SECTION 1

PROJECT OVERVIEW

- ¹ **Advantage Concrete Industries Corp. (ACIC)** intended to amend its existing ECC (ECC-CO-1903-0010) to include the following activities in their operation:
 - i. Increase its clinker production capacity to 11.52 Million Metric Tons Per Year (MMTPY) and cement production capacity to 19.2 MMTPY.
 - ii. Expand cement plant complex area to 120 hectares.
 - iii. Increase extraction rate of limestone and shale within MPSA No. 071-97-IV to 19.2 MMTPY and 3.6 MMTPY, respectively.
 - iv. Expansion of quarry areas to 574 hectares but still within MPSA No. 071-97-IV; and
 - v. Increase its annual cement production capacity to 10.6 Million Metric Tons Per Year (MMTPY); and
 - vi. Construction and operation of pier facility for the delivery of raw materials and transport of the cement products.
- ² The proposed expansion activities were confined within Barangays Baha, Talibayog, Hukay, Carlota, and Encarnacion, Municipality of Calatagan in the Province of Batangas.
- ³ **Table 1** provides some basic information regarding the proposed project, the Proponent, and the Environmental Impact Assessment (EIA) preparer.

SECTION 2

ACTIVITY RATIONALE

- 4 The Public Hearing was agreed upon during the 1st Technical Review of the Review Committee (REVCOM) on July 13, 2023. The Notice of Public Hearing was officially posted on https://eia.emb.gov.ph/?page_id=72 on June 20, 2023. Included in the uploaded documents were the latest Environmental Performance Report and Management Plan (EPRMP) and EIS Summary for the Public (ESP) written in both Filipino and English.
- 5 The Notice of Public Hearing was published by Philippine Daily Inquirer on June 28 and July 5, 2023 (see ANNEX A).
- 6 The distribution of the official invitations from the DENR Environmental Management Bureau (EMB) was conducted on June 29, 2023. The following were invited:

- 9 A copy of the public hearing attendance sheets is provided as **ANNEX D** of this report.

SECTION 4

SUMMARY OF ISSUES AND CONCERNS

- 10 The presentation material that guided the flow of the Public Hearing was provided as **ANNEX D** of this report. The pertinent issues, concerns, and suggestions raised by the participants during the open forum and the corresponding responses of the project proponent and EIA consultant are summarized in the matrix below.

Table 4: Matrix of Issues and Concerns Raised During the Public Hearing

| ISSUES AND CONCERNS RAISED ON THE FOLLOWING MODULES | SECTOR OR PERSONS WHO RAISED THE ISSUES/CONCERNS | PROONENT RESPOND TO ISSUES/CONCERNS |
|--|--|--|
| Project Description | | |
| <p><i>"On the construction of the port, is there a study assessing if there are corals that will be affected?"</i></p> <p><i>"Based on our records, the MPSA is currently expired. What is the status of the renewal?"</i></p> | <p>Liezel De Mesa DENR-PENRO Batangas</p> | <p><u>Engr. Jose Marie U. Lim (LCI):</u></p> <p>There is an acknowledged coastal resource map indicating the presence of mangroves in the area. The company is looking for a gap, and any activity in the area will be stopped until the acquisition of the FLAG and earth balling which is already filled.</p> <p>The MPSA was extended for another ten years, until 2032.</p> |
| Land | | |
| <p><i>"We are concerned about the excessive water discharge that may flood our area since our culvert is not that big.</i></p> <p><i>We are concerned because Brgy. Palikpikan is very vulnerable to flooding."</i></p> | <p>Tarcila Lopez Chairman, Brgy. Palikpikan</p> | <p><u>Engr. Jose Marie U. Lim:</u></p> <p>We understand your concern regarding the situation. Large culverts are being constructed to improve flow of water. The intention is to discharge water faster to avoid flooding. This concern will be raised with the proponent.</p> |
| Water | | |
| Air | | |
| <p><i>"What will be the impact of the project on the crops? What can be done to ensure that our crops are unharmed?"</i></p> | <p>Julieta Celis Farmer's Association President, Brgy. Real</p> | <p><u>Engr. Jose Marie U. Lim (LCI):</u></p> <p>It was mentioned earlier by other stakeholders that dust affect crop development.</p> <p>Your location, Brgy. Real, is far from the project site. Even so, there are possible sources of dust from the project.</p> <p>Dust may be generated during construction due to earth movement. Your area should be unaffected because of the distance. The primary mitigating measure during construction phase is watering to suppress dust.</p> |

| ISSUES AND CONCERNS RAISED ON THE FOLLOWING MODULES | SECTOR OR PERSONS WHO RAISED THE ISSUES/CONCERNS | PROPONENT RESPOND TO ISSUES/CONCERNS |
|---|---|---|
| | | <p>Your area may be affected once the shale/pozzolan quarry is in operation. The area will be operated after the construction of the plant.</p> <p>Dust may also be generated during operation of the plant. ACIC will install bag filters to control dust.</p> <p>It is also in the interest of ACIC to control the dust since this dust that they are able to collect is actually cement, which is their product.</p> |
| People | | |
| <i>"How sure is it that the barangay is safe, especially since the project is close to the sea?"</i> | Virginia Dulay Brgy. Chairperson, Brgy. Encarnacion | <p><u>Engr. Jose Marie U. Lim (LCI):</u></p> <p>According to the map, your barangay is far from the project site. Your barangay is located at the opposite side of the mountain.</p> <p><u>Public Hearing Officer</u></p> <p>Any concerns about the area/barangay relating the project can be directed to the Multipartite Monitoring Team (MMT).</p> |
| <i>"Half of the barangay passes through the property owned by ACIC. Once they are operational, we will not be able to access the road. We are asking for right of way."</i> | Nelson Panganiban Chairman, Brgy. Hukay | <p><u>Atty. Micaela Rosales (ACIC):</u></p> <p>According to the law, we are obligated to provide an access road. The right of way will not be a problem.</p> |
| <i>"What is the assurance that the livelihood of the people will not be affected? 90% of the population of the barangay is fisherfolk."</i> | Melanie Catapang Secretary, Brgy. Palikpikan | <p><u>Engr. Jose Marie U. Lim (LCI):</u></p> <p>We are currently discussing the possible impact of the pier on the livelihood of fisherfolks. Only a small portion will be allocated for the port.</p> |
| <i>"What are your measures regarding the parking of the boats from Baha and Talibayog?"</i> | Melanie Catapang Secretary, Brgy. Palikpikan | <p><u>Atty. Micaela Rosales (ACIC)</u></p> <p>Most of the boats from Baha and Talibayog were sold, while the other boats were donated. We have suggested relocation of the parking in Brgy. 4 Balayan. However, some of the residents think that the location is far from their settlement.</p> |
| <i>"I own a land in Carlota, however I cannot pass through Encarnacion due to the operation site guarded"</i> | Julian Gomez Brgy. Carlota | <p><u>Atty. Micaela Rosales (ACIC)</u></p> |

| ISSUES AND CONCERNS RAISED ON THE FOLLOWING MODULES | SECTOR OR PERSONS WHO RAISED THE ISSUES/CONCERNS | PROPONENT RESPOND TO ISSUES/CONCERNS |
|---|--|---|
| <i>by security. My concern is how can I access the road?"</i> | | This concern is noted, it will be fixed right away. |
| <i>"As of the project development today, there are no impacts observed. How can you assure that the project would not cause detrimental health problem especially for senior citizens?"</i> | Leonicia Magsaysay Senior Citizen's Organization President, Brgy. Palikpikan | <u>Provincial Health Office:</u> The company will be responsible for the quarterly monitoring of air quality to assure the health and safety of the citizens. It is encouraged for citizens to join MMT if there is a problem or issue. EGF can be used if the project would affect the livelihood of the residents. |
| <i>"How will the adjacent barangays be assured that their livelihoods, health conditions, and boats will be secured?"</i> | Atty. Noel Delas Alas Legal Officer, Office of the Mayor | <u>Engr. Jose Marie U. Lim (LCI):</u> We have enumerated ways on how ACIC can mitigate their impacts. For instance, on cement plant, a baghouse filter will be installed to collect the dust. In addition, MMT from Local Government Unit of Calatagan and adjacent barangays will ensure the implementation of mitigating measures. <u>Mark Abing:</u> Once the ECC is issued, we shall ensure that the conditions are met. |
| <i>"How stable are we in our current residence?"</i> | Mamerto Manalo Captain, Brgy. Talibayog | <u>Atty. Micaela Rosales (ACIC)</u> Issuance of titles for the long-time residents in the area has already been settled. We are still finishing relocation of other residents. Issuance of titles should follow. Additionally, we have a proposal to the Mayor on the relocation of residents within salvage zones. |

- ¹¹ The full transcript and video documentation of the public hearing were attached as **ANNEXES E and F**, accordingly.
