. Thank you.

Ah the barangay, ah siguro sila, the affected then for verification namo, how true, na kining mga tawhana na ilang gui-submit is existing.

Arnold Sitjar:

“ Punong Barangay Arnold Sitjar ng Barangay Kuden. In connection po dun sa increase of population, hindi pod nato, ah dili pod nato na sya ma-pugngan tungod sa ginatawag na inter-marriage. So maingon nato karon nga, sa unang panahon mao lang nang family pero karon daghan na. So that's why, ang problema dili gid madula. So amo man lang, mapungkuan ba nato ni, na ma-determine nato kun kinsa ba natong actual sa sa mga concerned areas. Mas paspas sa pag-increase sa population. So di man nato macompute, na dili na sila mag-pamilya. So meaning naagi mga dili na original sa amo ang mga respective area o jurisdiction. So pwede ba nato na sya mapungkuan utro, in order na ma-reconcile nato.”

Joselito R. Invento, M&S:

“So wala man siguro nay problema, pero ang pagdala man gud, we want sa tanan dili lang mi isa sa barangay because ang pag pick-up namo ani didto sa management without recommendations, recommendations namo pod dire dito sa local management is gusto namo tanan. Dili me gusto na Brgy. Kuden lang- so kung pwede ug nag-recommend na magsit-in para ani na ma-resolve yung issue is gusto namo ang tanan na mga barangays and sitios. Para pod isa ang pag take-up namo didto sa among ah taas namo na management with our recommendation para maisa. Di namo pwede tagsatagsaon. No? So baka mag set ta tanan.

Sultan Rey Dakyas:

Hindi eto sa magaling, isang beses, dalawang beses lang. sa tatlong beses hindi na ako magpakilala pa. Sultan Rey Dakyas po from Sen. Ninoy Aquino. Sorry sa atong mga kauban na IP. Daw ako na ang pinaka-bright pero gihatag ko lang ang akong naisipan na akong na plano. Una, dalawang tanong na kanina yung natanong ko. Pero sa likod na yun nagpapasalamat ako. Bale ganito. Kung wala talagang M&S nakadepensa ng ancestral domain, halos maubos na pinabili o prenda ng mga IP yung mga lupa (palakpakan). Kaya sana ano, kung magaling man tayo sa bunganga, magaling tayo magsalita, magaling din tayo magsasaka sa lupa. Maraming salamat po.”

Proponent's Response:
(Joselito R. Invento)

"Maraming salamat kaayo na-recognize ninyo ang among company. Ako lang ipagpa-hibalo sa inyo. The same as TAMASCO issue. Istoryahan taka sa about sa TAMASCO. Ang TAMASCO is 1,600 hectares in which kanang TAMASCO, claim. The CADT claim of the TAMASCO IS 1,611 hectares in which ang kanang 1,611 has. Naa diha ang Block 5 sa M&S 18-2007 na 300 hectares. Pero kanang 300 hectares sa TAMASCO, ah, sa M&S na nahisulod sa CADT sa TAMASCO is dili tanan, so say mga 80% of the Block 5 is nahisulod sa TAMASCO. Nya, karon unsay nahitabo, ang tanang na kana na mga area nahurot ug baligya, what is remaining is only the block 5. Kung gusto mo ebidensya, among ipakita tanan sa inyo ug kinsay tag-iya anang area karon sa TAMASCO. Klaro klaro no? So the same. Salamat kayo.

Agustino V. Fajardo

"Good morning everyone! Anyway I'm Augustino Fajardo, School Head of Tulale Elementary School. Concern lang sir. So every year, naga-implement kami dapat sang tree planting (of trees). Ang SPG officials kag ang graduating pupils gina-require namon magtanom sang kahoy kay ang among school side almost 10 hectares. Kag kalbo na gid sya sir, so, kailangan jud namo e reforest. Pero ang problema wala kami enough nga seedlings, kon basi may ara kamo mahatag for free ah, pasalamat gid namo kon may ara sir"

Julius Aborido, M&S:

"Ah, salamat no, sa imong concern. Pwede, maghatag daw materials sa inyo para ano, pam-planting, or tungod sa kalayo, ah siguro pwede man mi mag-raise didto. Mag-raise nalang mi didto ug seedlings para intended na imyong kwan, project.

Agustino V. Fajardo:

"Concern ko pa sir, kasi inside the school campus, may ara kami nga daw apat kato ka puno na pine tree, mangium. So base abi sa hazard mapping sir, daw kadagko didto , kahdlok sa pupils, so ang pamangkot ko lang sir kung kasali ba to sa cutting of trees sir? Sa hazard mapping namon sir delikado."

Julius Aborido, M&S:

"Bisan sulod na sya sa IFMA, although kami ang nasa IFMA. Ang concern ninyo is putulon ang hazardouz trees, dili mi authroize nga mohatag og permit. So DENR gihapon. Bisan, bisan nang kanang inyo hang trees kon naa na sya sulod sa IFMA ug mangayo ka ug clearance dili me makahatag ug permit.

EnP. Realyn C. Gonzales, M&S:

"Additional lang sa iyang ano no, iyang tubag. Ah, tinood nga dili covered namo, pero pwede mi maka-assist sa inyo. So siguro maghimo lang mo ug mga request regarding sa katong pagputol, pero inyoha nang documentation, mu-assist ra mi pertaining to helping you kung papaano mag-apply ng tree cutting kasi ang request nyo for tree cutting is mag-guikan sa DepEd, dili sa amo. So we can help you by that."

Alexander Espinosa:

"Okay, good morning! Ako pala si Alexander Espinosa, TIC ng Elementary School ng Monteverde Bagumbayan Sultan Kudarat. So yung concern ko lang is yung parang wala naman sigurong forest harvesting dun sa area, ang concern ko lang sir regarding sa DepEd, yung school side. Sino ba yung legitimate na magbigay sa amin ng Deed of Donation ah para sakaling madevelop namin yung area para, or ano nalang kasi pasok din naman daw yun sa ano sa IFMA. So kung pwede para ma-secure din naming yung mga clearances naming sa Division at tsaka yung pag-develop ng area kung sakali para in partnership sa M&S, makahingi din kami ng tulong kung paano ba namin mapa-taniman ba naming ng kahoy yung ibang area kung sakali. Yun lang din po.

Julius Invento:

Kana na problem is daghan so mga existing na mga eskwelahan within the IFMA Area. So Plamango, ki Mam Sheila. So kami wala jud mi klaro na guidelines ug paano na? Because kami, dili man gud ni maoy tag-iya. So I think, yes sir, the Regional Executive Director.

Director Omar Saikol:

"Ah yes good morning uli. Ang sa school is meron tayong tinatagwag na special patent. So mag-apply kayo sa Regional Office sa DENR, hindi sa EMB, kundi sa DENR. So this is a concern of DENR Region 12. Apply-yan nyo ng special patent. Wala syang, wala syang kwan, kung halimbawa- sa Region 12, meron tayong ah problema sa pagtitulo sa South Cotabato at saka Sarangani pero pagdating sa Special Patent hindi sya kasama dun sa kwan sa kwan. Apply lang ng Special Patent kasi kwan ito eh, Government Institution. So agad-agad yan, gagawa na yan ng PENRO. Kung halimbawa anong concern ng PENRO ditto? Sultan Kudarat diba? So yung PENRO sa Isulan Office magpunta lang kayo dun and then mag-ask kayo about Special Patent for your school, para mabigyan ng titulo.

Ms. Sheila Rollorata:
School Head, Plamango

"Good morning po sir, good po sa lahat! Sheila Rollorata po the school head of Plamango Integrated School, ditto po sir. So same concern po kami ni sir regarding sa school site. So every March po sir, malapit na naman ang March , iipitin na naman po kami kasi wala kaming dokumento sa, regarding school site. Yung sabi ni sir na pupunta doon sa PENRO may mga kasamahan na rin kami sir na pumunta doon tapos pinabalik kami sa NCIP, nag-usap-usap na rin po pero hanggang ngayon medyo malabo parin po yung resulta. Pero palagi na kaming nagkikita kita kung ano po ang dapat na gawin. Medyo nakalimutan ko lang nadoon yung record ko. Mayroon lang yun na Certification sila na ibinigay ba, pero NCIP man yun sir, ang nagbigay sa amin.

Atty. John Edward Ang:

"This question is posted against who po, against who po? Sa Proponent po ba natin o sa EMB po?"

Ms. Sheila Rollorata:

"Ah, DENR concern sir"

- Atty. John Edward Ang: “Okay po, so okay. Narrow down lang po natin mam noh. Siguro kasi yung concern is regarding siguro ano yung maia-assist ng ating proponent para dun sa on-going na application ninyo, permits and clearances noh kasi considering that you are operating within the IFMA. Is that how you want your question to be phrased po?”
- Ms. Sheila Rollorata: “Yes sir”
- Atty. John Edward Ang: “Okay po. So sir”
- Julius Invento, M&S: “So sa side ng IFMA is we are willing to relinquish the area, to give up, in favour of the school”
- Ms. Sheila Rollorata: “So pwede po ba kaming humngi sir ng kahit anong dokumento galing sa kanila. Halimbawa ano baa ng dapat dyan, MOA?”
- Joselito R. Invento, M&S: “Depende nga sa proseso nga. Ah depende sa requirements nga pangayuong sa DENR. Because ang amo ra diring i-submit na tenurial instrument so whatever document na kailangan ng DENR is ibibigay.”
- Ms. Sheila Rollorata: “Madali lang po ba sir? Kasi sir parang dalawang taon na kaming pabalik-balik sir ba wala pa rin.”
- Director Omar Saikol: “Sabihin nyo na special patent para sa titulo ng naming school. Dinala yan ma-denry. So gagawa nyan sila ng paraan”
- Ms. Sheila Rollorata: “Maraming salamat po sir. Nasagot na yung gamo-gamo sa utak namin”
- Atty. John Edward Ang: “Okay po. Thank you very much po. Other questions and concerns na hindi pa po natin natatanong kanina or hindi po related dun po sa mga nabanggit po kanina?”
- Kap Arnold Sitjar: “Good morning once again. Ito po ay patungkol sa Housing Project ng NHA. Sa ngayon po ay ini-implement sa aming barangay, particularly sa Sitio Tamangan, Brgy. Kuden na nasakupan din ng IFMA. Okay, so as for now, medyo nahirapan kami sa implementation dahil yung area ay merong mga existing na mga tanim na kahoy. So lately, medyo nagkaproblema rin kami sa implementation dahil walang daan nung magandang communication yung proponent, tsaka yung IFMA. So ano po bang magandang gawin naming sa ngayon na on-going ang implementation ng Housing Project.”
- Atty. John Edward Ang: “Clarify lang daw sir kung sinong proponent?”
- Kap. Arnold Sitjar: “Yung Local Government po.” Ang recipient ay yung Manobo Dulangan Tribe ng Sitio Tamangan.

Proponent's Response:
(Joselito R. Invento)

Sige so, gusto lang namon ipahibalo sa tanan noh na ang IFMA is supporting mi sa inyong project, dili mi against, we are supporting. Suportahan man na namo because that is for the benefit of the IPs. Ang point lang is, ang area kasi is under forest land. So syempre, mag-convert kag forest land into residential or whatever, easy lang ang requirements. Aram mo lang ang pangayo is kailangan nato i-comply ang requirements for the conversion of their forestland into residential or resettlement. Ang ano lang ipangayo namo is the compliance of the requirements. Eh syempre ma-question ako ug mi because the area is under IFMA sir. It's inside the IFMA, so conversion of forestland into residential or resettlement is dapat na ay requirements. Ang requirements amo na naipasa sa inyong tanan, which kailangan ng LGU to comply. So akong ibalik we are not against the project we are supporting kaya lang naa may mga requirements na kailangan natong i-comply."

Atty. John Edward Ang:

"Sir ano sya eh, same situation sya yung sa DepEd"

Kap. Arnold Sitjar:

"Ah, yes sir. And ganito po kasi nangyari sir. Merong letter na naipasa sa IFMA, meron din sa CENRO Kalamansig. And sa explanation po ng IFMA, Yung Local Government po ang mag-process, while the Local Government in-endorse po ng Local Government sa concerned agency, particularly ang DENR, na nagmula tayo sa CENRO. So sa ngayon po ba, ibalik natin sa proponent yung proseso or thru sa concerned agency na magpo-proseso din

Atty. John Edward Ang:

I think ang question mo kasi, di masasagot din ni M&S yun eh. Kahit kami sa EMB di rin po naming masasagot. Siguro kung magbi-base ako dun sa discussion natin kanina, dapat ang query mo ay papunta doon sa kung saan kayo nag-submit or through the proponent which is yung Local Government po ninyo. Since sila naman po yung proponent ng Housing Project tama po ba? Oh yun po, so dapat po sila yung kinukulit po natin regarding sa matter na yan kasi land conversion nga po sya eh na matter. So yun po ang maiigi po na makasagot nyan is yung proponent and yung DENR kung saan po ang opisina nila. Okay po?

Director Omar Saikol:

Well tama yung sinabi ni sir noh sa management ng M&S. Before natin maipagpatuloy ang Project sa forestland, icon-convert natin into Alienable and Disposable. Sa pag-convert ang pinaka-basic na requirements is for the congress to enact a law converting forestland into alienable or disposable or agricultural land. So ang maipapayo ko na lang, ang ma-advise ko sainyo sir is, this is a concern of the DENR. So, sakop tayo ng Region 12, punta lang kayo sa Aurora sa Marbel and then malalaman ninyo kung ano ang dapat ninyong gawin. A little bit complicated because IFMA. IFMA rin. So, but sila ang makakasagot talaga nyan sir. Pero pinapaalam ko lang

sainyo na ang basic requirement talaga is for the Congress to enact a law converting forestland into A&D. Ganun po.'

Kap. Arnold Sitjar:

Ah sa ngayon po kasi on-going na ang implementation so ano po baa ng pwedeng maging solusyon sa present situation na magkaroon tayo ng legal process din po?

Atty. John Edward Ang:

Sa DENR po kayo magsadya sir, di namin masasagot po kasi yan sa totoo lang po. Iba po kasi yung proseso na tinatakbuhan po nun sir. At tsaka ibang concern po sya. Di po sya related po dito sa application po ng ECC ni M&S po. With all due respect sir, magsadya po kayo sa opisina sa DENR po. Yung sa sinabi po ng atin pong Regional Director. Sila po yung the best na makakasagot sa inyong query po. Okay po.

Sa likod po may nagtatas ng kamay kanina, sino po sila

Kap. Julito Inion:

(Punong Barangay, Sto. Nino)

Thank you very much sir, Punong Barangay po ng Sto. Nino, Bagumbayan. Ang tanong ko lang po sir, related dun sa IFMA Integration dun sa bagong part ng Bagumbayan na almost 310 hectares noh, konti lang sir. Pero dahil doon sa existing na-issue related doon sa TAMASCO claim na napaloob doon sa IFMA, so is there any possible sir na ma-award or ma-releaaese ng M&S ang kanilang claim doon sa covered area ng IFMA 18-(2007) po.

Proponent's Response:

(Joselito R. Invento)

Pwede. Kay naa sa terms and conditions kung guingon. Public demands, pwede. Pero naapod ito sa terms and conditions na ang IFMA is mag-ask pod ug kanang guinatawag nato ug due compensation. So kung usa mong ma-develop, unsa na ang existing, is e compensate bago ire-release namo ang area for the people.

Kap. Julito Inion:

Ah, thank you sir. Ah kung ano ano pala sir, is ah, sir itong mga claimants na ito, may mga proseso talaga sila gawin, ah i-endorso through DENR and then M&S para makita nila yung required ah documents para ma-process o ma-release sa kanila yung ano, yung demand nila.

Atty. John Edward Ang:

Yes sir. Acknowledge naman (ng proponent). Other questions and concerns po na hindi pa po nababanggit natin mula kanina?

Kagawad Felomino Ngag:

Ako si Felomino Ngag nanggaling sa Brgy. Salumping. Ay hindi nakasama si Vic, Kapitan namin, may pinuntahan sya. Kami lang tatlo nagpunta rito, kagawad Vicente si kagawad Malem pati ako. Ang gina-anong ko lang sir, may hindi pa nabanggit kanina. Ang tanong ko, bale tanong lang ito sir noh, ah tanong ko kay sympre yung kwan, yung ginatanom ninyo, marami yung reforest dyan. Ano, madala ba ba yung reforest ninyo o tanim lang nga. Tanong lang sir, eh kasi yung kwan kay ang gina-anong ko lang gina-pansin ko lang, kay

syempre yung mga tanim marami yung mga kahoy dyan na reforest ang ano, yan ang gina-tanong ko. Tapos yung isa pang tanong ko, kung halimbawa at least na-ano yung kwan ang combine nya, pwede ba maapektahan yung CADT. Siguro yung kwan ko lang, yun na nga gina-ano ko kasi syempre itong IFMA, itong IFMA nkapasok yung IFMA sa CADT. Yung lang gina-tanong ko. Syempre yung kwan, lahat ng mga problema, alam ni sir Baloria. Pag may problema magpunta sa kay Kapitan daingan. Pero nagpunta ako dito ang ginapag-usapan paano ang connection sa mga tribu ko. Paano ang pagdalagan sa requirements sa kompanya sa IFMA dilio sagabal sa mga tribu ko. Yung lang sir.

Proponent's Response:
(Joselito R. Invento)

So ang gina-apply-an karon sa company harvesting operation, kaning operation is hopefully yung clearances will be granted. Ang gina-applyan namo is only the plantation species. Dili mi mag-harvest san tinatawag nato na mga natural species. Only the plantation species- acacia mangium, gmelina. Kato lang tinatanom sa kompanya. Pero katong tubo sa kalikasan is not included, hindi kasali. So ang tanong lang naman.

Kgd. Manuel Galing:

"Ah may isa ako pangutana sir. Ah pareho sa, ah ako po si kwan, si Kgd. Manuel Galing. Taga Brgy. Margues po Esperanza. Ah pareho ng Sitio Kanalan Sir, sakop ng Marques. Ah syempre, gin-segregate na na ninyo sa amo ah mga IP sa Canalan, pag-segregate, may mga kahoy diha na mga bagras, gmelina, mangium. Pero laka na sya sir, masulod na pa ba pag operation. Or kuhaon na or dili na?"

Proponent's Response:
(Julius A. Aborido)

Depende noh kung mauna'y mong hinayngon laka kagawad. Pero depende nga na. Pero kung gawno kalayo, gikan sa mainline, very costly na, lugi na ang kompanya kung kuhaon pa yan na laka laka. Ang dapat yung daghan.

Kgwd. Manuel Kaling:

Maunang, daku na to sir, sayang man to na dili makuha. Maayo ta mapahilutan pa kami. Ato lang. Daghang salamat.

Julius A. Aborido:

Dili na sya sayang kagawad kay makatabang pa sa kwan noh sa, at least naa na na sya diha na tanom. Dili na sya sa sayang. Pero kung ipakuwa na sya sa kompanya, tan-awon man kung dili lugi. Pero kung lugi, para kuhaon pulo kabuuk, dili na man siguro.

Atty. John Edward Ang:

Okay. Natalakay po natin yung tungkol dun sa pag-identify ng location and boundaries, para nga naman dun sa pag-operate ng parting build at tsaka ng harvesting. Nariyan na din po yung concern regarding sa benefits ng mga IPs po natin, ang mga Manobo, ang partners po natin sa loob ng IFMA, nariyan po yung pagtalakay tungkol sa pagkakaroon ng partnership sa pagkakaroon ng farm-to-market roads. Nariyan na rin ang natalakay na issue regarding sa land classification sa loob ng IFMA at ang, yung mga projects ng school regarding sa tree planting as well as dun sa mga land reclassification and other projects within the IFMA po.

So yun po yung summary ng issues and concerns na natalakay natin sa umagang ito. Nagpapasalamat po ako na Hearing Officer po ninyo dahil maayos po nating naisagawa yung conduct ng public hearing. So hindi masama na palakpakan natin ang ating mga sarili mga kabigan. Muli po nagpapasalamat po kami mga taga-Central Office dahil malaking tulong po ito sa aming gagawing pagpapasya kung atin pong proponent ay makakakuha ng kanilang ECC o hindi. Gayunpaman, hindi naman po natatapos ang prosesong ito, dahil bukas meron pa po tayong public hearing. After ng public hearing, meron pa po tayong mga steps way forward po para maihabol pa po natin ang mga concerns po natin, ano po? "

Engr. Regina Paula Eugenio: "So natapos na po yung Public Hearing natin dito sa area na 'to, so kung iniiisip nyo kung ano ang next steps, so sa kasalukuyan po kasi ang ECC application po ng M&S ay under review and evaluation po ng aming opisina. So nakapag-review na po kami ng technical, naka-dalawang review na po kami. So lahat po ng inputs po ninyo ngayong ating public hearing makikita nyo po documented po yan and may nagsusulat din po sa party po ng EMB at sa parte ng proponent at kanilang preparer. Isa-submit po nila sa amin yung documentation, yung nangyari nangyari ngayong araw na to, yung full documentation po. And makaka-asa po kayo na lahat nung mga issues and concerns po ninyo isa-sum up po yan dun sa kanilang isasumbit sa amin na Environmental Impact Statement. So critical. At nagpapasalamat po kami dun sa mga inputs po ninyo lalo na po dun sa mga pag-identify, yung mga kailangan na i-identify- sino ba yung mga sa settlements na tatamaan, at yung mga structures, mga schools na nandito. Lahat po yan isa-sum up po yan dun sa kanilang dokumento. So yung normal na proseso po kasi natin, after po ng public hearing pino-post po namin sa website. Kaya lang nung nakita po namin dito sa area, walang signal. So siguro ang gagawin po namin ipapaki-usap po namin sa proponent, sa M&S, na bibigyan po yung mga barangay captains po dito ng kopya kung ano po yung napag-usapan natin ngayon at magpapadala po kami ng kopya po yung revised na study po nila. Para makita po ninyo na ito po yung napag-usapan po natin. Kasi tapos kung halimbawa magkakaroon kayo ng karag-dagang suggestions or may additional issues and concerns po kayo na hindi naisama dun sa documentation, kung pwede po ninyong ibigay sa M&S and then kukunin po namin sa M&S yung kanila, ah inyong suggestions, or pwede nyo pong i-deretso sa aming EMB Regional Office and then sila po yung magpo-forward sa amin. Or kasi, baka po mas matagalang kung deretso nyo pa ipo-forward sa amin thru mails. So kung sino po yung mas malapit na makakapagpadala sa amin ng mas mabilis, ah yan ay tatanggapin naman po namin, sa kahit na anong paraan.

So nagpapasalamat po kami sa inyong partisipasyon and sa amin din po sa Central Office. Nagpapasalamat din po kami sa aming Regional Office, RD and Ma'am, sa pagsuporta po ninyo at sa pagsuporta sa

EMB sa proseso po ng Environmental Impact Assessment. And hindi po rito nagtatapos lahat. Kasi kung maging positibo po ang pagrereview ng ating ECC, tatawagin din po kayo at magiging part po kayo ng pagbabantay naman kung talagang ginagampanan ng M&S yung kanilang commitment sa pagbabantay sa ating environment. So makakasama po kayo sa- siguro yung mga tribal leaders din natin, mga barangay captains, mga representative po, mga representative din ng farmers, school. Makakasama po sila sa tinatawag nating Multi-Partite Monitoring System. Yun po sila po yung katulong ng EMB sa pagtingin, kasi ang layo po nitong area so baka hindi rin po sya laging mapuntahan. So dapat at least merong MMT na tutulong sa amin para mag-monitor kasi nga nabanggit kanina, ang i-harvest lang po nila is yung mga planted, so hindi po nila pwede i-harvest natural. So yun po, pag may nakita po kayo, sasabihin nyo po yun sa amin na sila po ay pumutol ng natural kasi hindi po sila pwede under the E.O 23. So may batas po tayo na hindi pa po yun nali-lift na hindi pa sila pwedeng ah- , ang pwede lang po nila i-cut, i-harvest ay yung kanilang planted. So yun lamang po at muli kami po ay nagpasalamat sa inyong partisipasyon.

ANNEXES - K

Transcription of Public Hearing for Day 2 – Limulan, Kalamansig

TRANSCRIPTION OF PUBLIC HEARING
PROPOSED FOREST RESOURCE UTILIZATION AND PLANTATION DEVELOPMENT PROJECT
IFMA 18-2007

January 16, 2020

Barangay Covered Court, Limulan, Kalamansig
(Municipalities of Lebak and Kalamansig
Province of Sultan Kudarat)

Opening prayer led by Mr. Toto Ustan, Chapel Kaabag of Lebak.

Philippine National Anthem conducted by Ms. Cora Baylon.

Engr. Mary Therese Gonzales, DENR-EMB Central:

From CENRO Kalamansig naman po, andito po si Joey Delauta, CBFM Coordinator, si MR. Capalong Managinding, Forester, si Aisa Lasis, Information Officer at from LGU naman po si Mr. Jerry Cantor and from M&S company andito po si Mr Rolando Baloria ang kanilang Admin/ Comrel; si Mr. Julius Aborido ang kanilang Forester; si Ms. Realyn Gonzales, Project Incharge/Forester; at si Mr. Raenald Lucena, Forester; Cora Baylon ang kanilang Consultant po.

So, ang ating participant sa araw na to, ay ang munisipyo ng Lebak at Kalamansig. So, tayo po tayo pag tinawag ko po ang mga representative, Tribal Leaders, meron po ba, Farmer, Bargay Captain, Kagawad, Brgy Kagawad po, Religious sector, DepEd salamat po sa pagpunta. So ito po ay pangalawang araw sa public hearing, ito ay para sa Munisipyo ng Lebak at Kalamansig, so inaanyahan po kayong makinig para sa ating programa para mainitindihan po natin ang pinagdaanan ng proponent at ang resulta ng kanilang pag aaral. So kung may mga tanong po kayo at issues and concern, mamaya po may open forum para maisabi nyo po kung ano ang mga ah concern nyo regarding sa proyekto, tungkol sa proyektong ito.

So para po sap ag explain sa legal na processo na pinag daanan ng ating kompanya, tinatawagan ko po si Engr Regina Paula Eugenio.

Engr. Regina Paula Eugenio, DENR-EMB Central:

Magandang umaga po, maayong buntag, pasensya na po hindi po kami marunong magbisaya. Kmi po ay galing sa MGB central office, so papaliwanag ko po kung bakit andito tayo ngayon. Bakit po may public hearing na ganito. Nabanggit ko kanina na ang M&S nag aapply ng kanilang ECC. Ito pong Environmental Clearance Certificate na ito ay ini issue ng DENR sa isang kumpanya bago po magkapagsimula o makakuha pa po ng permiso o mga permits o clearances sa ibang govt agency. Eto pong ECC na to dumaan po sila sa proceso ng EIA o paggawa ng Environmental Impact Assessment so inaral po nila ano po ba ang mga potential o epekto.....(loss or damaged video footage)

EnP. Realyn Gonzales, M&S Company Inc.

Hello, maayong buntag sa tanan, no? salamat sa inyong pagtambong. Ug ang akong dakong pagtahod sa mga nagkdaiyang ahensya nga nitambong karon hilabi na jud kay kapitan Seguano. salamat sa imong pagdawat sa amo a dinihi og pagpa facilitate aning amoang proyekto.

Ania mi dinihi para about sa, para ipahayag, kung unsa ang among proyekto. Ang proyekto namin is about sa Forest Resource Utilization Project under kini sa IFMA 18-2007. So kaning IFMA 18-2007 kini ang license na gitagaan me ug katungod sa DENR nga magputol at the same time magdevelop sa area. Dili lang putol kundi magdevelop. Pangangalaga sa kabukiran, at the same time pagprotektahan sa kabukiran ug pagpaunlad niini. So aside sa, among insintibo, bilang taga, tawag ani, bilang pag ah pag putol, so kung unsa among tinanom amo a dyud tong maani. Mao ni xia, ang lokasyon sa among IFMA nag cover sya sa Lebak, Esperanza, Bagumbayan, Senator Ninoy Aquino, and Lebak, Kalamansig. Yon po, so ang total area na iyang guisakupan mao ang 29,085. So naa me 29,085 hectares po sa buong entire IFMA area. So mao ni sya, ang makita ninyo, ang pula na sa Esperanza, green mao na ang Kalamansig ang Senator Ninoy Aquino mao na siyang kulay yellow, gray ang Bagumbayan. So ayon po.

So ang pangunahing layunin ng pinagsamang IFMA is mapabuti ang pamunuan, pangangalaga at pamamahala nito. So nabangit ko na po kanina ang mga natural species ah aanuhan lang namin protektahan lang po. At the sametime, kasi hindi po namin basta basta maputol yon it's because meron po tayong E.O 23. So normally, ang gagawin lang naming pag develop sa area is yong sa open brushland. Yong open , tapos na degrade, nabawasan na ng ano. Doon po kami mag ah, ang degraded area kasi, e-convert namin into plantation kung allowed kami. As long as inallow kami, we are going to plant various species like ah mangium falcata, mahogany at iba pa so gmelina, falcata at unsa pa bayong choice of species namin.

So, yan po yang mga nakuha naming permits. Una ang istorya po nito, ng IFMA 18-2007. Nabigyan po kmi ng lisensya noong 2007 po nabigay po sa amin yan pero napending lang ng konti because kailangan naming kumuha ng compliance certificate issued by NCIP, nung nakakuha po kmi, dumaan kmi sa process na issue po yon ng 2009. Nung na issue yon sa amin, at the same time, from April o nong May, inisue na rin sa amin ng FMB yong approved na IFMA 18-2007 sa amin. So kaya lang, nung 2015, na-integrate po yan sya, so nagkaroon ng 29,085 ang buong IFMA 18-2007 po.

So yan po ang kabuoan, makikita nyo po doon, yan po ang vegetative cover namin, meron po syang portion sa production residual, yon ung naka ah, puro natural lang

po lahat yan. At pinoprotektahan lang po hindi po naming ginagalaw even until now. So ung DRF andyan din, puro natural din hindi po namin ginagalaw, only the planted specie lang po yong aming pinuputol. Tapos kung may open brushland man, yon po ay dinedevelop po namin.

So ang komposisyon o pagkakabuo ng proyekto, una meron kaming mga nursery. So doon sa nursery. andon naman, alam nyo na rin po, kasi, karamihan po dito is farmers po, meron kaming mga semilya....(loss/damage video footage)

Atty. John Edward Ang, Public Hearing Officer, DENR-EMB Central:

Magandang umaga, maayong buntag sa inyong tanan, open forum po tayo ngaun, ano po. Nakita po natin ung presentation po ng ating pong proponent sa kanilang proyekto bago ko po simulan ang ating open forum, discuss ko po ng madali yong summary ng issues and concern na natalakay ng iba kahapon. Gusto po sana naming mailapit sa inyo ung issues and concern na yon para hindi na po natin ulitin ung mga tanong na iyon, ano po. Gusto kc naming ma maximize natin yong panahon na meron po tayo dito, para sa kaalaman ng lahat ang mga bagong issues and concern na meron tayo na hindi pa na bri-bring up kahapon. So may mga kasama po tayo galing po sa Lebak at Kalamansig kahapon na nakasaksi sa isinagawa naming public hearing. So para po sa kaalaman ng lahat, eto po yong mga issues and concern na na bring up kahapon. Una napo dyan ay.....(loss damage video instead voice over) yong mga benefits po ng ating mga IP's, nariyan napo yong issue regarding don sa mga ah sa employment opportunities at doon sa ng royalty fee, pangalawa po ung issue regarding sa mga partnership codes na maaring makipag partnership sa mga barangays natin, nariyan na rin yong regarding sa lot title application po na nakapaloob sa loob ng IFMA, ah na kunwari alienable and disposable, ah o nasa category ba sya ng department of agriculture o kaya nman po sa mga special ah use o special permit for use gaya ng mga eskwelahan po, ayon po. Nariyan na rin po ung issue regarding sa issue ng tree planting project in partnership ng mga school natin na nabring ng participants po from DepEd. Na bring up din yong identification ng boundaries para po sa location ah doon sa pagtatanim ng mga kape, sa mga kape po natin, andyan na din ung issue po ng mga benepisyo sa mga settlers na nasa loob ng ifma at nasa labas ng ifma. Eto po yong summary ng issues and concern na natalakay po naming kahapon. Ngayon po ibigay po, ilapit na po natin ang microphone para maayos ang daloy ng ah ng open forum, ano po.

Kung magtatanong po tayo, magtaas lang po ng kamay para ma acknowledge po namin kayo. Ang hinihingi lang po naming, hingi natin is yong kaayusan, un proper decorum po sa buong panahon ng forum po natin. Bakit po? Lahat po ng sinasabi po natin dito po sa open forum ay recorded po. May nakatayo po ng ilang naka record, na nagvideo sa likuran may nagrerecord ng audio po sa harapan. Para lahat po ng sinasabi po natin ay word for word po ay makadocument po namin yan. Kc po

gagamitin po naming datus na isasagawa naman sa pagrereview ng opsina po namin po sa aplikasyon po dito sa kanilang proyekto. Para po sila ba ay e issuehan ng ECC o hindi. Sana po maayos ung daloy.

MPDC of Kalamansig:

Hello, ah magandang umaga po sa lahat, no? Actually, ako po ang MPDC ng Municipality ng Kalamansig. So, we refer the communication to the Municipal Mayor, and napag usapan doon, na kami na lang dalawa ang magrepresent. Pero, I hope that this public hearing will be ah held in the municipality of kalamansig. No? so para malaman nila no, kasi hindi kasi natin masyado maano ditto yong pinag usapan no. Kasi yong iba dito hindi namin ma explain lahat. Yon iba kasi gusto nila malaman, Ang gusto kasi nila, ng mayor, andyan sila, mapag usapan kung mabuti. Kasi sila man talaga yong mag kwan ng ano, signatory, di ba Sir?

John Edward Ang, Public Hearing Officer, DENR-EMB Central:

Sir, ganito po kasi ang public hearing kasi po na to is related to sa issuance ng kanilang ECC. Ngayon po, kung may e acquire sila na ibang requirements po dito from kalamansig, hindi naman po tayo mapipigilan na magconduct ng public hearing dito sa local government ng kalamansig.

MPDC of Kalamansig: So ang locational clearance dito man sa amin, no?

John Edward Ang Public Hearing Officer, DENR-EMB Central: Opo. Tama po.

MPDC of Kalamansig:

Gusto ko lang ipaabot sa inyo na marami po kaming napag usapan na ganitong kwan o, open forum. Napag usapan naming dito, yong ano o, tinatanong nila kami, ng mga NCIP, regarding sa ating mga proposal, so andito na to ngayon, maganda na ito. Nakikita ko na beneficiary eto o sa ating barangay or municipality. Kasi, income generating pod, trabaho, yon ang kailangan namin dito eh, kailangan namin magkaroon ng ah h after problem and issues regarding dito sa ating extraction ng ating mga coastal resources no, Kasi maraming complain previously dahil nasisira yong kanilang pananim. Ano ba ang policy natin, kailangan talaga, na alam ng sangguniang bayan..magkaron ng mgandang enterpretation no. Kasi kung minsan maganda yong pagkasulat pero hindi nman na interpret o hindi naman na apply sa ating implementasyon. Yan po siguro ang masasabi ko, ewan ko lang dito sa partner ko. My partner is from the MENRO of the municipality of kalamansig.

John Edward Ang Public Hearing Officer, DENR-EMB Central:

Clarification lang po no, regarding doon sa nabanggit nyo po kanina kanina, 2 parts po ng question natin no, Una po regarding don sa proposals po, pede po ano ba yong

linawin, ano po, for the record na linawin na mga parang proposal po ng ating company. Proposal po.

MPDC Kalamansig:

Gusto namin sana for documentation, we have to identify and state within the map. magkaroon tayo ng mapa, interpret natin mabuti yong mapa. Kung san ang limitasyon, at or kung san ang coverage ng ating bagong sistema ngaun. importante dapat talaga ma spell out, kasi kung minsan dito lang boundary pero nag operate naman sila sa ibang boundary. Yon lang po nakikita nila. Eklaro natin sa DENR yong boundary kasama po ung ahhh representative ng ating municipal government. Yon lang po yon tanong namin no.

Julius Aborido, Forester, M&S Inc.:

Additional info, etong harvesting operation nmin sakaling matuloy o mbigyan kmi ng ecc. Bale ang harvesting namin is yong plantation species, Kung ano nyo noong 2014-2015, nagkaroon kmi operation ng one year, so area non is kalamansig and lebak, so ngayon eto pong 4 yr harvesting and planting, is ang operation namo is within Esperanza na lang ug senator ninoy aquino. Ang operations namin is sa senator ninoy aquino and Esperanza na lang po.

Atty. John Edward Ang, Public Hearing Officer, DENR-EMB Central:

Regarding don sa isa pang query, ano yng company policy, para po maging malinaw paano mag ooperate ang kompanya. Siguro un po yong isa pa nilang question uli. Kasi, gusto nila ng kalinawan on how the company would operate para for their end aware naman po ang locall government

Julius Aborido, Forester, M&S Inc.:

Yong harvesting po naming noon no, for their info, ah noon, sama sa Sistema sap ag harvest naming is, nakikita namin is kasi planations species, hindi gaya noon mayroong natural species, so mostly labor tayo ngaun, man labor, carabao labor. So mas maraming tao. So kailangan mas maraming labor.

MPDC Kalamansig:

ang gusto lang po naming is, maklaro talga yong mechanic ng ating pagharvest, kasi may tanim doon sa ilalim na medyo dis advantage naman yon sa mga, kawan no, klaruhin natin yon, at ano ung condition na ibigay sa mga tao na nasasakupan doon sa ilalim. Kung ano talaga ang magandang e offer sa kanla para at least or it is already owned by the IP's or lead by the kwan ano..pag-usapan natin mabuti at least maklaro kung no talga ang mga gawin natin. Kc yan tlga ah medyo kc medyo may meron kasi mga problema dito na e solve natin. At saka kasali sila dito sa ating pag-usapan. Kasali talaga sila para alam nila kung ano ba ang papel nila. At sa ska sa LGU doon sa monitoring and evaluation nila. Kasali po ang LGU. Importante tingnan kung

harvest ba nila, ano ba ang mga kwan dyan kung ang harvest ba dyan is natural or planted species. So kung planted trees ma classify natin yon at malaman din natin no.

Rolando Baloria, Admin / Comrel, M&S Company Inc.:

Hello, magandang umaga po sir, magandang umaga sa mga bisita, sa mga taga LGU, at sa mga taga Central and CENRO, para sa kaalaman ng mga bisaya, ganito po yan, ah yong pinag, pinag, yong sinabi ni MPDC, tungkol ho yan sa nakaraang operation, way back 2015, yong panahon yon nagputol ng kahoy sa Lebak and kalamansig. Ahh sa ngayon po, yong naputulan noon, nataniman na pod ulit dahil sa policy ng company na cut and plant. Ganito po yan ginoong mpdc ah alam po namin is yong question galing po sa mga ips'. Yon po ang totoo, naka kuta po ang kompanya sa mga mga pag uusap na ganito. ganito kasi yan , ang ifma holder para bang sa wa pa na goperate ng kahoy, ang ginawa ng mga katutubo, yong mga guili limpyo pa sa una, guisundan ug tanom ug kape sa ilalom. Mag edad ang kahoy ug apat ka tuig, limpyo na ang ilalom ug nindot na xia tanuman ug kape. Atong angkonon nga nauna ang kahoy kaysa kape. Balikan nato, balikan natin sundan ang inyong ipra law, sa section 56 sa inyong IPRA law, sinasabi doon na ang ifma holder, kasama doon na may prior rights, kailangan e recognize at saka erespeto, sana man lang kung nerespeto ang kapakanan ng ifma rights, ang ifma holder, sana hindi pumasok doon ang IPs. So kung nerespeto sana hindi pinasok ang ifma para taniman ng kape. Pero pabayaan na natin yan. Kasi yong manager noon, habang tumutubo ang kahoy, pikit mata, alam naming tinataniman ng kape. Kaya lang hindi inasahan na pag e harvest ang kahoy, masagasaan ang kape, uusbong yong issue na compensation. Ilang beses napo. pero yong stand po namin dito, nauna po yong kahoy. Nag interplant po ng kape. Kung balikan po natin eto MPDC, ang mangyari nito pabalikbalik ang estorya. Ngayon, ang programa ng DENR, is cut and plant, kami kung mosugod ang kumpanya na magputol ug kahoy, iwasan o likayan ang kape. Amo na ng e komiter sa mga Barangay na magharvest ang kumpanya amo ng ipatapos ang season para wala kayo daot ang kapehan. Pero kung kinahanglan man gyud, mas mayo pod siguro sabayan pod nyo ug pruning para makarecover usob...unya sa pagka dinha dinha, ang kumpanya moingon, unsaon man pod ug pag compensate, nga sauna wala man tawon mo nananghid diha, ug illegal man na. Balikan nato ang kalamansig nagka issue ana, human na ang harvest, nagtubo na ang kape karon. Ang intawon hangyo sa management, sabta na lang pod ang kumpanya, nga entawon makabawi sa gastos sa pagtanom. Kay kon sauna, wa ga ingon ang denr nga mr. Consunji stop mog tanom ug kahoy kay di mo kasiguro nga makaharvest mo tungod sa logging. Moy klaro dili jod motanom og kahoy ang kumpanya.

EnP. Realyn Gonzales, M&S Company Inc.:

Ah Sir., in additional sa, in additional para don sa tanong nyo, yon sa monitoring sa LGU, part po kc sa ECC magkakaroon po tayo ng multipartite monitoring team. So ma iinsert po natin. Mahahabol. So wait lang po tayo sa darating na ano po... pagka matapos po. Mag iimplement po tayo ng ganoon.

John Edward Ang, Public Hearing Officer, DENR-EMB Central:

Other concern po na hindi pa nababangit? Sige po.

MPDC of Kalamansig:

Wala moy pangutana? Pangutana mo kay basig panggawas nila wala na pod tay, magproblema napod ta kay naa na pod mga pangutana, ano. Hibalo mo sa amo, kay experyensado pod namo ni no, na nag istorya karon, wala nay pangutana? Wala na. Pagka ugma, ipahabol na tong mga project. Tapos naman tong estoryaha, tapos nman ang budget, kinahanglan karon, panahon na, ato gyud estorya unsa ato gusto mahitabo noh, so ang eklaro lang namo no, part sa LGU, mayo siguro makaabot ni sa atong mayor, sa sanguniang bayan, actually kung, kung magpresent me didto sa ila, kami lang mag istorya, murag dili kaayo gahi ba, pero kung, naa mo mag istorya mo, may dunay mga..may MOA man siguro ni Ma'am di ba? Oh, So, ma istoryahan nato ning MOA pati maka klaro sa ilaha kung unsa talaga ung MOA. Ang amo diri is preliminary lang, na mga kwan no, ang gusto lang idagdag ang policy tapos mga nature mga sistema, dapat para ma at least ma satisfy nato atong mga constituents, actually, may mga, guapo ni kay kay dunay mga pabor na nahatag na nila sa inyoha, nga wala pa na implement ang project. So guapo ni. Ako lang, ok sa amoa, pero basi dili sa ilaha no. Kana ang problema eh, basi dili ok. Sa atoa na-estorya nato pero pag pag-abot sa sangguniang bayan basi, bali na pod ang imong istorya. Mas mayo jud an present nato ni sa ilaha. Klaro. Nga o, naa estorya na anmo kamo nmon diha. Ang municipality of Kalamansig, actually daghan kayo, walay mga trabaho. Labor kwan jud ni. Nagkinahanglan gyod mi ug labor. Actually every Tuesday we talked about saging banana tong kwan mga 600 hectares pod ang gusto nila ah, gusto nila gna himoon nga banana plantation. So guina pangita namo karon kon asa me mangita ug 600 hectares diri nga mahimo nga plantasyon sa banana para atleast matabangan ang mga tawo diri nga may dunay panginabuhian. So ang ato lang diha gyod, ah wala man me against no, kami, kami diri dili man me against ani, pabor me ani. Pero ang problema lang dapat maabot ni sa ilaha. Mao lang to ang ang gusto mapaabot ug maklaro lang ang policy.

Atty. John Edward Ang, Public Hearing Officer, DENR-EMB Central:

Sige po, maraming salamat po sa inyong mga komento. Sige po, e ni-encourage ko po yong iba baka po may hindi pa po nababangit na concern si MPDC. Ah,sige po sir, pangalan po.

Kagawad Boy Ansep:

Ang pangutana nako sir, kasi ang limulan ug hinalaan, may 3,000 plus na CADT, tapos may naay na IFMA didto na more than 20 hectares. Kasali ba to sa operation ingkaso macomply ninyo ang requirements?

Julius Aborido, Forester, M&S Company Inc.:

Oo, nakita nato to, tong nagoverlap, wala toy kwan, murag, pinaka boundary tong nasakop sa CADT. So, wala na. Sumala sa akong gui-ingon ganiha, ang operation nato karon kon mobalik ang ...kung mahatagan me permit o ECC, actually naa na me permit to cut sa DENR, pero ang kulang namo kani sya is ECC. So, dili pa me kasugod. So ako lang balikon no ang among operation, kong madayon pohon, hinaot unta para maka benefit tang tanan, ah ang sakop sa among harveson karon is Esperanza na lang ug Senator Ninoy Aquino.

EnP. Realyn Gonzales, Forester, M&S:

Ah, in addition lang, kasi doon, ang problema po kasi namin is yong continuity? Yong support ng munisipyo, even we wanted to operate kung wala din ang support ng munisipyo, maraming magbabaricade sa amin. Part 2 is yong peace and order, sana kung magtulungan tayo, yong peace and order is, ma control natin, yong daloy ng ekonomiya madali at mapaunlad natin. Dalawa po ang problema namin. Di ba gusto naming tumulong, gusto namin mag operate, kaya lang may, alam nyo na...yon na po yon.. konting ah...magkaintindihan, may protocol, para at least, matagal tayo magsasama at masaya.. yan lang po.

Datu Wasay, Brgy Captain:

Mayong buntag sa tanan no, ako po ay isang barangay captain ng Datu Wasay no, Allan Caang Dungog, May isang tanong ako, may isang tanong lang ako. Yong sinabi ni Ma'am kanina, naintindihan ko yon, lalong lalo na po sa IP's. Ilang taon na ba ang Consunji na wala sa Kalamansig at Senator Ninoy Aquino? Yong IFMA ninyo may tanim na sa ilalim, ano ang dapat gawin ng kumpanya? Kung magputol ng kahoy sa IFMA. Babayaran ba yong mga tao sa kanilang mga tanim?

Rolando Baloria, Admin/Comrel:

Ah, ganito, ing-ani ni kapitan, ah sa daghan na public hearing, na symposium guihimo tungod ana nga problema, ang kumpanya diha jud kutob sa pagtindog nga ang among mandato sa kontrata sa IFMA, magtanom ug kahoy sulod sa lease area guihatag sa DENR. Klaro nga magtanom ug kahoy ang kumpanya. Kon naa man dihay

kristyano, o nitibo magtanom, ilalom sa plantation, kana, sa amo na nang guingon na, guinatawag na “buhi-buhi” na lang. kay kon amo na syang pug-ngan nga motanom, lahi na ang epekto ana sa palibot. Pero saunang panahon, sa nagtubo, nagsugod pa ang ifma, pikit mata na. nakita na namo. Nigawas lang ng problema pagharvest na sa kahoy. Nya, kami pa hinoon ang nahimong may obligasyon sa compensation. Ang tubag namo, sa kompanya, wala tay tubagon sa compensation, tungod ang kumpanya wala naghatag ug pagtugot, pagtugot sa pagpananom, wala nangayo ug bahan sa inig abot sa kape. Mauna, guinaingon na, duyog nalang mo, sabay nalang mo. Kon magharvest me, mag pruning pod mo sa inyong kape kung pananglitan mabale. E prune ang tanan. Kung magtanom ug kahoy ang kumpanya, naa man ang inyong kape. Dili na na nato awayon. Pero kanang gui-ingon na, pagharvest mohatag og compensation, wala policy ang kompanya ana.

Datu Wasay, Brgy Captain:

Ang estorya man gud ni Ma'am kaina, ang inyohang product nahisulod sa IFMA is almost 20, 000 plus aww 29 000, ang e-tree cutting, so in ana sir, sumala sa tubag ni sir Baloria, nga wala pay klaro kon bayaran ba ang tanom sa Christian o sa IPs tungod kay concession sa kompanya. Inig kahurot anang 29,000 hectares cutting sa kahoy so, unsay dapat buhaton? Replace-san ba na o katong gui-ingon ni sir baloria, nga ang kape e pruning kay motorok, sumala sa itorya kaina is pulihan.

Julius Aborido, Forester, M&S:

Ah Kap no, imong ingon na hutdon ug putol ang 29,000 ang orihinal na ifma is 29,000. Naa na sya'y lima ka block. naay block 1, block 2, block 3, block 4 og block 5. So, ang sked na harveson, sa 10,442 hectares nga natanom sa kompanya, is 2,318 lang ka ekarya. That is plantation lang. O, kahoy, plantation dili natural. Ah. So, klaro sa guingon kaina, ikaw, kay sa Kalamansig side man ka, wala mahitabo na operation sa imong area. So, dili katong tibook na 29,000 putlon to, kay wala nay lasang mabilin ang Sultan Kudarat. Ang guina protektahan raba karon na lasang nalang is naa sa IFMA. Kon hotdon putlon pati IFMA, wala nay mahibilin na lasang sa Sultan Kudarat.

Brgy Captain, Limulan, Kalamansig:

Hello, maayong buntag sa tanan no, ako ang barangay captain diri sa barangay Limulan. Sa gui-ingon na kaina, nga magcut mo ug trees didto lang sa taas, wala diri sa Kalamansig, kay nahuman na, kay bali diri lang mo mooagi, no? ahh ang akong kuan diha sir ba pangutana, kay syempre, guikan didto sa babaw so sakop diri sa limulan, naa may mga balay, daplin kalsada, dili man nato malikayan, diri ba mo

moagi sir? Oo, kay diha man gud mo niagi sauna noi? Kay dili man gud malikayan kay sa tungod sa kataas sa inyohang kahoy, unyan ang mga balay naa daplin sa kalsada, syempre, mo, kuan man jud na, unsa may maayo ana sir sa mga balay diha, alangan nman pod ug sila mismo mubalhin dayon, nga wala man na silay mga pinasyal pa na kuan. unsa may matabang ninyo ana sir? Mao lang na akong pangutana, Ug ang kuan pa diay sir, kon diha mo moagi, may puruhan nga maayo ang atong kalsada dha, no? Kato lang sa mga balay na maigo.

Julius Aborido, Forester, M&S:

Kana sa karon no, wala pa nato ma..mao na ba diay sitwasyon karon, wala naman gud mi kaagi diha...wala nman gud na na maintain ang kalsada no? ipa survey nato na, no kung naa bay, simba ko lang, katong daplin sa kalsada, ipa survey asa na dapit, sa minurok ba o as aba, padulong sa taas o sa ubos ba. Og isa pa, ahh panahon na pod siguro nga mobalik ang atong kalsada diha, ug kaguapo. Liwas lang sa kalsada guikan sa 24 padulong hinalaan lusot..Katong diri padulong ..ipa survey lang namo kap. Kon unsa juy problema kon naa ba jud balay nga maigo, simba ko lang.

Brgy Captain, Limulan, Kalamansig:

Balay na maigo, naa jud nay pinasyal na diha na makabalhin..mao lang na akong e ano, kay maigo man sa kahoy. Unya dili man na ma, kanang bag-o guisemento diri, halimbawa lang madayon, di ba ni madaot sir, nga maagian sa inyong truck.

Julius Aborido, Forester, M&S:

Naa me ana sa Zamboanga site, dili. Dili madaot maa'am tungod sa kabaga sa semento. Tpos plantation man xia, gaan lang man na nga mga kuan..

Brgy Captain, Limulan, Kalamansig:

siguro, sir, kon ,Halimbawa, pohon, madayon man galing mo diri, sa guilingon ni Ma'am kaina, naa matabang sa katawhan diri sa limulan, maghuna huna me, mga barangy officials, kun unsa mapangayo sa inyo.

EnP. Realyn Gonzales, M&S Company Inc. :

Ah ma'am tan awon nato na, ah its best man gud na mag guikan sa inyoha. Kasi, unsa ang most applicable na ma meet sa inyoha. Kung unsa jod kinahanglan diri, tan-awon nato, pag usapan then, pag isipan kung papano natin gagawin. And then at the same time, in addition don sa kanina. Next, is IFMA operation. Ang ifma operation doon lang mag cocover sa Esperanza and the Senator Ninoy Aquino. Kasi meron kaming 5 years plan. Yon lang, tumbok. But in the future, syempre di ba nagtanim kami, yong

tinanim naming mga ilang years 15 years, 20 years, syempre malaki pag nag mature na xia yon lang yong babalikan namin. But as of now, ang eku-cut lang po namin ah, para klaro klaro lang, sa ngayon, yong e-cut lang naming is ung sa senator ninoy Aquino at Esperanza. Sa ngayon wala pa yong lebak, kalamansig at bagumbayan. By phase po tayo sir, ma'am.

Atty. John Edward Ang, Public Hearing Officer, DENR-EMB Central:

Ok po other concern po, baka may iba tayong itanong, cge po Kap.

Brgy Captain, Limulan, Kalamansig:

Hello, mohirit pa, so sa guiingon na nako kaina, nga diri mo maagi sir no? So, muagi dyapon mo diha sa pag-aso, diha sa kwan,

Atty. John Edward Ang, Public Hearing Officer, DENR-EMB, Central:

Kung wala na po, recap na po tayo sa issues and concern.

Brgy Captain, Limulan, Kalamansig:

Halimbawa pod, mag ah, kaning public hearing, so ngadto ngadato, madugay na public hearing, maapproved ni sya, ma ok, syempre, diri dyod mo muaagi, sauna man god, sa diri mo nag agi, dira o, magnamatyan dyod me ug bata. Tungod sa katas sa inyongkahoy, naigo tong bata atong nga time, mao to namatay tong bata xia diha. Unta e kuan ninyo ang hitas-on sa inyohang kahoy, nga ma kwan pod unta ba, sa lobot sa driver, lisod pod kaau ba, ng pag kurbada gani sir.

Julius Aborido, Forester, M&S:

tinood na kap no, katong wala nato guinapangayo na disgrasya, pero nahitabo gyud to no. tong diha sa, sa mahinomdoman nako, diha sa may tulay. So siguro, kon magsugod me, mao na likayan nato ang mag kwan. Pero ang pagkahibalo nako, murag mobo na lang na kay plantation man na. Wa ta kahibalo pero hindi pa namo kumpirmado. So siguro, bago mag-umpisa atong hauling, Naa man me ingon nga trucking incharge. Istoryahan ra na ug seminar, siguro kay moagi ma sa community, hinay ug kwan ba, hinay dyod ug padagan, so mao na kap. Wala man nato na guina pangayo na panghitabo. So mao lang to.

EnP. Realyn Gonzales, M&S Company Inc.:

In addition, sa gui ingon sa atong kauban, so properly coordinated lang ta. So, everytime na may harvesting kami at dadaan, e coordinate lang namin sa barangay, merong mag se-set kami ng oras, scheduling. Proper scheduling lang, pag once na dadaan dito sa mga parting may maraming tao, dahan-dahan tapos yong ano non, yong likod non, may cover po, to avoid mga fallen debris. Yon lang po at properly coordinated lang po tayo. Ok.

Julius Aborido, Forester, M&S Company Inc.:

so yon lang Kap, Ma'am di ba sa MMT kasama sila, kung kwan, kauban mo sa multipartite ah monitoring, kauban ang local government, barangay. So, pwede mo magreport, kung unsa ba, kusog ang padagan, naa gui violate. O, dali ra na maaksyonan. Kana ra ang among e ano, bago mag start.

Barangay Captain ng Keytadac, Lebak:

Sa amo, wala man me babag kay syempre sa inyo man na no. ang amoa lang kon unsa ang privilege ihatag sa iba, ibang barangay, tagai pod me, ambit ambit ba. Sharing sharing lang, silbi, trabaho man ilang kinahanglan, trabaho pod among kinahanglan. Mao lang na no.

Julius Abodiro, Forester, M&S:

Ako lang dungagan, mas mayo man mag guikan dyod sa inyo, kaysa kami modool sa inyo. Mag hatag o magama ba mo ug request o unsa ba.

MPDC Kalamansig:

Actually, ang concern namin dito is sa project monitoring committee no, sino talaga ang members natin sa project monitoring committee. Kasali na po dyan ang ating Brgy Captain, Local govt.. yong concern lang sir, asahan natin yan sa ating pirmahan natin, yon may MOA? Ah Opo.

Atty. John Edward Ang, EMB-Central:

So, sige po, summarize lang po natin yong issues and concern, na bring up natin ung issue regarding sa benefits na maaring ma iprovide ng ating proponent, doon sa project implementation po nila. nariyan na rin po yong company policies and practices ng ating proponent sa kanilang isasagawang operasyon, nariyan na rin ang issue regarding sa boundary, at ang pagkakaroon ng project monitoring team, nariyan na rin po na bring ulit yong issue regarding sa IFMA, at yong pagkakaroon ng agricultural products at ang paghaharvest nito, availability ng compensation, at maaring gawin ng kompanya para maiwasan ang damages sa agricultural products an ito. Na bring ulit ang issue regarding sa land classification sa issue ng CADT overlap sa IFMA area, nariyan an rin po ang issue na ah, na bring ulit ang concern sa, at ano pa ang maibigay nila na compensation o benefits sa mga residente na malapit sa hauling route. Yon po ang summary ng issues and concerns sa umagang ito. At

nagpapasalamat po kmi sa pagbibigay po ng impormasyon, at hindi po nagtatapos ditto ang pagkuha ng impormasyon sa issues and concerns. Actually, ah e didiscuss po sa atin mamaya, am moving forward na matapos ang activity. Bigyan po naming kayo ng linaw. Once na ma issue ang ECC o kung ma issue man yong ECC, hindi naman po agad makasimula ang proponent sa kanilang proyekto. Dahil kailangan pa po nilang mag comply ng, sa iba pa pong mga clearances na manggaling pa po sa ibang ahensya. So nariyan po mga partners namin, tlungan po kmi ng mga barangay para po magbantay, ano po, para naman po sa mga clearances na kailangan pa po nilang makuha bago po sila makapagsimula mag operate, Ok po? Muli, nagpapasalamat po kami sa inyo, sa lahat ng inyong partisipasyon. At para naman po bigyan tayo ng information, ano pa po ang maari nating gawin at processo na pagdadanaan pa ng kanilang aplikasyon, ibibigay ko na yong floor kay Engr. Regina Eugenio para po e discuss po sa atin eto.

Engr. Regina Paula Euegino, DENR-EMB Central:

So, ako po, nagpapasalamat po kami sa mga inyong ah mga pagtatanong at sa issues and concern na na-e rasied nyo po. Inyo pong mapapansin na well documented po eto. Etong ating pag-uusap sa araw na to. Makakaasa po kayo, na.....(loss / damage video footage).
