1. INTRODUCTION

1.1. Public Participation in the Philippine Environmental Impact Statement System (PEISS)

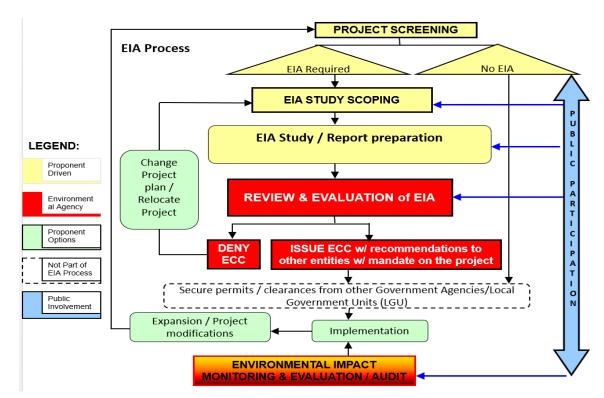

Public participation is integral to the Environmental Impact Assessment (EIA) process. The Revised Procedural Manual for Department Administrative Order (DAO) 2003-30 provides for the outline of the role of public participation at every stage of the EIA process (Figure 1).

In the Pre-Scoping stage and during the Information, Education, and Communication (IEC) activities, stakeholders of the proposed project, along with relevant issues, were identified in preparation for the Scoping proper. During the Scoping stage, stakeholders were invited and participated in Public Scoping sessions where community input is collected and incorporated into the Technical Scoping Checklist.

Throughout the EIA study, local stakeholders were engaged, and contributions have been considered as local experts, aides, guides, or resource persons for primary data collection. The involvement of the public in the EIA process ensures optimal access to indigenous environmental knowledge. They also participated as interviewers or interviewees in socio-economic and perception surveys as well as key informants in the key informant interviews and focus group discussion conducted as part of the IEC activities.

Local Government Units (LGUs) and government agencies are specifically consulted, and inputs were considered in the drafting of the project's Social Development Plan (SDP) Framework. Stakeholders also participated in Public Hearings to review the EIA findings.

Upon completion of the process earlier mentioned and upon issuance of the Environmental Compliance Certificate (ECC), multi-sectoral validation of a proponent's self-monitoring results will be conducted. These are all part of the public participation process of the PEISS.

Proposed Rolling Steel Mill Project of the United Far East Rolling Steel Mill Corporation Barangay Agudo, Trece Martires City

Following the Department Administrative Order (DAO) 2017-15, also known as the "Guidelines on Public Participation Under the Philippine Environmental Impact Statement (EIS) System," that require projects under the Philippine Environmental Impact Statement System (PEISS) to ensure meaningful public participation at various stages of the EIA process, a Public Hearing for the Proposed Rolling Steel Mill Project in Barangay Aguado, Trece Martires City was conducted and attended by various stakeholders from the impacted barangay and local government unit.

Invitations were extended to representatives from the following groups:

- Local government units in areas where the project facilities are proposed to be constructed and where operations are proposed to be undertaken;
- Government agencies with mandates related to the type of project and its impacts;
- Interest groups, preferably those with missions specifically related to the type and impacts
 of the proposed project;
- Households, businesses, and industries that will be displaced;
- Local institutions, such as schools, churches, and hospitals;
- Other interested and concerned stakeholders

1.2. Objective/s of the Public Hearing

The Public Hearing conducted aims to:

- present the results of the environmental impact assessment by sector—Land, Water, Air, and People; and
- document stakeholders' issues and concerns regarding the study's findings on the proposed project.

The aspects identified and suggested by stakeholders during the meeting were documented and incorporated into the Environmental Impact Assessment (EIA).

2. DOCUMENTATION OF THE PUBLIC HEARING

2.1. Dissemination of the Notice of Public Hearing

Notice of the public hearing was disseminated as follows:

Posting in the EMB website

The Notice of Public Hearing, along with the Environmental Impact Assessment (EIA) and Executive Summary for the Public (ESP) in both Filipino and English, were posted on the EMB website. The notice from the EMB central office indicated that the hearing would take place on May 17, 2024, 2023, at 9 o'clock in the morning, at Barangay Aguado covered court. The notice also included link to the EMB site where a copy of the EIS can be accessed.

Posting in the newspaper

In addition to the website posting, notice of the public hearing notice was published in the national newspaper Manila Times for 2 consecutive weeks prior to the May 17 public hearing. The Affidavit of Publication from the Manil Times is included as Annex A.

Proposed Rolling Steel Mill Project of the United Far East Rolling Steel Mill Corporation Barangay Agudo, Trece Martires City

Posting in conspicuous public places in Trece Martires

Notices of the public hearing were also posted in public places in the barangays and in the City Proper. Photos of posting are presented as Annex B.

 Sending out the notice to various stakeholders through a letter signed by the EMB Central Office

Letters of invitation were also sent to the following offices, groups, and organizations: (1) Municipal and City Local Government Units and concerned departments; (2) Affected barangay LGUs; (3) Non-Government Organizations; (4) Local Groups/Organizations

Receipt copy of the invitation letters is provided as Annex C.

2.2. Public Hearing Participants

A total of 75 participants attended the Public Hearing: 43 female; 32 male.

Participants included:

- Barangay officials of Aguado, Trece Martires
- HOA officers and residents
- establishments and private companies
- LGU of Trece Martires such as representatives from City Planning and Development Office,
 City Environment and Natural Office, City Health Office
- Representatives from the Academe Aguado Elementary School, Agtas Elementary School
- Representative from religious sector San Gregorio Magno Parish Church
- Cavite Provincial Government represented by the Provincial ENRO
- Representatives from DENR-EMB Central Office, Region 4a

The complete list of attendees is provided in Annex D.

2.3. Public Hearing Program

- Registration started as early as 8:00am. The participants were requested to register by signing the provided attendance sheet.
- The program started at around 9:00am with DENR EMB Central Office Jaymon Angoluan as the moderator.
- The PCEAS led the singing of the national anthem (via video) and Ms. Zeny Bobias (HOA Southville 2 Phase 3 Treasurer) led the opening prayer
- Barangay Aguado Councilor Maximo Roni gave the welcome remarks on behalf of the Barangay Chairman. He emphasized the need to protect the environment including possible sources of pollution (air and water) and to properly manage solid waste.
- At 9:20am, Mr. Jaymon Angoluan presented the overview of the EIA process including the objectives of the public hearing. He emphasized the importance of public participation in the said process.
- At 9:30am, Engr. Derf Balasa, representative of the United Far East, presented the project description.

Proposed Rolling Steel Mill Project of the United Far East Rolling Steel Mill Corporation Barangay Agudo, Trece Martires City

- PCEAS Engr. Ted Guerrero, the EIA Study Team Lead, presented the highlights of the results of the EIA including the environmental management plan
- The open forum started at around 10am which was facilitated by EMB Region 4a Engr.
 Marc Abing. Questions focused mostly on social impacts and benefits that the community
 will get from the project number of persons to be hired, qualification, hiring process,
 etc. There were also questions on the type of septic treatment facility and source of water
 for the project. Details of the open forum is summarized in the next section
- The program ended at around 11:30 am with Barangay Councilor Wilson Mendoza giving the closing remarks. He reiterated concerns on environmental compliance to protect the environment.

Full proceedings are presented as Annex E and photo documentation is presented as Annex G.

3. SUMMARY OF ISSUES AND CONCERNS

The summary of concerns/ questions raised during the open forum and the responses given is presented in the table below:

Table 1. Summary of Issues and Concerns raised

MODULE	PERSON WHO RAISED QUESTION/ CONCERNS/ RECOMMENDATIONS	QUESTION/ CONCERNS/ RECOMMENDATIONS	RESPONSES
Project Description	Tito Delos Santos Representative from San Gregorio Magno Parish Church	What is the capacity for the Septic Tank? Will there be septic treatment facilities to be constructed as required in industrial companies?	Engr. Derf Balasa Proponent (UFE) The capacity of the septic treatment facility for this project is 24 cu.m. for a single occupancy, designed to cater to 20 – 30 persons producing 20 – 30 liters of sewage per day in compliance to requirements set for industries.
		How many employees will be required by the project? How many will be employed from the barangay?	Engr. Derf Balasa Proponent (UFE) During the construction phase, about 300+ will be required for skilled, laborer. Consistent with the proponent's principles, local hiring will be observed in coordination with PESO and the barangay. The proponent commits to hire 60% of their employees coming from Aguado or Trece Martires as they prefer employees coming from nearby area to ensure operations continuity as long as they are qualified and physically able to the job.

MODULE	PERSON WHO RAISED QUESTION/ CONCERNS/ RECOMMENDATIONS	QUESTION/ CONCERNS/ RECOMMENDATIONS	RESPONSES
		Are you going to melt steel in the area?	Engr. Derf Balasa Proponent (UFE)
			The proposed project will not entail melting of steel, it is a rolling steel mill where steel billets will be rolled
	Tito Delos Santos Representative from San Gregorio Magno Parish Church	What will be the source of water – surface and	to its required sizes and profiles. Engr. Derf Balasa Proponent (UFE)
		ground water? There is a necessary permit that should be obtained from the	Water requirement will not be high, included in the design is the installation of recirculating pond, thus, no water will be lost.
		NWRB	Water holding capacity – 1,400 cu.m. During the dry season, source of
			water will be from deepwell Application of water extraction –
			should be done with NWRB Eng. Marc Abing
			EMB Region 4A The project will be subjected to
			constant monitoring; the details of the impacts is in the EIA study posted in the EMB website.
			Once ECC is issued, the ECC will include conditions on the use of water including necessary permitting requirements from the NWRB; will also ensure land use compatibility. Self-monitoring report will be required to be submitted to the EMB. Complaints can be submitted to the barangay or to the EMB regional office.
	Tito Delos Santos Representative from San Gregorio Magno Parish Church	Is the company owned by a Filipino or foreigner? There is corporate ownership	Proponent (UFE) The company is 100% Filipino owned
	Tito Dolos Cartas	requirement mandated by law	as indicated in its SEC registration.
	Tito Delos Santos Representative from San Gregorio Magno Parish Church	Where will the products be sold? In Trece Martires, etc?	Proponent (UFE) The proposed project targets to sater
			The proposed project targets to cater to requirement of the national government, and government infrastructure projects as the sizes of

MODULE	PERSON WHO RAISED QUESTION/ CONCERNS/ RECOMMENDATIONS	QUESTION/ CONCERNS/ RECOMMENDATIONS	RESPONSES
			steel bars are designed for high rise building, bridges, major infrastructure projects etc.
	Adriano Capuna Bria Homes	Please ensure proper treatment of septic tank or waste water	Engr. Derf Balasa Proponent (UFE)
		or maste mater	The design and technology for the treatment of septic tank will be in accordance to the required standards
			and as mandated by law. The proponent commits to standards and the conditions that will be stipulated in the ECC.
	Maritess Herma Pres. HOA Southville 2 Phase 3	What will be the qualifications; requirements for	Engr. Derf Balasa Proponent (UFE)
		hiring?	Requirements for hiring will be: O Physically able and willing work; O drug test, medical exam, psychological exam, O willingness to work; O no criminal records O among others
			Educational requirements will depend on the job requirement.
	Joy Oguis HOA Southville 2 Phase 3	What will be the salary and benefits given to employees?	Engr. Derf Balasa Proponent (UFE)
			Government agencies are strictly monitoring steel industries. The salary and wages including benefits will be compliant to the Regional DOLE requirement and will vary depending on the job level and competency.
			Tito Delos Santos Representative from San Gregorio Magno Parish Church
			Coastal area – follows Manila salary grade. Other areas – different salary grade or will depend on what is set by the DOLE provincial board.
			The company's Human Resource Dept. will handle the hiring and training process including the benefits for employees.

MODULE	PERSON WHO RAISED QUESTION/ CONCERNS/ RECOMMENDATIONS	QUESTION/ CONCERNS/ RECOMMENDATIONS	RESPONSES
			TESDA can be tapped for skills development.
EIS	Tito Delos Santos Representative from San Gregorio Magno Parish Church	Is this the 3rd Public Hearing? Are the residents of Barangay Aguado informed of this project? Church has proposed Closure of Seabed Naic- Maragondon Project and there are several industrial projects already in Cavite contributing to climate change	Ms. Nimfa Villamayor EIA Preparer (PCEAS This is not the venue to discuss concerns contributed by other existing industrial projects in Cavite, they are different in the proposed UFE Rolling Steel Mill Project. However, the preparer noted the concerns raised against other industries. This is the 1st Public Hearing as part of the EIS process; however, this is not the 1st public consultation conducted. Public scoping was conducted in the same venue, and several meetings and focus group discussions were conducted with the Barangay council, barangay organizations and other stakeholders about the project. (Engr. Ted Guerrero) The residents are fully aware of the project, as presented earlier, results of the household survey conducted reveal the ff: 93% of the surveyed population are aware of the project. The majority of the respondents believe that the project will have positive impact: it will generate employment (78.13%) will help in barangay development (28.27%) better public and social services (4.80%) Majority of respondents (95.63%) think the project will be beneficial for barangay development. The project received the support of 84.58% of all respondents with 31.73% of respondents indicated support for the following conditions:

MODULE	PERSON WHO RAISED QUESTION/ CONCERNS/	QUESTION/ CONCERNS/	RESPONSES
	RECOMMENDATIONS	RECOMMENDATIONS	 The project will prioritize barangay Aguado's residents as their employees. If it will not affect health of the people and environment Will contribute to the households and community. Prioritize public safety.
EIS – Harzardous wastes, water and air pollution	Amparo Dela Cruz HOA Southville 2 Phase 3	On behalf of the residents of Barangay Aguado, she requests both from the proponent and the government to ensure that the project will have no negative impact to the people and will not generate hazardous materials, no smoke and pollution.	Engr. Ted Guerrero EIA Preparer (PCEAS) The ECC that will be issued (if will be granted by the EMB), will ensure that the company will comply with the requirement and standards on hazardous wastes and other pollution. Engr. Marc Abing EMB Region 4a If the company will have exceedance on any of the standards set, there is a process to discuss the exceedance and corresponding consequence if violation exists.
EIS – Monitoring/Grievance	Tito Delos Santos Representative from San Gregorio Magno Parish Church	Who will be monitoring the project? DENR and EMB? Where can we file our complaints?	Engr. Marc Abing EMB Region 4a The DENR EMB has Water Quality Management Section and Air Quality Management Section that will regularly monitor the project including the Self-monitoring report that is required to be submitted by the proponent. Complaints can be filed in the Barangay or in the DENR office.

Proposed Rolling Steel Mill Project of the United Far East Rolling Steel Mill Corporation Barangay Agudo, Trece Martires City

4. CLOSING

The public hearing officer thanked the participants of the public hearing. Additionally, he encouraged everyone to visit the EMB website to get additional details on the project and results of the EIA study and encouraged the participants to send in their questions or comments about the project to the DENR-EmB central office.

In closing, the public hearing officer shared that the project will still be subjected to review and evaluation and that the hearing conducted will be included in the process of evaluation.

Proposed Rolling Steel Mill Project of the United Far East Rolling Steel Mill Corporation Barangay Agudo, Trece Martires City

Annex E. Proceedings

PROCEEDINGS OF THE PUBLIC HEARING FOR THE PROPOSED UFE ROLLING STEEL MILL PROJECT

Jaymon Angoluan EMB Central Office:	Magandang umaga po. Magsimula na po tayo habang hinihintay natin ang iba . Tayo po ay nandito para sa Public Hearing ng Rolling Steel Mill Project dito po sa Barangay Aguado.
	Bago po tayo mag start, tayo po ay tumayo para sa ating National Athem at Opening prayer
	National Anthem and Opening Prayer
Jaymon Angoluan EMB Central Office:	Salamat po. Ngayon naman po ay Opening Remarks mula po sa Kagawad ng Barangay Aguado, si Kagawad Maximo Roni.
Kgd. Maximo Roni:	Magandang umaga po, isa lang po ang masasabi ko na sana ay siguraduhin natin na ang proyekto ay hindi makakasama sa hangin, sa tubig at sa waste management. Dahil dito po sa Aguado, kami po ay nagpapatupad ng mga batas para sa waste management at ang mga residente ay sumusunod sa mga ordinansa at patakaran sa waste management at sa environment. Salamat po.
Jaymon Angoluan EMB Central Office:	Salamat po, sa ngayon naman po ay ipapaliwanag namin sa inyo ang process ng EIA at objectives and targets ng Public Hearing (refer to the EIA presentation of the DENR EMB)
	Para naman po sa project description ng isasagawang Rolling Steel Mill dito po sa inyong lugar, ito po ay ipapaliwanag ni Engr. Derf Balasa.
Engr. Derf Balasa:	Presentation of the project description (refer to the powerpoint materials in Annex F)
Jaymon Angoluan EMB Central Office:	Para po magpresent sa atin ng resulta ng environmental impact na isinagawa, narito po si Engr. Ted Guerrero ng PCEAS.
Engr. Ted Guerrero	Magandang umaga po. Narito po ang mga consultants na nagsagawa ng pag-aaral (refer to the powerpoint materials Annex F)
Jaymon Angoluan EMB Central Office:	Salamat po, ngayon naman po ay para sa ating Open Forum, narito po si Engr. Michael Sumague para po simulan ang ating open forum.
Engr. Marc Abing EMB Region 4A:	May Proseso po tayong susundin para sa forum (refer to Annex F presentation).

	Mayroon po ba tayong katanungan? Meron po bang gusto
	magtanong? Yes po? Magpakilala po muna
Toto Delos Santos San Gregorio Magno Parish Church:	Ako po si Toto Delos Santos mula sa San Gregorio Magno Parish Church. Ang tanong ko po ay ganito, nasabi nyo po kanina na ito ay pangatlong public hearing na, alam po ba ng mga tao dito ang tungkol sa proyekto? Sa tingin nyo po ay naintindihan nila kayo eh kayo po ay nagpaliwang sa Ingles? May nabanggit po tungkol sa septic tank? Ilan po ba ang capacity ng Septic Tank na gagawin at paano po masisisguro na maayos ito at hindi makakasira ng water resources?
	Marami na pong industriya dito sa Cavite. Kayo, kayo dito sa Barangay Aguado, kayo ang maaapektuhan ng mga ito. Para po sa inyong kaalaman, nagfile po kami para mapatigil yung proyekto ng Seabed Naic-Maragondon project. Yung mga industries nakaka apekto na sa ating climate change.
	Kanina pinaliwanag yung tungkol sa proyekto? Magtutunaw kayo ng bakal? Wala kayong nabanggit ilan ba ang magegenerate na employment ng proyekto? Saan nyo ba ibebenta yun mga natunaw na bakal? Ito ba ay sa Trece Martires lang? Saan kayo kukuha ng tubig?
Engr. Derf Balasa UFE:	Ang capacity po ng septic treatment facility namin ay 24 cu.m. for a single occupancy. Designed po ito para i-cater ang 20 to 30 liters of sewage per day in compliance po sa requirements para sa mga industries na katulad nito.
Engr. Ted Guerrero PCEAS:	Base po sa survey na aming ginawa, 93% of the population ay aware po tungkol sa proyekto. Majority po or 95.63% po ay naniniwala na magiging beneficial po ang proyekto. 78% ang nagsabi na ito ay makakatulong sa employment. Base din po sa pag-aaral, 85% ang nagsabi na sumusuporta sila rito at 31.73% ay nagsabi na may kondisyon sila, gaya ng pag prioritize sa mga taga Aguado sa hiring at kung hindi makakaapekto ang proyekto sa kalusugan.
Amparo Dela Cruz HOA Southville 2 Phase 3:	Ako po ay may katanungan,
Nimfa Villamayor PCEAS:	Pangalan po muna
Amparo Dela Cruz HOA Southville 2 Phase 3:	Ay ako po si Amparo Dela Cruz ng Southville 2 Phase 3. Sana po ay ang proyekto po ay walang masamang epekto sa amin, sa hazardous

	and a second of the second of
	wastes, sa usok, sa pollution. Sana po ay maseguro po ng kumpanya ang mga ito at ng barangay ito.
Engr. Ted Guerrero PCEAS:	Ang ECC po na i-issue para sa kumpanya ay magseseguro po na ang kumpanya ay susunod sa sa requirements at standards sa pollution, sa hazardous wastes.
Engr. Marc Abing EMB Region 4A:	Kung ang kumpanya po ay magkakaroon ng exceedance on standards, ito po ay pag uusapan at may proseso po para malaman yun exceedance at kung malaman na may violation ay may corresponding consequence po.
Toto Delos Santos San Gregorio Magno Parish Church:	Pasensya na po, may mga tanong pa po ako na hindi pa nasasagot.
Nimfa Villamayor PCEAS:	Nilista ko po ang mga tanong nya. Isa-isahin po muna natin yung mga tanong nya para wala ng balikan.
	Unahin natin, Sir Derf, ilan ang maha-hire ng project na workers? Nasabi mo na ito sa presentation, pero ulitin lang natin.
Engr. Derf Balasa UFE:	Nabanggit ko po kanina na sa construction phase pa lang ay maghire kami ng mga 300+ na empleyado – skilled at laborer. No discrimination po. Ang aming kunpanya ay nagcoordinate sa PESO at sa barangay kapag may kailangan po kami na tao. We commit to hire 60% of our employees na manggaling po sa mga taga rito. Dahil kami po mas gusto po namin na nasa tabi tabi lang yung aming mga trabahador, meron nga po kami dormitory na itatayo, dahil gusto namin na madali lang tawagin ang aming mga tao dahil 24/7 na operations.
Nimfa Villamayor PCEAS:	Pangalawang tanong, magtutunaw ka ba ng bakal, melting of steel?
Engr. Derf Balasa UFE:	Hindi po tayo magtutunaw ng bakal, rolling steel mill po, yun mga billets ay irorolyo hanggang makuha natin yun desired na size at requirements.
Nimfa Villamayor PCEAS:	Anong source ng water?
Engr. Derf Balasa UFE:	Yung water requirement po natin ay hindi mataas, kasama po sa design may ilalagay po tayo na recirculating pond, no water loss po tayo dito.

	Source po ng tubig ay deepwell pag dry season.
	Source poing tobig by deepwen pag dry season.
Toto Delos Santos San Gregorio Magno Parish Church:	Deepwell? Ang alam ko po ay kailangan pa kayo kumuha ng permit sa NWRB, meron na po ba kayong permit sa NWRB? Paano natin maseseguro na sila ay sumusunod?
Engr. Marc Abing EMB Region 4A:	Yung project po ay constantly po imonitor. Yun details po ng project at resulta ng EIA study ay posted po sa EMB website.
	Once na-issue na po ang ECC, may conditions po dun kasama po ang paggamit ng tubig at mga permitting requirements po mula sa NWRB, we will ensure land use compatibility.
Toto Delos Santos San Gregorio Magno Parish Church:	Kayo mag check? Pupunta kayo dito? Kanino mag file ng complaints?
Engr. Marc Abing EMB Region 4A:	Yes po, may self-monitoring report din po para malaman kung nagcomply sila. Kung may complaints po, pwede po submit sa barangay muna, maganda po pag-usapan muna sa barangay at pwede din po sa aming opisina, sa Region.
Nimfa Villamayor PCEAS:	Ito daw ba ay 3 rd Public Hearing na? Hindi po, ito ay 1 st Public Hearing, ngunit ito ay 3 rd public consultations na sa venue na ito – nung scoping at nung IEC, tapos may mga several meetings and consultations po tayo na ginawa sa barangay council, barangay organization leaders, at sa mga residente ng Aguado na ginanap natin sa inyong barangay hall.
	Next question, san dadalhin ng UFE produkto nila, dito lang ba yan sa Trece ibebenta or sa ibang lugar?
Engr. Derf Balasa UFE:	Ang target po ay national government, para po sa mga government projects, dahil po yun sizes ng steel bars na gagawin ay para po sa paggawa ng bridges, high rise building, at mga major infrastructure
	projects.
Engr. Marc Abing EMB Region 4A:	May katanungan pa po ba? Yes po? Magpakilala po muna
Adriano Capuna Bria Homes:	Ako po si Adriano Capuna mula po sa Bria Homes. Nagtatrabaho po ako sa gobyerno, ang masasabi ko lang po ay yun sa septic tank or waste water, siguruhin lang po na maayos ang treatment

Engr. Derf Balasa UFE:	Yun design po at technology para sa treatment ng septic tank po will be in accordance to the required standards. We commit po to the standards and yun conditions na ilalagay po sa ECC.
Maritess Herma Pres. HOA Southville 2 Phase 3	Dun po sa nabanggit na hiring, ano pong qualifications at ano pong magiging requirements?
Engr. Derf Balasa UFE:	Physically able po. No discrimination po. Requirements po ay Physically able and willing work; drug test, medical exam, psychological exam, syempre po baka mang-away sa loob eh magkaproblema pa tayo sa barangay, yun po no criminal records syempre po.
	Yun iba po gusto pa po college graduate pa eh sa akin po, magrorolyo ka lang naman ng bakal kailangan ba college graduate ka pa? Basta po yun yung mga requirements po
Joy Oguis HOA Southville 2 Phase 3:	Sa salary and benefits po, manila rate po ba? Ano pong mga benefits ng mga empleyado?
Engr. Derf Balasa UFE:	Yun government po ay strictly monitoring po yun mga industries na katulad namin. Ang salary and wages will comply to the DOLE standards depende po sa job level at competency including benefits
Toto Delos Santos San Gregorio Magno Parish Church:	Hindi po ito tanong, pero tulong na sagot po. Yun sa salary if in coastal area – Manila rate po. Other areas po ay iba depende sa nakaset ng DOLE. Yun sa benefits, meron silang HR Department at yun ang magaayos ng benefits para sa empleyado. Sa skills development naman, pwede TESDA.
	May tanong pa po sana ako, ang UFE po ba ay Filipino owned company or foreigner? Kasi may batas sa corporate onwnership, hindi dapat foreign owned.
Engr. Derf Balasa UFE:	100% Filipino owned po, meron po kami SEC registration at ang may ari po ay hindi foreigner, Filipino po.
Engr. Marc Abing EMB Region 4A:	Meron pa po bang katanungan? Wala na po?
Jaymon Angoluan EMB Central Office:	Salamat po, sabihin ko lang po yun next steps natin. Yung mga tanong po ninyo, sana ay nasagot at isasama po nila yan sa report na isa-

	submit sa amin, susunod po ay pagreview namin ng report kung na - address nila yun mga concerns po.
	Okay po? Wala na po bang katanungan? Kagawad?
Kagawad Wilson Mendoza:	Salamat po gusto ko lang po sabihin na ang mga taga-Barangay Aguado po ay hindi nang-aaway, pero handa po kaming lumaban para sa aming karapatan. Salamat po.
	Close ko na ba? Maraming salamat po.

OPENING: NATIONAL ANTHEM

3 4

OPENING REMARKS

PUBLIC HEARING: INTRODUCTION AND TARGET **OBJECTIVES, HOUSE RULES**

THE EIA PROCESS

What is EIA?

- involves predicting and evaluating the likely impacts of a project (including cumulative impacts) on the environment during construction, commissioning, operation and abandonment.
- includes designing appropriate preventive, mitigating and enhancement measures addressing these consequences to protect the environment and the communities welfare

7 8

9

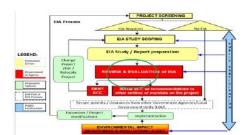

Purpose of the EIA process

- 1. EIA is used to enhance and guide decision making.
- 2. Through the EIA, process, adverse environmental impacts are considerably reduced, through reiterative review process of project siting, design and other alternatives, and the subsequent formulation of environmental management and monitoring plans.

- 3. A positive determination by the DENR-EMB results to the issuance of an Environmental Compliance Commitment (ECC) documents, to be conformed to by the Proponent and represents the project's Environmental Compliance Certificate.
- 4. The release of the ECC allows the project to the next stage of project planning, which is the acquisition of approvals from other government agencies and LGU's, after which the project can start implementation.
